1. Defective Trafficking of Rhodopsin and Its Role in Retinal Degenerations	1
T.J. Hollingsworth and Alecia K. Gross	
1. Introduction	2
2. Retinitis Pigmentosa: The Most Common Inherited Retinal Degeneration	2
3. Rhodopsin: Function and History	18
4. Future Directions and Emerging Treatments	28
5. Concluding Remarks	30
References	31
2. Adherens Junction Assembly and Function in the <i>Drosophila</i> Embryo	45
Tony J.C. Harris	
1. Introduction	46
2. AJ Components	47
3. AJ Assembly and Maintenance	52
4. AJ Regulation and Function	58
5. Concluding Remarks	75
Acknowledgments	75
References	75
3. New Insights into the Regulation of Myosin Light Chain Phosphorylation in Retinal Pigment Epithelial Cells	85
Ariadna Yolanda Ruiz-Loredo and Ana María López-Colomé	
1. Introduction	86
2. Retinal Pigment Epithelium	87
3. Actin Cytoskeleton	90
4. Myosin Superfamily of Molecular Motors	93
5. Myosin Function in RPE Cells	103
6. Concluding Remarks	109

Acknowledgments	109
References	109
4. Cell Biology of the Chloroplast Symbiosis in Sacoglossan Sea Slugs	123
Sidney K. Pierce and Nicholas E. Curtis	
1. Introduction	124
2. Functional Algal Chloroplasts in Molluscan Cells	125
3. Biochemical Interactions	131
4. Chloroplast Symbiosis in <i>E. chlorotica</i>	134
5. Concluding Remarks	142
Acknowledgments	143
References	143
5. Regulation of Intraflagellar Transport and Ciliogenesis by Small G Proteins	149
Hongmin Qin	
1. Introduction	150
2. Ciliogenesis	151
3. Intraflagellar Transport	152
4. Models for Ciliary Membrane Assembly	153
5. Small G Protein Regulators of IFT	159
6. Perspectives	162
Acknowledgment	163
References	163
6. Emerging Roles for Renal Primary Cilia in Epithelial Repair	169
James A. Deane and Sharon D. Ricardo	
1. Introduction	170
2. Assembling and Regulating the Composition of Cilia	171
3. Cilia in Vertebrates	172
4. Primary Cilia in the Kidney	174
5. Cell Biology of Renal Injury and Repair	177
6. Primary Cilia in Renal Injury and Repair	179
7. Conclusions	186
Acknowledgments	186
References	187

7. Mechanisms of Cardiogenesis in Cardiovascular Progenitor Cells	195
Jasmin Taubenschmid and Georg Weitzer	
1. Introduction	196
2. Definition of Terms	198
3. Origin of Cardiovascular Progenitor Cells	201
4. Regulation of Cardiogenesis in Cardiovascular Progenitor Cells	218
5. Concluding Remarks	245
Acknowledgments	246
References	247
8. Membrane Trafficking and Phagosome Maturation During the Clearance of Apoptotic Cells	269
Nan Lu and Zheng Zhou	
1. Introduction	270
2. Novel Players and Mechanisms That Drive Phagosome Maturation	274
3. Concluding Remarks	300
Acknowledgments	302
References	302
Index	311
