Preface	xi
Acknowledgments	xiii
Scheduling and Interrelationships of Exercises	xv
1. History of Plant Cell Culture	1
<i>Trevor A. Thorpe</i>	
Introduction	1
The Early Years	2
The Era of Techniques Development	3
The Recent Past	5
Cell Behavior	6
Plant Modification and Improvement	7
Pathogen-Free Plants and Germplasm Storage	9
Clonal Propagation	9
Product Formation	9
The Present Era	10
2. Setup of a Tissue Culture Laboratory	23
Work Areas	24
Media Preparation/Culture Evaluation/Record-Keeping Area	24
Aseptic Transfer Area	24
Environmentally Controlled Culture Area	25
3. Media Components and Preparation	31
Inorganic Salts	32
Plant Growth Regulators	32
Vitamins	36
Carbohydrates	36
Hexitols	37
Gelling Agent	37
Amino Acids	38
Antibiotics	39
Natural Complexes	39
Media pH	40
Medium Preparation	40

4.	Explant Preparation	45
	Explant Age	46
	Season	46
	Explant Size	46
	Plant Quality	46
	Goal	46
	Genotype	48
	Aseptic Technique	48
	Aseptic Germination of Seeds	49
	Carrot, Sunflower, Broccoli, Cotton, or Any Seed of Choice	49
	Douglas Fir	50
5.	Contamination	53
	Explant	53
	Disinfecting Agents	54
	Explant Source	56
	Internal Microbial Contamination	56
	Explant Pretreatment to Control Microbial Contaminants	57
	Personnel	57
	Laminar Air Flow Hood	58
	Insects	58
	Control of Insect Contamination	58
	Media	59
	Instruments	60
	Room Air Handling System	61
6.	Callus Induction	63
	Callus Initiation	63
	Explant Preparation	65
	Culture	66
	Observations	66
	Data and Questions	66
	Explant Orientation	67
	Explant	67
	Observations	68
	Establishment of Competent Cereal Cell Cultures	69
	Explants	70
	Data and Questions	70
	Salt Selection <i>In Vitro</i>	70
	Explants	71
	Data and Questions	72
	Growth Curves	72
	Cotton	73
	Tobacco	74
	Cellular Variation from Callus Cultures	76

Explant	76
Data and Questions	76
7. Regeneration and Morphogenesis	81
Controlled Morphogenesis: Potato Tuberization	82
Explant	83
Data and Questions	84
Somatic Embryogenesis	84
Explant Preparation	86
Procedure	86
Data and Questions	86
Regeneration of Rice	87
Regeneration	87
Data and Questions	87
Dormancy Requirements of Explants	87
Explant Preparation	88
Questions	89
Primary Morphogenesis: Douglas Fir	89
Explant Preparation	89
Data and Questions	90
8. Woody Shrubs and Trees	93
<i>Brent H. McCown</i>	
Rhododendrons and Azaleas	95
Explants	97
Advanced Studies	97
Roses	97
Explant	98
Advanced Studies	98
Birch Trees	98
Explant	98
Advanced Studies	99
White Cedar (Arborvitae)	99
Explant	99
9. Haploid Plants from Anther Culture	103
Datura Anther Culture	105
Explant Preparation	105
Questions	106
African Violet	106
Explant Preparation	107
Observations	107
Root Tip Chromosome Squash Technique	107
Questions	108
Tobacco	108

Explant Preparation	108
Observations	109
Questions	109
Anther Squash Technique	109
10. Embryo Rescue	113
Sweet Corn Embryo Culture	114
Preparation and Culture of Corn Embryos	115
Questions	116
Crabapple and Pear	116
Explant Preparation	116
Observations	116
Questions	117
11. Meristem Culture for Virus-Free Plants	119
Isolation of the Shoot Apical Meristem	121
Explant Preparation	121
Questions	122
Establishing Virus- and Bacteria-Free Plants	122
Explant Preparation	122
Garlic Propagation from Bulb Scales	123
Explant Preparation	123
Data	123
12. In Vitro Propagation for Commercial Production of Ornamentals	127
Boston Fern	129
Stage I	130
Stage II	131
Stage III	132
Staghorn Fern	133
Stage I	134
Stage II	134
Stage III	135
Ficus	136
Stage I	136
Stage II	137
Stage III	137
Kalanchoe	137
Explant Preparation	138
Data and Questions	138
African Violet	139
Explant Preparation	139
Data and Questions	140
Endangered Species	140

Pitcher Plants	141
Cactus	141
Explant Preparation	142
13. Protoplast Isolation and Fusion	147
<i>Jungeun Kim Park, Sunghun Park and James E. Craven</i>	
Plant Protoplast Isolation and Fusion	148
Supplies	148
Protoplast Liberation	149
Protoplast Purification	150
Vital Staining	151
Protoplast Fusion	151
Yield Determination	151
Developing a Protoplast Isolation Protocol	152
14. Agrobacterium-Mediated Transformation of Plants	155
<i>Jungeun Kim Park, Sunghun Park, Qingyu Wu and Stuart Sprague</i>	
Petunia or Tobacco Leaf Disk	157
Sequence	157
Preculture	157
Explant Preparation	157
Cocultivation with <i>Agrobacterium</i>	158
Shoot Transformation and Elimination of <i>Agrobacterium</i>	158
Rooting and Pretesting for Transformed Shoots	159
Petunia Shoot Apex	160
Sequence	160
Seed Germination	160
Shoot Induction	161
Shoot Apex Transformation	161
Rooting	161
Tobacco Leaf Infiltration	162
Sequence	162
Grow <i>Agrobacterium</i>	162
Culture <i>Agrobacterium</i>	163
Harvest <i>Agrobacterium</i>	163
Infiltration Tobacco Leaves	163
Appendices	167
Index	183
