1. Synaptic Plasticity Regulated by Protein-Protein Interactions and Posttranslational Modifications	1
Norihiro Yokoi, Masaki Fukata, and Yuko Fukata	
1. Introduction	2
2. Synaptic Plasticity and AMPAR Trafficking	4
3. Molecular Function and Structure of AMPARs and PSD-95	5
4. Regulation of AMPAR Trafficking and Channel Gating	14
5. Conclusions and Future Directions	33
Acknowledgments	34
References	34
2. Potential Use of G Protein-Coupled Receptor-Blocking Monoclonal Antibodies as Therapeutic Agents for Cancers	45
Deron R. Herr	
1. Introduction	46
2. G Protein-Coupled Receptors	48
3. Therapeutic Antibodies	59
4. Current GPCR Neutralizing Antibodies	65
5. Conclusions/Future Directions	70
Acknowledgments	71
References	71
3. Fibroblast Activation Protein-α: A Key Modulator of the Microenvironment in Multiple Pathologies	83
Thomas Kelly, Yan Huang, Avis E. Simms, and Anna Mazur	
1. Introduction	85
2. Characterization of FAP	86
3. Association of FAP with Human Disease	92
4. Coordination of Stromal Responses in Cancer	98
5. Clinical Potential of FAP	105
6. Conclusions and Future Directions	107

Acknowledgments	108
References	108
4. Barx Homeobox Family in Muscle Development and Regeneration	117
Helen P. Makarenkova and Robyn Meech	
1. Introduction	118
2. Roles of Homeobox Proteins in Embryonic and Adult Myogenesis	119
3. Barx Genes and Proteins	129
4. Expression Patterns of <i>Barx</i> Genes in Embryos and Adults	140
5. Gene Targets and Cellular Functions of Barx Proteins	145
6. <i>Barx</i> Gene Perturbation Models—Knockout, Knockdown, and Misexpression	149
7. Barx Proteins in Wnt and Notch Signaling	158
8. Concluding Remarks	160
Acknowledgments	162
References	162
5. Role of Adrenomedullin in the Growth and Differentiation of Stem and Progenitor Cells	175
Ignacio M. Larrayoz, Laura Ochoa-Callejero, Josune García-Sanmartín, Carlos Vicario-Abejón, and Alfredo Martínez	
1. Introduction	179
2. Stem and Progenitor Cells	179
3. Signaling Pathways in Growth and Differentiation of Stem Cells	182
4. Adrenomedullin	198
5. Role of AM in Growth and Differentiation	207
6. Role of PAMP in Growth and Cytoskeleton Regulation	215
7. Concluding Remarks	216
Acknowledgments	217
References	217
6. Cell-Cycle Control in Oocytes and During Early Embryonic Cleavage Cycles in Ascidians	235
Alex McDougall, Janet Chenevert, and Remi Dumollard	
1. Introduction	236
2. Cell Cycle Studies in Nonvertebrate Deuterostomes	238
3. Mechanism Regulating Exit from Meiotic Metaphase I	241
4. Cell Cycle Duration and Spindle Orientation During Ascidian Development	249
5. Unequal Cleavage in Ascidian Germ Cell Precursors	252

6. Concluding Remarks	256
References	257
Acknowledgments	257
7. Role of Major Sperm Protein (MSP) in the Protrusion and Retraction of <i>Ascaris</i> Sperm	265
Thomas M. Roberts and Murray Stewart	
1. Introduction	266
2. Major Sperm Protein	270
3. Cytoskeletal Dynamics and Sperm Locomotion	272
4. MSP Accessory Proteins	275
5. Mechanism of MSP-Based Locomotion	280
6. Summary and Concluding Comments	289
Acknowledgments	290
References	290
8. Role of Endoglin in Fibrosis and Scleroderma	295
Janita A. Maring, Maria Trojanowska, and Peter ten Dijke	
1. Introduction	296
2. TGF- β /Eng Signaling	296
3. TGF- β Signaling in Fibrosis/Scleroderma	299
4. Endoglin in Fibrosis	301
5. Conclusions	303
Acknowledgments	304
References	304
9. New Insights into the Regulation of Sexual Reproduction in <i>Closterium</i>	309
Hiroyuki Sekimoto, Jun Abe, and Yuki Tsuchikane	
1. Introduction	310
2. Overview of Sexual Reproduction in <i>Closterium</i>	312
3. Sex Pheromones in Heterothallic <i>Closterium</i>	314
4. Molecular Approaches to Sexual Reproduction	319
5. Evolutionary View of Sexual Reproduction	326
6. Concluding Remarks	331
Acknowledgments	332
References	333
<i>Index</i>	339
