1. Heterologous Gene Expression in Filamentous Fungi 1

Xiaoyun Su, George Schmitz, Meiling Zhang, Roderick I. Mackie,
and Isaac K. O. Cann

1. Introduction	3
2. Transformation	4
3. Global Defenses Against Foreign Genes	9
4. Impact of Transcription Regulation on Heterologous Gene Expression	17
5. Engineering Introns in Heterologous Gene Expression in Filamentous Fungi	27
6. mRNA Stability	29
7. Signal Peptides	30
8. Optimization of Codon Usage	32
9. Fusion of Heterologous Proteins to Native Proteins	33
10. Coupling of Secretion with Polarized Growth of Filamentous Fungi	34
11. Engineering the Glycosylation Pathway for Heterologous Gene Expression	36
12. Protein Quality Control	38
13. Heterologous Protein Degradation by Extracellular Proteases	41
14. Conclusions	43
References	44

2. Staphylococcal Biofilms: Quest for the Magic Bullet 63

Jamie L. Brooks and Kimberly K. Jefferson

1. Introduction	64
2. Targeting the Staphylococcal Biofilm	68
3. Conclusions	80
Acknowledgments	81
References	81

3. Climate Change and Defense against Pathogens in Plants 89

Adrian C. Newton, Lesley Torrance, Nicola Holden, Ian K. Toth,
David E. L. Cooke, Vivian Blok, and Eleanor M. Gilroy

1. Introduction	90
2. Host Defense Genes, Germplasm, and Environmental Interactions	97

3. Host Defense Mechanisms and Environmental Interactions	109
4. Limiting Epidemiological Parameters	118
5. Strategies for Expressing Climate-Durable Resistance	118
6. Conclusions and Prospects	120
Acknowledgments	122
References	123
4. Advances in the In-Field Detection of Microorganisms in Ice	133
Megan J. Barnett, David A. Pearce, and David C. Cullen	
1. Introduction	134
2. The Case for In-Field Analysis	135
3. Core Techniques Already Adapted for In-Field Use	138
4. Future Potential—Technology	145
5. Future Potential—Techniques	151
6. Key Target Environments	156
7. Conclusions	157
Acknowledgments	158
References	158
5. Microsatellites for Microbiologists	169
Michael J. Sweet, Lucinda A. Scriven, and Ian Singleton	
1. Introduction	170
2. What are Microsatellites?	171
3. Why Use Microsatellites Instead of Other Genetic Markers?	174
4. How to Use Microsatellites	175
5. Drawbacks of Microsatellite Markers	179
6. Previous Use of Microsatellites by Microbiologists	181
7. Conclusions	201
Acknowledgments	202
References	202
6. Modern Advances against Plague	209
Petra C.F. Oyston and E. Diane Williamson	
1. Introduction	209
2. Genomic Analysis of <i>Yersinia pestis</i>	211
3. Molecular Basis of Pathogenesis	212
4. Fighting Plague	219
5. Summary	232
References	232

7. <i>Salmonella</i> Enteritidis in Shell Eggs: Evolving Concerns and Innovative Control Measures	243
Jennifer J. Perry and Ahmed E. Yousef	
1. Introduction	244
2. Antimicrobial Features of Egg	246
3. Egg Contamination	248
4. Introduction of <i>Salmonella</i> into Laying Environment—Risk Factors	248
5. <i>Salmonella</i> Enteritidis in Eggs	251
6. Superior Fitness of <i>Salmonella</i> Enteritidis for Hen Tissue Colonization and Transmission to Eggs	254
7. Egg Safety Initiatives	258
8. Regulations	261
9. Treatments for Enhanced Egg Safety	261
10. Conclusion	266
References	267
<i>Index</i>	275
