

CONTENTS

<i>Contributors</i>	ix
<i>Preface</i>	xi
1. Application of Cutting-Edge Proteomics Technologies for Elucidating Host-Bacteria Interactions	1
Bernardo A. Petriz and Octavio Luiz Franco	
1. Introduction	2
2. Classical Proteomics Strategies for Biomedical Research in General	2
3. Gel-Free Methods	5
4. New Proteomic Methods in Looking for Bacterial Pathogens	9
5. Proteomic Advances in Looking for Host Organisms	13
6. Prospects	17
References	18
2. Phosphoproteomic Techniques and Applications	25
Ed Dudley and A. Elizabeth Bond	
1. Introduction	25
2. Phosphoproteomic Methodologies	32
3. Applications of Phosphoproteomics in Biomedicine	45
4. Discussion	59
References	60
3. Recent Advances in Mass Spectrometry-Based Glycoproteomics	71
Dustin C. Frost and Lingjun Li	
1. Introduction	72
2. Glycoproteomic Profiling by MS	75
3. MS-Based Glycoproteomics in Disease Research	99
4. Concluding Remarks	106
Acknowledgments	107
References	107
4. Proteomics and Proteogenomics Approaches for Oral Diseases	125
Nicola Luigi Bragazzi, Eugenia Pechkova, and Claudio Nicolini	
1. Introduction	126
2. An Integrated Proteogenomics Protocol for Personalized Dentistry	126

3. Oral Diseases	145
4. Concluding Remarks	151
References	151
5. Advances in Nanocrystallography as a Proteomic Tool	163
Eugenia Pechkova, Nicola Luigi Bragazzi, and Claudio Nicolini	
1. Introduction	164
2. Langmuir-Blodgett (LB)-Based Crystallization	166
3. Comparison of LB-Based Crystallization with Other Techniques	168
4. Fourier Transform Infrared (FTIR) Spectroscopy for Investigating LB-Films	170
5. Raman Spectroscopy	171
6. Laser-Induced Microdissection and Microfragmentation	172
7. Micrograzing-Incidence X-Ray Scattering Angle (μ -GISAXS)	172
8. <i>In Silico</i> Simulations	176
9. Bioinformatics	177
10. Molecular Dynamics	178
11. Clinically Relevant Proteins	180
12. Conclusions	184
References	185
6. Modern Mass Spectrometry-Based Structural Proteomics	193
Evgeniy V. Petrotchenko and Christoph H. Borchers	
1. Introduction	194
2. The Concept of Structural Proteomics	194
3. Limited Proteolysis	195
4. Surface Modification	196
5. Hydrogen-Deuterium Exchange	200
6. Cross-linking	201
7. Additional Mass Spectrometric Techniques for the Protein Structure Analysis	207
8. Combination of Multiple Structural Proteomics Techniques	207
9. Use of Experimental Structural Proteomics Constraints in Protein Structure Modeling	209
10. Future Directions	210
11. Conclusions	211
Acknowledgment	211
References	211

7. Organelle Proteomics of Embryonic Stem Cells	215
Faezeh Shekari, Hossein Baharvand, and Ghasem Hosseini Salekdeh	
1. Introduction	215
2. Organelle Proteome Analysis of ESC	219
3. Subcellular Fractionation: Current Approaches and Challenges	223
4. Organelle Proteomics Databases and Tools	225
5. Concluding Remarks	226
References	227
8. Screening of Protein-Protein and Protein-DNA Interactions Using Microarrays: Applications in Biomedicine	231
Juan Casado-Vela, Manuel Fuentes, and José Manuel Franco-Zorrilla	
1. Introduction	232
2. Protein Arrays	237
3. Protein-Binding DNA Arrays and Their Application to Address the Study of DNA-Binding Proteins	254
4. Databases and Web Resources for PPIs and for PDIs	260
5. Conclusions and Future Perspectives	269
Acknowledgments	270
References	271
9. Application of Proteomics in Diagnosis of ADHD, Schizophrenia, Major Depression, and Suicidal Behavior	283
Khaled Alawam	
1. Introduction	284
2. Analytical Approaches Applied	286
3. Analytical Techniques	288
4. Biomarkers	291
5. Depression	292
6. Suicidal Behavior	297
7. Schizophrenia	302
8. Attention Deficit/Hyperactivity Disorder	305
9. Concluding Remarks	308
References	309
<i>Author Index</i>	317
<i>Subject Index</i>	359
