

CONTENTS

Contributors	ix
Introduction	xi
1. Studying Biomacromolecules with Two-Dimensional Infrared Spectroscopy	1
Rachel E. Hill, Neil T. Hunt, and Jonathan D. Hirst	
1. Introduction	2
2. Proteins	8
3. Poly-Nucleic Acids	26
4. Conclusion	30
Acknowledgments	31
Glossary	31
References	32
2. NMR Studies on the Dynamics of Hydrogen Bonds and Ion Pairs Involving Lysine Side Chains of Proteins	37
Levani Zandarashvili, Alexandre Esadze, and Junji Iwahara	
1. Introduction	38
2. NMR of Lysine Side-Chain Amino Groups	39
3. NMR Methods to Investigate Internal Motions of Lysine NH_3^+ Groups	44
4. NMR Methods to Investigate Hydrogen-Bonding Dynamics of Lysine NH_3^+ Groups	54
5. Dynamics of Lysine Side Chains of Ubiquitin: Combined Use of NMR and Computation	56
6. Ion-Pair Dynamics Involving Lysine Side Chains and Their Role in Protein-DNA Association	66
7. Conclusions and Future Perspectives	74
Acknowledgment	75
References	76
3. Structure-Function Relationship of the Plant Photosynthetic Pigment-Protein Complex LHCII Studied with Molecular Spectroscopy Techniques	81
Wieslaw I. Gruszecki	
1. Photosynthetic Antenna Function	82
2. Spectroscopic Studies on Photoprotection in LHCII	86

3. Conclusions	91
Acknowledgments	92
References	92
4. Combined Use of Optical Spectroscopy and Computational Methods to Study the Binding and the Photoinduced Conformational Modification of Proteins When NMR and X-Ray Structural Determinations Are Not an Option	95
Lorenzo Brancalion	
1. Introduction	96
2. Photoactive Ligands	98
3. Protein Involvement	98
4. Nature-Mimicking Approach	100
5. Challenge of Artificial Approaches: Reversibility	102
6. Challenge of Artificial Approaches: Location of the Photoactive Ligand in the Protein	103
7. Optical Spectroscopy Approach	105
8. Computational Methods for Electronic Optical Spectroscopy	113
9. Combination of Optical Spectroscopy and Computational Simulations	117
10. Resonance Raman Spectroscopy	117
11. Docking Simulations	123
12. Density Functional Theory	129
13. Application to the Binding of TSPP to Lactoglobulin	133
References	145
5. Enzyme Active Site Interactions by Raman/FTIR, NMR, and <i>Ab Initio</i> Calculations	153
Hua Deng	
1. Introduction	154
2. Relate Spectra to Structures and Thermodynamics by Empirical Correlations	155
3. Active Site Structures by Vibrational Spectroscopy and <i>Ab Initio</i> Analysis	157
4. Active Site Interactions by NMR and <i>Ab Initio</i> Calculations	175
5. Conclusion	178
Acknowledgments	178
References	178
6. Protein and Water Confined in Nanometer-Scale Reverse Micelles Studied by Near Infrared, Terahertz, and Ultrafast Visible Spectroscopies	183
Hiroshi Murakami	
1. Introduction	184
2. Determination of the Structural Parameters of PCR Micelles	186

3. THz Spectroscopy of PCR Micellar Solution	194
4. Ultrafast Internal Dynamics of PCR Micelles Studied by the use of a Molecule Probe	203
5. Concluding Remark	207
Acknowledgments	207
References	208
7. Structure and Orientation of Interfacial Proteins Determined by Sum Frequency Generation Vibrational Spectroscopy: Method and Application	213
Shuji Ye, Feng Wei, Hongchun Li, Kangzhen Tian, and Yi Luo	
1. Introduction	214
2. Theoretical Background of SFG-VS	217
3. Orientation Determination of Interfacial Protein Structures	219
4. Recent Progresses on the Determination of Protein Molecular Structure and Orientation at Different Interfaces	238
5. Summary	248
Acknowledgments	249
Appendix A: Euler Transformation Between Different Coordinate Systems	249
Appendix B: Macroscopic (x, y, z) Coordinates of Different Secondary Structures	250
Appendix C: The Full Name of Lipid Molecules	251
References	251
8. X-Ray Absorption Spectroscopy: A Tool to Investigate the Local Structure of Metal-Based Anticancer Compounds <i>In Vivo</i>	257
Alfred A. Hummer and Annette Rompel	
1. Introduction	258
2. Physical Principles and Experimental Design	259
3. Data reduction and analysis	267
4. The Use of XANES and EXAFS Analysis in Biochemical, Biomedical, and Bioinorganic Chemistry	272
5. Advantages and Limitations of XAS	295
6. Perspectives	299
7. Acknowledgments	300
References	300
Author Index	307
Subject Index	327
