

CONTENTS

<i>Contributors</i>	<i>xiii</i>
<i>Preface</i>	<i>xix</i>
<i>Volumes in Series</i>	<i>xxi</i>

1. Analysis of Duplex Unwinding by RNA Helicases Using Stopped-Flow Fluorescence Spectroscopy **1**

Andrea Putnam and Eckhard Jankowsky

1. Introduction	2
2. Experimental Considerations for Stopped-Flow Fluorescence Experiments	3
3. Substrate Design and Preparation	7
4. Designing and Performing Stopped-Flow Fluorescence Unwinding Experiments	13
5. Data Fitting and Analysis	20
Acknowledgments	24
References	24

2. Analyzing ATP Utilization by DEAD-Box RNA Helicases Using Kinetic and Equilibrium Methods **29**

Michael J. Bradley and Enrique M. De La Cruz

1. Introduction	30
2. Reagents and Equipment	31
3. Important Considerations for Initial DBP Characterization	34
4. Steady-State ATPase Measurements	39
5. Transient Kinetic Analysis of the DBP ATPase Cycle	46
6. ATP Hydrolysis Reversibility Measured by Isotope Exchange	54
7. RNA Unwinding Assays and ATPase Coupling	55
8. Kinetic Simulations	56
9. Putting It All Together: Quantitative Analysis of the DBP ATPase Cycle	56
Acknowledgments	58
References	58

3. Oxygen Isotopic Exchange Probes of ATP Hydrolysis by RNA Helicases	65
David D. Hackney	
1. Introduction	66
2. Determination of the k_{-2}/k_3 Ratio by Intermediate Exchange During Net ATP Hydrolysis with Pyruvate Kinase and PEP to Regenerate ATP	67
3. Derivatization of the Pi to Volatile Triethyl Phosphate	68
4. Isotopic Analysis by GC-MS	70
5. Fitting Intermediate Exchange Data to Obtain $R = k_{-2}/k_3$	70
6. Medium Pi=HOH Medium Exchange	72
7. Complication of Concurrent Medium Pi=HOH Exchange During Net Hydrolysis	72
Acknowledgment	73
References	73
4. Conformational Changes of DEAD-Box Helicases Monitored by Single Molecule Fluorescence Resonance Energy Transfer	75
Alexandra Z. Andreou and Dagmar Klostermeier	
1. Introduction	76
2. Theoretical Background of smFRET	80
3. Preparing DEAD-box Proteins for smFRET Studies	83
4. smFRET Experiments and the Calculation of Corrected smFRET Histograms	87
5. Extracting Distance Information from smFRET Measurements: Distance Histograms	91
6. The Conformational Cycle of DEAD-Box Proteins	94
7. Perspective	103
Acknowledgments	104
References	104
5. RNA Catalysis as a Probe for Chaperone Activity of DEAD-Box Helicases	111
Jeffrey P. Potratz and Rick Russell	
1. Introduction	112
2. Catalytic Activity as a Probe of RNA Folding	113
3. Self-splicing as a Readout for Native State Formation	115
4. Substrate Cleavage as a Readout for Native State Formation	118
5. Other Applications of the Discontinuous Assay	124
Acknowledgments	126
References	127

6. Molecular Mechanics of RNA Translocases	131
Steve C. Ding and Anna Marie Pyle	
1. Introduction	132
2. Major Examples of Monomeric RNA Translocases	134
3. Concluding Remarks	144
Acknowledgments	145
References	145
7. Analysis of Helicase–RNA Interactions Using Nucleotide Analog Interference Mapping	149
Annie Schwartz, Makhlof Rabhi, Emmanuel Margeat, and Marc Boudvillain	
1. Introduction	150
2. Materials and Reagents	152
3. Methods	154
4. Conclusions	166
Acknowledgments	167
References	167
8. Crystallization and X-ray Structure Determination of an RNA-Dependent Hexameric Helicase	171
Nathan D. Thomsen and James M. Berger	
1. Introduction	172
2. Biochemical Foundation	173
3. Protein Expression, Purification, and Storage	175
4. Ligand Preparation and Storage	176
5. Trapping Rho–RNA–Nucleotide Complexes	177
6. Design of a Substrate-Centric Crystal-Screening Strategy	177
7. Crystallization of Rho Bound to RNA and Adenosine Nucleotides	178
8. Conclusion	185
9. Additional Methods	186
Acknowledgment	187
References	187
9. Structural Analysis of RNA Helicases with Small-Angle X-ray Scattering	191
Manja A. Behrens, Yangzi He, Cristiano L. P. Oliveira, Gregers R. Andersen, Jan Skov Pedersen, and Klaus H. Nielsen	
1. Introduction	192
2. Basic Principles of Solution Scattering and Initial Data Treatment	193
3. Model-Independent Analysis	194

