1. Cytoskeleton Assembly in <i>Toxoplasma gondii</i> Cell Division	1
Brooke Anderson-White, Josh R. Beck, Chun-Ti Chen, Markus Meissner, Peter J. Bradley, and Marc-Jan Gubbels	
1. Introduction	2
2. Division by Internal Daughter Budding	4
3. Composition of the Cytoskeleton	5
4. Coordinated Development and Dynamics of the Cytoskeleton	12
5. Mechanistic Insights from Disruption of Cytoskeletal Components	18
6. <i>Toxoplasma</i> Cell Division in Other Life Cycle Stages	22
7. Conclusions and Open Questions	24
Acknowledgments	26
References	26
2. Functional Diversity of Actin Cytoskeleton in Neurons and its Regulation by Tropomyosin	33
Galina Schevzov, Nikki Margarita Curthoys, Peter William Gunning, and Thomas Fath	
1. Introduction	34
2. Structural Filament Components in Neurons	35
3. Actin Cytoskeleton in Neurons	37
4. Actin-Associated Proteins Regulating the Organizational State of Microfilaments in Neuronal Systems	45
5. Family of Tropomyosin Actin-Associating Proteins	57
6. Tropomyosins Define Functional Compartments	64
7. Functional Significance of Tropomyosin Isoform Expression in Neurons	68
8. Actin and Tropomyosin in Neurological Disorders	70
9. Integrated Model of Microfilament Function	72
10. Concluding Remarks	75
Acknowledgments	76
References	76

3. Osteohematopoietic Stem Cell Niches in Bone Marrow	95
Samiksha Wasnik, Abhilasha Tiwari, Mark A. Kirkland, and Gopal Pande	
1. Introduction	97
2. Developmental Hematopoiesis	99
3. Cellular Hierarchies in HSCs—Their Properties and Regulation	99
4. Hematopoietic Niche	106
5. Regulation of HSC Niches	117
6. Concluding Remarks	124
Acknowledgments	124
References	124
4. Mechanisms for Countering Oxidative Stress and Damage in Retinal Pigment Epithelium	135
Scott M. Plafker, Gary B. O'Mealey, and Luke I. Szweda	
1. Introduction	136
2. Oxidative Stress and Damage in RPE	137
3. Preservation of RPE Integrity and Function	140
4. Mitochondrial Network Dynamics	147
5. Ubiquitin Proteolytic System	158
6. Concluding Remarks	164
Acknowledgments	165
References	165
5. Genetics of Meiosis and Recombination in Mice	179
Ewelina Bolcun-Filas and John C. Schimenti	
1. Overview of Meiosis	180
2. Identification of Mouse Meiosis Genes	182
3. Entry into Meiosis: Male Versus Female	186
4. Prophase I	187
References	214
6. Cell Biology of Ischemia/Reperfusion Injury	229
Theodore Kalogeris, Christopher P. Baines, Maïke Krenz, and Ronald J. Korthuis	
1. Introduction	230
2. General Features of Ischemia/Reperfusion (I/R)	231
3. Risk Factors for I/R	243
4. Fetal Programming and Ischemic Vascular Disease	244
5. Basic Mechanisms of Cell Death	246

6. Mechanisms Underlying I/R Injury	249
7. Concluding Remarks and Perspectives	289
Acknowledgements	290
References	291
