Contributors	xi
Preface	xvii
1. Imaging Fluorescently Labeled Complexes by Means of Multidimensional Correlative Light and Transmission Electron Microscopy: Practical Considerations	
<i>K. Kobayashi, D. Cheng, M. Huynh, K.R. Ratinac, P. Thordarson and F. Braet</i>	
Abstract	2
I. Introduction	2
II. Rationale	5
III. Methods	7
IV. Instrumentation and Materials	13
V. Discussion	15
Acknowledgments	18
References	18
2. Visualizing Live Dynamics and Ultrastructure of Intracellular Organelles with Preembedding Correlative Light-Electron Microscopy	
<i>Roman S. Polishchuk, Elena V. Polishchuk and Alberto Luini</i>	
Abstract	21
I. Introduction and Rationale	22
II. Materials	24
III. Methods	27
IV. Discussion	32
V. Summary	34
Acknowledgments	34
References	34
3. Correlative Fluorescence and Transmission Electron Microscopy in Tissues	
<i>Toshihiro Takizawa and John M. Robinson</i>	
Abstract	37
I. Introduction	38
II. Correlative Microscopy: Reporter Systems	39

III. Correlative Microscopy of Tissues	44
IV. Conclusions	50
References	52
 4. Correlative Light and Electron Microscopy in Parasite Research	
<i>Céline Loussert, Claire-Lise Forestier and Bruno M. Humbel</i>	
Abstract	59
I. Introduction	60
II. Rationale	61
III. Methods	63
IV. Experiments and Materials	65
V. Results and Discussion	67
VI. Summary	71
Acknowledgments	72
References	72
 5. Labeling of Ultrathin Resin Sections for Correlative Light and Electron Microscopy	
<i>Gunar Fabig, Susanne Kretschmar, Susanne Weiche, Dominic Eberle, Marius Ader and Thomas Kurth</i>	
Abstract	75
I. Introduction	76
II. Rationale	77
III. Methods	77
IV. Materials	88
V. Summary and Outlook	89
Acknowledgments	90
References	90
 6. 3D HDO-CLEM: Cellular Compartment Analysis by Correlative Light-Electron Microscopy on Cryosection	
<i>Katia Cortese, Giuseppe Vicidomini, Maria Cristina Gagliani, Patrizia Boccacci, Alberto Diaspro and Carlo Tacchetti</i>	
Abstract	96
I. Introduction	96
II. Materials	98
III. Methods	100
IV. Notes	110
Acknowledgments	114
References	114

7. Correlative Light and Electron Microscopy of GFP

Markus Grabenbauer

Abstract	117
I. Introduction	118
II. Rationale	124
III. Methods	125
IV. Materials	128
V. Discussion	129
Acknowledgments	135
References	135

8. Picking Faces out of a Crowd: Genetic Labels for Identification of Proteins in Correlated Light and Electron Microscopy Imaging

Mark H. Ellisman, Thomas J. Deerinck, Xiaokun Shu and Gina E. Sosinsky

Abstract	140
I. Introduction	140
II. The Crowded Cell and Spatiotemporal Proteomics	140
III. What EM Has to Offer	141
IV. Immunomarkers	142
V. Genetically Appended or Inserted Protein Tags	143
VI. Types of Genetic Tags Currently Available	144
VII. Future Directions and Challenges	152
Acknowledgments	153
References	153

9. Correlated Light Microscopy and Electron Microscopy

Klaas A. Sjollema, Ulrike Schnell, Jeroen Kuipers, Ruby Kalicharan and Ben N.G. Giepmans

Abstract	157
Abbreviations	158
I. Introduction	158
II. Correlated Light and Electron Microscopy: Using the Best of Two Worlds	159
III. ROIs: Search & Find Tools	161
IV. Our Approach: Virtual Reality Overlay During Preparation	165
V. Discussion and Conclusion	169
VI. Future Perspective	170
Acknowledgments	171
References	171

