vii

1. Insights into Lignin Degradation and its Potential Industrial Applications	1
Ahmed M. Abdel-Hamid, Jose O. Solbiati, Isaac K. O. Cann	
1. Lignocellulosic Biomass	2
2. Chemical Structure of Lignin	3
3. Lignin-degrading Microorganisms	4
4. Biotechnological Applications of Ligninolytic Enzymes	17
5. Conclusion	20
Acknowledgments	20
References	21
2. Bacterial Volatiles and Diagnosis of Respiratory Infections	29
James E. Graham	
1. Introduction	29
2. Identification of Volatiles and VOCs	30
3. Bacterial Volatiles	32
4. Volatiles from Major Bacterial Respiratory Pathogens	34
5. Development of Breath Testing	37
6. Diagnosis of Respiratory Infection by Analysis of Volatiles	40
7. Standardization	45
8. The Future of Diagnosis by Breath Testing	46
Acknowledgments	47
References	47
3. Polymicrobial Multi-functional Approach for Enhancement of Crop Productivity	53
Chilekampalli A. Reddy, Ramu S. Saravanan	
1. Introduction	54
2. Nitrogen-fixing Rhizobacteria	57
3. Plant Growth-Promoting Microorganisms	66
4. Mycorrhizae	80
5. Microbial Inoculants	87
6. Conclusions	99
Acknowledgments	100
References	101

4. Recombinant Production of Spider Silk Proteins	115
Aniela Heidebrecht, Thomas Scheibel	
1. Introduction	116
2. Spiders and Spider Silk	117
3. Recombinant Production of Spider Silk Proteins	125
4. Conclusion and Outlook	142
Acknowledgments	144
References	144
5. Mechanisms of Immune Evasion in Leishmaniasis	155
Gaurav Gupta, Steve Oghumu, Abhay R. Satoskar	
1. Immunity to <i>Leishmania</i>	156
2. Mechanisms of Immune Evasion	160
Acknowledgments	172
References	172
Index	185
Contents of Previous Volumes	197
