

CONTENTS

<i>Contributors</i>	<i>xiii</i>
<i>Preface</i>	<i>xxi</i>
<i>Volumes in Series</i>	<i>xxv</i>

1. Enhanced Antiviral Activity of Acyclovir Loaded into Nanoparticles 1

Roberta Cavalli, Manuela Donalisio, Agnese Bisazza, Andrea Civra,
Elisabetta Ranucci, Paolo Ferruti, and David Lembo

1. Introduction	2
2. Preparation of Acyclovir-Loaded Nanoparticles and Fluorescent Nanoparticles	4
3. Biocompatibility Assays	8
4. Assessment of the Antiviral Activity	14
5. Conclusions	18
Acknowledgements	18
References	18

2. Gold *manno*-Glyconanoparticles for Intervening in HIV gp120 Carbohydrate-Mediated Processes 21

Paolo Di Gianvincenzo, Fabrizio Chiodo, Marco Marradi,
and Soledad Penadés

1. Introduction	22
2. Design, Preparation, and Characterization of <i>manno</i> -GNPs	23
3. Evaluation of <i>manno</i> -GNPs as Inhibitors of Carbohydrate-Mediated gp120 Interactions	28
4. Validation of <i>manno</i> -GNPs as Inhibitors of HIV-1/Cell Infection	33
Acknowledgments	37
References	37

3. Nanoparticle-Mediated Targeted Delivery of Antiretrovirals to the Brain	41
Supriya D. Mahajan, Wing-Cheung Law, Ravikumar Aalinkeel, Jessica Reynolds, Bindukumar B. Nair, Ken-Tye Yong, Indrajit Roy, Paras N. Prasad, and Stanley A. Schwartz	
1. Introduction	42
2. Preparation and Characterization of QD	45
3. Physical Characterization of QDs	47
4. Preparation of QD-Amprenavir-Tf Nanoplex	48
5. Assessment of Amprenavir Levels Using HPLC	49
6. Evaluating the Efficacy of Antiretroviral Containing Nanoplex Using an <i>In Vitro</i> BBB Model	49
7. Evaluation of the Antiviral Efficacy of the QD-Tf-Amprenavir Nanobioconjugate	54
8. Concluding Remarks	57
Acknowledgments	58
References	58
4. Antibacterial Activity of Doxycycline-Loaded Nanoparticles	61
Ranjita Misra and Sanjeeb K. Sahoo	
1. Introduction	62
2. Polymeric Nanoparticles	65
3. Chitosan Nanoparticles	65
4. Polyalkylcyanoacrylate Nanoparticles	67
5. poly(D,L-lactide-co-glycolide) Nanoparticles	68
6. poly(ϵ -caprolactone) Nanoparticles	70
7. Doxycycline-Loaded PLGA:PCL Nanoparticles	70
8. Conclusion	81
References	81
5. Antimicrobial Properties of Electrically Formed Elastomeric Polyurethane-Copper Oxide Nanocomposites for Medical and Dental Applications	87
Z. Ahmad, M. A. Vargas-Reus, R. Bakhshi, F. Ryan, G. G. Ren, F. Oktar, and R. P. Allaker	
1. Introduction	88
2. Materials and Methods	90
3. Results and Discussion	91
4. Concluding Remarks and Future Work	97
Acknowledgments	98
References	98

6. Gastrointestinal Delivery of Anti-inflammatory Nanoparticles	101
Hamed Laroui, Shanthi V. Sitaraman, and Didier Merlin	
1. Introduction	102
2. Material According to Drug Application	103
3. Anti-inflammatory Compounds as Encapsulated Drug	104
4. NSAIDs-Loaded NPs	110
5. Biomaterial Choice	111
6. Targeting NPs to the Colon: Hydrogel-Encapsulated NPs	112
7. Conclusion	118
Acknowledgments	121
References	121
7. Chitosan-Based Nanoparticles as a Hepatitis B Antigen Delivery System	127
Filipa Lebre, Dulce Bento, Sandra Jesus, and Olga Borges	
1. Introduction	128
2. Chitosan-Based Particle Preparation	129
3. Physicochemical Characterization of the Particles	132
4. Antigen Adsorption Studies	134
5. <i>In vitro</i> Release Studies	135
6. Evaluation of the Bioactivity of the Antigen	137
7. Cell Viability Studies with Spleen Cells	137
8. Studies on Uptake into Peyer's Patches	139
9. Concluding Remarks	140
References	140
8. Targeting Nanoparticles to Dendritic Cells for Immunotherapy	143
Luis J. Cruz, Paul J. Tacken, Felix Rueda, Joan Carles Domingo, Fernando Albericio, and Carl G. Figdor	
1. Introduction	144
2. Passive Targeting	144
3. Active Targeting	146
4. Particulate Vaccines	147
5. Targeting Gold NP Vaccines to DCs	148
6. Experimental Procedure for Targeted AuNP Preparation	150
7. Targeting Liposome-Based Vaccines to DCs	151
8. Targeting Poly(Lactic-co-Glycolic Acid)-Based Vaccines to DCs	154
9. Experimental Procedure for the Preparation of Targeted PLGA NP	155
10. Conclusion	157
References	158

