Section 1

Histone and DNA Modifications, Enzymes, Chromatin Effectors

1. Examining Histone Posttranslational Modification Patterns by High-Resolution Mass Spectrometry	3
Shu Lin and Benjamin A. Garcia	
1. Introduction	4
2. Materials	5
3. Nuclei Isolation	6
4. Acid Extraction	8
5. Offline Reverse-Phase High-Performance Liquid Chromatography for Histone Variant Purification (Optional)	9
6. Chemical Derivatization of Histones	11
7. Stage-Tip Cleanup of Peptide Samples Prior to MS Analysis	15
8. Enrichment for Phosphorylated Peptides Using Titanium Dioxide (TiO ₂) Beads (Optional)	16
9. Online RP-HPLC and MS	19
Acknowledgments	27
References	28
2. Investigating the Cell Cycle-Associated Dynamics of Histone Modifications Using Quantitative Mass Spectrometry	29
Mo Xu, She Chen, and Bing Zhu	
1. Introduction	30
2. Experimental Design	31
3. Cell Culture	39
4. Extraction and Separation of Histones	43
5. Preparation of Propionic Anhydride-Derivatized Tryptic Histone Peptides	46

6. Mass Spectrometric Analysis and Quantification of Histone PTMs	51
Acknowledgments	53
References	53
3. A Method to Site-Specifically Incorporate Methyl-Lysine Analogues into Recombinant Proteins	57
Matthew D. Simon and Kevan M. Shokat	
1. Introduction	58
2. Protocol to Install MLA into Recombinant Proteins	59
References	68
4. Methods Applied to the Study of Protein Arginine Methylation	71
Donghang Cheng, Vidyasiri Vemulapalli, and Mark T. Bedford	
1. Introduction	72
2. <i>In Vitro</i> Arginine-Methylation Assays	73
3. Enzyme Sources for <i>In Vitro</i> Methylation Reactions	74
4. Substrate Sources for <i>In Vitro</i> Methylation Assays	81
5. Cell-Based Methylation Assays	81
6. Methyl-Specific Antibodies	84
7. Using Global-Methylation Inhibitors	87
8. Using Cell-Based Reporter Systems to Screen for PRMT Inhibitors	88
9. Summary	89
Acknowledgments	89
References	89
5. Enzymatic Analysis of Tet Proteins: Key Enzymes in the Metabolism of DNA Methylation	93
Li Shen and Yi Zhang	
1. Introduction	94
2. Expression and Purification of Tet Proteins	95
3. Tet Activity Assays	97
4. Analysis of the Cytosine Derivatives by 2D-TLC	99
5. Analysis of the Cytosine Derivatives by Mass Spectrometry	100
6. Analysis of the Endogenous Level of Cytosine Derivatives by Mass Spectrometry	103
Acknowledgments	104
References	104

6. Peptide Microarrays to Interrogate the "Histone Code"	107
Scott B. Rothbart, Krzysztof Krajewski, Brian D. Strahl, and Stephen M. Fuchs	
1. Introduction	108
2. Histone Peptide Library	110
3. Microarray Printing	120
4. Analysis of Antibodies, Effector Proteins, and Enzymes	125
5. Data Analysis	129
6. Summary and Perspectives	130
Acknowledgments	133
References	133
 7. Identifying Chromatin Readers Using a SILAC-Based Histone Peptide Pull-Down Approach	 137
Michiel Vermeulen	
1. Introduction	137
2. Histone Peptide Synthesis	138
3. SILAC Labeling	139
4. Incorporation Check	143
5. Preparation of Nuclear Extract	146
6. Histone Peptide Pull-Down	148
7. In-gel Digestion	151
8. Mass Spectrometry	154
9. Data Analysis	155
10. Outlook	157
Acknowledgments	159
References	159
 8. High-Throughput Strategy to Identify Inhibitors of Histone-Binding Domains	 161
Elise K. Wagner, Brittany N. Albaugh, and John M. Denu	
1. Introduction	162
2. AlphaScreen Assay Principles	164
3. Materials and Instrumentation	166
4. Design and Preparation of Histone Peptides and Histidine Tag Fusion Proteins	166
5. Initial Optimization of an AlphaScreen-Based Histone-Binding Assay	170
6. Primary Screening	176

7. Hit Selection and Secondary Screening	178
8. Concentration-Dependence Validation Studies	179
9. Assay-Specific Compound Interference	180
10. Additional Assays for Validation	182
11. Summary	184
Acknowledgments	184
References	184

9. Validation of Histone-Binding Partners by Peptide Pull-Downs and Isothermal Titration Calorimetry 187

Kathryn Malecek and Alexander Ruthenburg

1. Introduction	188
2. Initial Screening: Discovering Putative Interactions Between Histone Peptides and Potential Binding Partners	191
3. Peptide Pull-downs: Establishing Candidates for Quantitative Assessment	195
4. Isothermal Titration Calorimetry (ITC): Defining Histone PTM Binding Affinities	200
5. Reagent Considerations	212
6. Summary: Peptide Pull-Downs and ITC in the Chromatin Field	216
Acknowledgments	218
References	218

Section 2

Nucleosome and Histone Dynamics

10. Analysis of Histone Chaperone Antisilencing Function 1 Interactions 223

Jean K. Scorgie, Douglas C. Donham III, and Mair E.A. Churchill

1. Introduction	224
2. Preparation of Asf1	225
3. Preparation of Histone Components	228
4. Fluorescence Spectroscopy Analysis of Asf1 Binding Interactions with Histones	230
5. Electrophoretic Mobility Shift Analysis of Asf1 Binding Interactions with Histones	232
6. Summary and Implications	238
Acknowledgments	239
References	239

11. Quantifying Chromatin-Associated Interactions: The HI-FI System	243
Duane D. Winkler, Karolin Luger, and Aaron R. Hieb	
1. Introduction to Chromatin and the HI-FI System	244
2. Fluorescent Labeling and Preparation of Nucleosome Components	246
3. Imaging Requirements and Reaction Conditions	251
4. HI-FI Binding Affinity Assay Setup and Execution	255
5. HI-FI Stoichiometric Assays Setup and Execution	266
6. HI-FI Competition Assays with FRET	267
7. Summary	272
Acknowledgments	272
References	272
12. Biochemical Assay for Histone H2A.Z Replacement by the Yeast SWR1 Chromatin Remodeling Complex	275
Gaku Mizuguchi, Wei-Hua Wu, Samar Alami, and Ed Luk	
1. Introduction	276
2. Preparation of Reagents	277
3. <i>In Vitro</i> Htz1 Replacement Assay by Chromatin Remodeling Complex SWR1	285
4. Special Notes	287
5. Concluding Remarks	289
Acknowledgments	289
References	290
13. Experimental Analysis of the Mechanism of Chromatin Remodeling by RNA Polymerase II	293
Daria A. Gaykalova, Olga I. Kulaeva, Nikolai A. Pestov, Fu-Kai Hsieh, and Vasily M. Studitsky	
1. Introduction	294
2. Materials and Methods	296
3. DNase I Footprinting of ECs Formed by <i>E. coli</i> RNAP During Transcription Through a Nucleosome	296
4. Mapping of ECs Formed by Pol II During Transcription Through a Nucleosome Using Restriction Endonucleases	305
Acknowledgments	311
References	311
<i>Author Index</i>	315
<i>Subject Index</i>	329