4. Shape Determination Without Use of <i>A Priori</i> Information	198
5. Atomic Resolution Models and Solution Scattering	201
6. Using Atomic Resolution Models to Investigate Solution Structures	203
7. Analysis of Protein Complexes	206
8. Concluding Remarks	210
Acknowledgments	210
References	210
10. Analysis of Cofactor Effects on RNA Helicases	213
Crystal Young and Katrin Karbstein	
1. Introduction	214
2. How to Study Cofactors	219
3. Reagents	221
4. Protocols	224
Acknowledgments	233
References	233
11. Analysis of DEAD-Box Proteins in mRNA Export	239
Ben Montpetit, Markus A. Seeliger, and Karsten Weis	
1. Introduction	240
2. Purification of Dbp5, Gle1, and Nup159	242
3. Steady-State ATPase Assay	244
4. Use of Fluorescence Polarization to Monitor RNA or Nucleotide Binding and Release	246
5. Concluding Remarks	252
Acknowledgments	252
References	252
12. Biochemical Characterization of the RNA Helicase UPF1 Involved in Nonsense-Mediated mRNA Decay	255
Francesca Fiorini, Fabien Bonneau, and Hervé Le Hir	
1. Introduction	256
2. Preparation of Active UPF1 and UPF1-UPF2 Complex	257
3. Complex Assembly	259
4. RNase Protection Assay	264
5. ATPase Assay	266
6. Unwinding Assay	268
7. Conclusions	272
Acknowledgments	273
References	273

13. Identification of RNA Helicase Target Sites by UV Cross-Linking and Analysis of cDNA	275
Markus T. Bohnsack, David Tollervey, and Sander Granneman	
1. Introduction	276
2. Material	277
3. Methods	279
4. Protocol Adaptation and Trouble-Shooting	286
Acknowledgments	287
References	287
14. <i>In Vivo</i> Approaches to Dissecting the Function of RNA Helicases in Eukaryotic Ribosome Assembly	289
David C. Rawling and Susan J. Baserga	
1. Introduction	290
2. Experimental Strategies Used to Evaluate RB Helicases	291
3. Determining Where an RNA Helicase Acts in the RB Pathway	296
4. Elucidating the Supramolecular Context of an RB Helicase: Protein-Protein Interaction Studies	308
References	316
15. Analysis of RNA Helicases in P-Bodies and Stress Granules	323
Angela Hilliker	
1. Introduction	324
2. RNA Helicases in Cytoplasmic mRNP Granules	325
3. RNA Helicases That Affect P-Bodies or SGs	329
4. Determining Whether an RNA Helicase Can Localize to Cytoplasmic mRNP Granules	331
5. Determining Whether an RNA Helicase Affects Cytoplasmic mRNP Granules	337
6. Discussion and Perspective	340
Acknowledgment	341
References	341
16. DEAD-Box RNA Helicases as Transcription Cofactors	347
Frances V. Fuller-Pace and Samantha M. Nicol	
1. Introduction	348
2. Analysis of Interactions Between RNA Helicases and Transcription Factors <i>In Vitro</i> and in Cell Lines	349
3. Analysis of p68/p72 Sumoylation in Cell Lines	358
4. Analysis of Transcriptional Coactivator/Corepressor Activity of p68 and p72	361

5. Summary	363
Acknowledgments	365
References	365
17. DEAD-Box RNA Helicases in Gram-Positive RNA Decay	369
Peter Redder and Patrick Linder	
1. Introduction	369
2. Measuring mRNA Decay	371
3. Phenotypic Readouts	377
4. Concluding Remarks	381
Acknowledgments	381
References	381
18. RNA Helicases in Cyanobacteria: Biochemical and Molecular Approaches	385
George W. Owttrim	
1. Introduction	386
2. Preparation of Cyanobacterial Extracts	387
3. Alteration of RNA Helicase Expression in Cyanobacteria	390
4. Northern Analysis of Transcript Levels	394
5. Western Analysis of Protein Levels	396
6. Cellular Ultrastructure and <i>In Situ</i> RNA Helicase Localization	397
Acknowledgments	400
References	400
19. Determination of Host RNA Helicases Activity in Viral Replication	405
Amit Sharma and Kathleen Boris-Lawrie	
1. Introduction	406
2. Methods Used To Study Cell-Associated RNA Helicase in Cultured Mammalian Cells	409
3. Biochemical and Biophysical Methods to Study RNA Helicase	417
4. Methods Used to Study Virion-Associated RNA Helicase in Cultured Mammalian Cells	423
5. Concluding Remarks	430
Acknowledgments	431
References	431

20. Inhibitors of Translation Targeting Eukaryotic Translation Initiation Factor 4A	437
Regina Cencic, Gabriela Galicia-Vázquez, and Jerry Pelletier	
1. Introduction	438
2. Small Molecule Inhibitors of RNA Helicases	441
3. Small Molecule Inhibitors of eIF4A ATPase Activity	444
4. Conclusions	455
Acknowledgments	456
References	456
21. Identification and Analysis of Inhibitors Targeting the Hepatitis C Virus NS3 Helicase	463
Alicia M. Hanson, John J. Hernandez, William R. Shadrick, and David N. Frick	
1. Introduction	464
2. The Need for Additional HCV Drug Targets	465
3. Targeting the NS3 Helicase	466
4. HTS for HCV Helicase Inhibitors	467
5. Expression and Purification of NS3h	469
6. The Molecular Beacon-Based Helicase Assay (MBHA)	470
7. An RNA-Based Split Beacon Helicase Assay (SBHA)	477
8. Discussion	479
Acknowledgments	480
References	480