10. Capturing Endocytic Segregation Events with HPF-CLEM

Edward Brown, Jan van Weering, Thom Sharp, Judith Mantell, and Paul Verkade

Abstract	176
I. Introduction	176
II. Methods	181
III. Outlook	198
Acknowledgments	199
References	199

11. Targeted Ultramicrotomy: A Valuable Tool for Correlated Light and Electron Microscopy of Small Model Organisms

Irina Kolotuev, Daniel J. Bumbarger, Michel Labouesse and Yannick Schwab

Abstract	204
I. Introduction	204
II. Rationale	205
III. Methods	206
IV. Instrumentation and Materials	216
V. Discussion	219
Acknowledgments	221
References	221

12. Correlative Light and Electron Microscopy of Intermediate Stages of Meiotic Spindle Assembly in the Early *Caenorhabditis elegans* Embryo*Ina Woog, Silke White, Mandy Büchner, Martin Srayko and Thomas Müller-Reichert*

Abstract	224
I. Introduction	224
II. Methods	226
III. Instrumentation and Material	230
IV. Discussion	231
Acknowledgments	233
References	233

13. Precise, Correlated Fluorescence Microscopy and Electron Tomography of Lowicryl Sections Using Fluorescent Fiducial Markers

Wanda Kukulski, Martin Schorb, Sonja Welsch, Andrea Picco, Marko Kaksonen and John A.G. Briggs

Abstract	236
I. Introduction	236
II. Rationale	239

III. Methods	239
IV. Instrumentation and Materials	248
V. Discussion	250
References	255
14. Integrative Approaches for Cellular Cryo-electron Tomography: Correlative Imaging and Focused Ion Beam Micromachining	
<i>Alexander Rigort, Elizabeth Villa, Felix J.B. Bäuerlein, Benjamin D. Engel and Jürgen M. Plitzko</i>	
Abstract	259
I. Introduction	260
II. Rationale	262
III. Methods	263
IV. Instrumentation and Materials	275
V. Discussion and Outlook	277
Acknowledgments	278
References	279
15. Visualizing Proteins in Electron Micrographs at Nanometer Resolution	
<i>Shigeki Watanabe and Erik M. Jorgensen</i>	
Abstract	284
I. Introduction	284
II. Rationale	286
III. Methods	287
IV. Instrumentations and Materials	298
V. Discussion	301
VI. Perspective	304
Acknowledgments	304
References	304
16. Atmospheric Scanning Electron Microscope for Correlative Microscopy	
<i>Ian E.G. Morrison, Clare L. Dennison, Hidetoshi Nishiyama, Mitsuo Suga, Chikara Sato, Andrew Yarwood and Peter J. O'Toole</i>	
Abstract	307
I. Introduction: Atmospheric Scanning Electron Microscopy	308
II. Design of the JEOL JASM-6200	309
III. Sample Preparation	311
IV. Application Studies	315
V. Discussion	321
Acknowledgments	323
References	323

17. Bridging Microscopes: 3D Correlative Light and Scanning Electron Microscopy
of Complex Biological Structures

Miriam S. Lucas, Maja Günthert, Philippe Gasser, Falk Lucas and Roger Wepf

Abstract	326
I. Introduction	326
II. Rationale	330
III. Methods	331
IV. Materials and Instrumentation	348
V. Discussion	350
VI. Summary	352
Acknowledgments	353
References	353

18. Correlative Light and Volume Electron Microscopy: Using Focused Ion Beam
Scanning Electron Microscopy to Image Transient Events in Model Organisms

*Andrew J. Bushby, Giovanni Mariggi, Hannah E. J. Armer
and Lucy M. Collinson*

Abstract	358
I. Introduction	358
II. Rationale	359
III. Materials	360
IV. Methods	361
V. Discussion	378
VI. Summary	380
Acknowledgments	380
References	380