9. Protein–Carbon Nanotube Sensors: Single Platform Integrated Micro Clinical Lab for Monitoring Blood Analytes	165
Sowmya Viswanathan, Pingzuo Li, Wonbong Choi, Slawomir Filipek, T. A. Balasubramaniam, and V. Renugopalakrishnan	
1. Introduction	166
2. Prototype	167
3. Concept	168
4. Biosensors	169
5. Microfluidics	169
6. Amperometric Sensor for the Detection of Blood Analytes	169
7. Protein Probes for Detection and Monitoring Molecular Components of Serum	171
8. Protein Engineering and Molecular Biology of Probe Proteins	180
9. Control of the Fermentation Process	181
10. Gene Structure and Purification of Overexpressed Protein	181
11. Immobilization of Proteins on SWCNT	183
12. Immobilization of Proteins on Self-Assembled Monolayers	185
13. Characterization of SWCNT Enzyme Adduct	186
14. Mediators	186
15. Surface Characterization	187
16. Fabrication	188
17. Signal Detection	188
18. Experimental Protocol	188
19. Conclusion	190
Acknowledgments	191
References	191
10. Investigating the Toxic Effects of Iron Oxide Nanoparticles	195
Stefaan J. Soenen, Marcel De Cuyper, Stefaan C. De Smedt, and Kevin Braeckmans	
1. Introduction	196
2. Materials	197
3. Methods	199
4. Concluding Remarks	221
Acknowledgments	221
References	222

11. Cytotoxicity of Gold Nanoparticles	225
Yu Pan, Matthias Bartneck, and Willi Jahnen-Dechent	
1. Introduction	225
2. Dosage and Quantification of Gold Nanoparticles	227
3. Aggregation State of Nanoparticles in Fluids	228
4. Cell-Based Nanotoxicity Studies	230
References	239
12. Design of Target-Seeking Antifibrotic Compounds	243
Tero A. H. Järvinen	
1. Introduction	244
2. <i>In Vivo</i> Phage Display	246
3. Homing Peptides	251
4. Multifunctional Fusion Proteins	254
5. Function of Multifunctional Fusion Protein	257
6. Concluding Remarks	259
Acknowledgments	259
References	260
13. Design and Fabrication of <i>N</i>-Alkyl-Polyethylenimine-Stabilized Iron Oxide Nanoclusters for Gene Delivery	263
Gang Liu, Zhiyong Wang, Seulki Lee, Hua Ai, and Xiaoyuan Chen	
1. Introduction	264
2. Materials	265
3. Methods	266
4. Notes	269
5. Anticipated Results	271
6. Summary	274
Acknowledgments	274
References	275
14. Cell-Penetrating Peptide-Based Systems for Nucleic Acid Delivery: A Biological and Biophysical Approach	277
Sara Trabulo, Ana L. Cardoso, Ana M. S. Cardoso, Nejat Düzgüneş, Amália S. Jurado, and Maria C. Pedroso de Lima	
1. Introduction	278
2. Methods for Preparation of CPP-Based Nucleic Acid Complexes	279
3. Methods for Physical Characterization of CPP-Based Nucleic Acid Complexes and Their Interactions with Membranes	283
4. Methods for Evaluation of Biological Activity of CPP-Based Nucleic Acid Complexes	292

5. Methods for Evaluation of Cytotoxicity of CPP-Based Nucleic Acid Complexes	294
6. Concluding Remarks	296
Acknowledgments	297
References	297
15. Multifunctional Envelope-Type Nano Device (MEND) for Organelle Targeting Via a Stepwise Membrane Fusion Process	301
Yuma Yamada, Hidetaka Akita, and Hideyoshi Harashima	
1. Programmed Packaging Concept and Construction of R8-MEND	302
2. Screening of Lipid Compositions for Their Ability to Fuse with Nuclear and Mitochondrial Membranes	304
3. Construction of Tetra-Lamellar MEND (T-MEND)	309
4. Nuclear Gene Delivery	314
5. Mitochondrial Bioactive Molecule Delivery Using a Dual Function-MITO-Porter as a MEND for Mitochondrial Delivery	318
6. Conclusions	322
Acknowledgments	322
References	322
16. Lipopolyplexes as Nanomedicines for Therapeutic Gene Delivery	327
Leire García, Koldo Urbiola, Nejat Düzgüneş, and Conchita Tros de Ilarduya	
1. Introduction	328
2. Principle of the Method	329
3. Experimental Procedures	329
4. Application of Lipopolyplexes	332
5. Concluding Remarks	336
Acknowledgments	336
References	337
17. Interfering Nanoparticles for Silencing MicroRNAs	339
Huricha Baigude and Tariq M. Rana	
1. Introduction	340
2. Delivery of Short Therapeutic RNAs	341
3. Protocols	344
4. Concluding Remarks	350
Acknowledgments	350
References	350

18. Genetic Nanomedicine: Gene Delivery by Targeted Lipoplexes	355
Nejat Düzgüneş and Conchita Tros de Ilarduya	
1. Introduction	356
2. Preparation of Protein-Cationic Lipid-DNA Ternary Complexes	357
3. Gene Delivery <i>In Vitro</i>	359
4. Cell Viability Following Transfection	361
5. Enhancement of Transfection <i>In Vitro</i>	362
6. Targeted Lipoplexes <i>In Vivo</i>	364
7. Concluding Remarks	365
Acknowledgments	365
References	366
 <i>Author Index</i>	 369
<i>Subject Index</i>	399
