Contributors

ix

1. Cellular Functions of Tissue Transglutaminase	1
Maria V. Nurminskaya and Alexey M. Belkin	
1. Introduction	4
2. Enzymatic and Nonenzymatic Activities of TG2	6
3. Regulation of TG2 Expression and Localization	22
4. TG2 in Diverse Cellular Compartments	28
5. Roles of TG2 in Cellular Processes	53
6. Cell Type-Specific Functions of TG2	68
7. TG2 as a Novel Therapeutic Target	70
8. The Use of TG2 in Bioengineering Applications	72
9. Conclusions and Perspectives	73
Acknowledgments	74
References	75
2. New Insights into the Regulation of Na⁺,K⁺-ATPase by Ouabain	99
Elisabete Silva and Patrício Soares-da-Silva	
1. Introduction	100
2. Na ⁺ ,K ⁺ -ATPase Actions as Ion Transporter and Functional Receptor	101
3. Cardiotonic Steroids	107
4. Na ⁺ ,K ⁺ -ATPase, Ouabain, and Signal Transduction	109
5. Physiological Functions	116
6. Pathological Processes	118
7. Conclusion	121
References	122
3. Ciliary and Flagellar Structure and Function—Their Regulations by Posttranslational Modifications of Axonemal Tubulin	133
Alu Konno, Mitsutoshi Setou, and Koji Ikegami	
1. Introduction	134
2. Ciliary and Flagellar Structures and Components	135
3. Ciliary and Flagellar Function	143

4. Posttranslational Modifications of Axonemal Tubulins	149
5. Roles for Tubulin PTMs in Flagella and Cilia	154
6. Concluding Remarks	158
Acknowledgments	159
References	159
 4. New Insights into the Regulation of Epithelial–Mesenchymal Transition and Tissue Fibrosis	 171
KangAe Lee and Celeste M. Nelson	
1. Introduction	173
2. Epithelial–Mesenchymal Transition	173
3. Major Criteria and Relevant Markers to Detect EMT	177
4. Induction and Regulation of EMT	186
5. Emerging Mechanical Cues Involved in the Triggering of EMT	195
6. EMT in Fibrosis and Disease	197
7. Therapeutics That Target EMT and Fibrosis	203
8. Concluding Remarks and Perspectives	204
Acknowledgments	206
References	206
 5. Cellular and Molecular Biology of Optineurin	 223
Hongyu Ying and Beatrice Y.J.T. Yue	
1. Introduction	224
2. Molecular Structure and Protein Characteristics	225
3. Optineurin-Binding Partners	230
4. Optineurin Mutations Associated with Diseases (Fig. 5.3B)	237
5. Possible Cellular Function of Optineurin and Dysfunctions Caused by Optineurin Mutations	241
6. Concluding Remarks and Open Questions	248
Acknowledgments	249
References	249
 6. Mechanism of Function of Viral Channel Proteins and Implications for Drug Development	 259
Wolfgang B. Fischer, Yi-Ting Wang, Christina Schindler, and Chin-Pei Chen	
1. Introduction	260
2. Viral Channel Proteins	262
3. Evaluation of the Mechanism of Function along Known Channel Proteins and Toxins	283

4. Interfering with Gating and Mode of Action	295
5. Overall Summary and Outlook	304
Acknowledgments	305
References	305
