1. Allurin, an Amphibian Sperm Chemoattractant Having Implications for Mammalian Sperm Physiology	1
Lindsey A. Burnett, Catherine A. Washburn, Hitoshi Sugiyama, Xueyu Xiang, John H. Olson, Bader Al-Anzi, Allan L. Bieber, and Douglas E. Chandler	
1. Introduction	2
2. Sperm Chemoattraction: Measuring Allurin's Chemoattraction Activity	7
3. Purification of Allurin from Frog Egg Jelly	20
4. Synthesis and Secretion of Allurin in the Frog Oviduct	22
5. Release of Allurin from Jellyed Eggs at Spawning	26
6. Allurin as a Chemoattractant for Mammalian Sperm	30
7. Allurin as a Member of the CAP Superfamily of Proteins	35
8. Crisp Subfamily—A Source of Reproductively Important Proteins	38
9. Crisp Gene Cluster and Its Allurin-Like Products	43
10. Future Directions in Allurin Research	47
Acknowledgments	49
References	49
2. New Insights into the Regulation of E-cadherin Distribution by Endocytosis	63
Simon de Beco, François Amblard, and Sylvie Coscoy	
1. Introduction	65
2. E-cadherin Organization and Dynamics in <i>Adherens</i> Junctions	65
3. Mechanisms and Regulation of E-cadherin Endocytosis at Cell–Cell Junctions	76
4. The Functional Consequences of E-cadherin Endocytosis	89
5. Summary	97
Acknowledgments	97
References	98

3. New Insights into the Role of the Cortical Cytoskeleton in Exocytosis from Neuroendocrine Cells	109
Luis M. Gutiérrez	
1. Introduction	110
2. Organization of Cortical Cytoskeleton	110
3. Changes Associated with Exocytosis	111
4. Forces Driving Cytoskeletal Changes Related to Exocytosis	113
5. Cytoskeletal Control of Vesicle Transport	116
6. Role of Cytoskeleton in Membrane Fusion	119
7. Cortical Cytoskeleton as an Organizer of Molecular Cytoarchitecture of Exocytosis	125
8. Conclusion	128
Acknowledgments	128
References	128
4. New Insights into the Mechanisms for Photodynamic Therapy-Induced Cancer Cell Death	139
Je-Ok Yoo and Kwon-Soo Ha	
1. Introduction	140
2. Major Components of PDT	141
3. Mechanisms of PDT-Induced Cancer Cell Death	145
4. Effective Therapeutic Strategies for PDT	160
5. Concluding Remarks	163
Acknowledgments	163
References	164
5. New Insights into the Role of Angiogenin in Actin Polymerization	175
Mikhail G. Pyatibratov and Alla S. Kostyukova	
1. Introduction	176
2. Structural Properties of Angiogenin	177
3. Angiogenin Localization and Function	179
4. Interaction of Angiogenin with Actin <i>in vivo</i> and <i>in vitro</i>	182
5. Concluding Remarks	191
Acknowledgments	192
References	192
6. Asymmetric Cell Divisions in the Epidermis	199
Nicholas D. Poulson and Terry Lechler	
1. Introduction	200
2. Oriented Cell Divisions in Morphogenesis	200
3. How to Establish an Axis of Division	212

4. Molecular Mechanisms Controlling Spindle Orientation	216
5. Regulation of Division Orientation in the Epidermis	221
6. Concluding Remarks	224
Acknowledgments	226
References	226
7. New Insights into the Regulation of RNP Granule Assembly in Oocytes	233
Jennifer A. Schisa	
1. Introduction	234
2. Diversity of RNP Granules in the Germline	241
3. Components of RNP Granules in Oocytes	253
4. Dynamics of RNP Granules	259
5. Role of the Cytoskeleton and Cell Organelles in Regulating RNP Granules	264
6. Function of RNP Granules in Oocytes	268
7. Conclusions and Future Perspectives	275
Acknowledgments	276
References	276
8. Role of Store-Operated Calcium Entry During Meiotic Progression and Fertilization of Mammalian Oocytes	291
Francisco Javier Martín-Romero, Aida M. López-Guerrero, Ignacio S. Álvarez, and Eulalia Pozo-Guisado	
1. Introduction	292
2. Ca^{2+} as an Essential Intracellular Messenger for the Oocyte	293
3. SOCE in Somatic Cells	302
4. Modulation of SOCE During Cell Cycle	307
5. Possible Role of SOCE in Fertilization	310
6. Modulation of SOCE During Oocyte Maturation	315
7. Future Objectives and Conclusions	316
References	320
Index	329
