Contributors

vii

1. miRNA, Development and Disease

1

Jeanne Amiel, Loïc de Pontual, Alexandra Henrion-Caude

1. Introduction	1
2. Biogenesis and Development	2
3. Conservation, Hox Genes, and miRNA Regulation	11
4. Expression, Developmental Switches and Phenotypic Modulators	13
5. miRNAs and Brain	15
6. miRNAs and Skeletal Development	17
7. miRNAs and Myogenesis	19
8. miRNAs and Target Mutations in Human Disease	21
9. Perspectives	23
Acknowledgments	26
References	27

2. Precision Editing of Large Animal Genomes

37

Wenfang (Spring) Tan, Daniel F. Carlson, Mark W. Walton,
Scott C. Fahrenkrug, Perry B. Hackett

1. Introduction	38
2. Precision Genetic Engineering	60
3. Future Directions—Applications of Precision Genetics in Animals	70
Acknowledgments	80
References	80

3. The Genetic Analysis of Functional Connectomics in *Drosophila*

99

Ian A. Meinertzhagen, Chi-Hon Lee

1. Introduction	100
2. Revealing the Structural Connectome	103
3. Assigning Functions to Structural Networks	116
4. Bridging Synaptophysiology to Structural Connectomics	129
5. Conclusions	134
Acknowledgments	136
References	136
