

CONTENTS

Preface

ix

1. Signal Correlations in Ecological Niches Can Shape the Organization and Evolution of Bacterial Gene Regulatory Networks	1
Yann S. Dufour and Timothy J. Donohue	
1. Introduction	2
2. Gene Expression Regulation as an Output of Signal Transduction Pathways	4
3. Mapping Transcriptional Regulatory Networks	10
4. Factors Shaping the Functional Composition of Regulons	18
5. Evolution of Transcription Factor Functions	24
6. Conclusions	28
Acknowledgments	30
References	31
2. <i>Vibrio fischeri</i> Metabolism: Symbiosis and Beyond	37
Anne K. Dunn	
1. Introduction	38
2. <i>V. fischeri</i> as a Model Organism	39
3. What are the Nutrient Sources for Symbiotic <i>V. fischeri</i> ?	44
4. Which <i>V. fischeri</i> Metabolic Pathways are Used in the Host?	49
5. What Regulatory Proteins are Controlling Expression of these Metabolic Pathways?	54
6. Which Pathways Might be Important in <i>V. fischeri</i> 's Free-Living Lifestyle?	57
7. Conclusions	61
Acknowledgments	61
References	61
3. Environmental Heme Utilization by Heme-Auxotrophic Bacteria	69
Alexandra Gruss, Elise Borezée-Durant, and Delphine Lechardeur	
1. Introduction	70
2. Biological Importance and Function of the Heme Molecule	71
3. HAB that Utilize Heme	73
4. Heme Sources for HAB	81
5. Heme Acquisition in HAB	87

6. Acquisition of Heme Biosynthesis Intermediates and Other Porphyrins	97
7. Heme Utilization in HAB	98
8. Heme Intracellular Management	101
9. An Example of Adaptative Heme Acquired Auxotrophy: Small Colony Variants	107
10. Conclusion	111
Acknowledgments	111
References	112
 4. The Hyperthermophilic Bacterium <i>Aquifex aeolicus</i>: From Respiratory Pathways to Extremely Resistant Enzymes and Biotechnological Applications	 125
Marianne Guiral, Laurence Prunetti, Clément Aussignargues, Alexandre Ciaccafava, Pascale Infossi, Marianne Ilbert, Elisabeth Lojou, and Marie-Thérèse Giudici-Ortoni	
1. The Extreme Heat-Loving Bacterium <i>Aquifex aeolicus</i>	127
2. Hydrogenases and Hydrogen Metabolism in <i>Aquifex aeolicus</i>	134
3. Hydrogen Sulfide Utilization Pathway	153
4. Elemental Sulfur and Oxidized Sulfur Compounds Energy Metabolism	169
5. A Model of Intricate Bioenergetic Pathways in <i>Aquifex aeolicus</i>	181
6. Concluding Remarks	183
Acknowledgments	184
References	184
 5. Regulation of the Anaerobic Metabolism in <i>Bacillus subtilis</i>	 195
Elisabeth Härtig and Dieter Jahn	
1. Introduction	196
2. Anaerobic Metabolism	196
3. Anaerobic Regulatory Network	202
4. Conclusions	211
Acknowledgments	211
References	211
 6. Supramolecular Organization in Prokaryotic Respiratory Systems	 217
Axel Magalon, Rodrigo Arias-Cartin, and Anne Walburger	
1. Introduction	218
2. Supramolecular Organization of the Respiratory Systems	222
3. Determinants for Supramolecular Organization	228

4. Implications of Supramolecular Organization	245
5. Concluding Remarks and Future Directions	250
Acknowledgments	251
References	251
7. Sulfate-Reducing Bacteria Reveal a New Branch of Tetrapyrrole Metabolism	267
Susana A. L. Lobo, Martin J. Warren, and Lígia M. Saraiva	
1. Introduction to <i>Desulfovibrio</i> Species	268
2. Tetrapyrrole Biosynthesis	272
3. Production of SH	276
4. <i>D. vulgaris</i> CbiK Cobaltochelataes	277
5. Production of Cobalamin	279
6. Alternative Haem <i>b</i> Biosynthetic Pathway	286
7. Biosynthesis of Haem <i>b</i> Derivatives	288
8. Organization and Regulation of Tetrapyrrole Biosynthesis-Related Genes	290
Acknowledgments	291
References	291
Author Index	297
Subject Index	329
