

Contents

Contributors xiii

Section I. Foundations

1. Ingenious Ideas: The History of Behavioral Ecology 3
Tim R. Birkhead and Pat Monaghan
2. Adaptation 16
Charles W. Fox and David F. Westneat
Box 2.1. Optimality Models 26
Steven Hecht Orzack
3. Behavioral Concepts of Selection 32
Barry Sinervo and Ryan Calsbeek
4. What Is Fitness, and How Do We Measure It? 46
John Hunt and David Hodgson
5. The Genetic Basis of Behavior 71
Kerry L. Shaw and Chris Wiley
Box 5.1. A Brief Introduction to Quantitative Genetics 75
Jason B. Wolf and Allen J. Moore
Box 5.2. Diversity of Sex-Determining Mechanisms 81
Daniel A. Warner and Fredric J. Janzen
6. Behavior as Phenotypic Plasticity 90
Cameron K. Ghalambor, Lisa M. Angeloni, and Scott P. Carroll
Box 6.1. Contrasting Quantitative Genetic Models for the Evolution of Plasticity 92
Box 6.2. Contrasting Statistical Methods for Studying Phenotypic Plasticity 96

7. Evolution of Behavior: Phylogeny and the Origin of Present-Day Diversity 108
Terry J. Ord and Emilia P. Martins
 Box 7.1. Comparative Methods 112

Section II. Decision Making

8. Decision Theory 131
Ronald Ydenberg
 Box 8.1. A DSV Model of Clam Life History Decisions 140
9. Information Use and Sensory Ecology 148
Johanna Mappes and Martin Stevens
 Box 9.1. How Sensory Systems Work: Vision as an Example 151
10. Information Processing: The Ecology and Evolution of Cognitive Abilities 162
Susan D. Healy and Candy Rowe
 Box 10.1. Testing Cognition in the Field 163

Section III. Ecology of Behavior

11. Foraging Theory 177
Ian M. Hamilton
 Box 11.1. Allocating Eggs among Multiple Hosts by Parasitic Insects 180
Frank J. Messina
12. Managing Risk: The Perils of Uncertainty 194
Sasha R. X. Dall
 Box 12.1. Fitness Consequences and Attitudes toward Risk 197
 Box 12.2. The Asset Protection Principle 199
13. Predation Risk and Behavioral Life History 207
Peter Nonacs and Daniel T. Blumstein

Section IV. Social Behavior

14. Interacting Phenotypes and Indirect Genetic Effects 225
Jason B. Wolf and Allen J. Moore
 Box 14.1. Social Selection 226
 Box 14.2. An Interacting Phenotypes Perspective on Kin Selection 233
 Box 14.3. Social Effects and the Response to Group Selection 241
15. Contest Behavior 246
Mark Briffa and Lynne U. Sneddon
 Box 15.1. The Hawk-Dove Game and Evolutionary Stable Strategies 248

16. Signaling 266
Magnus Enquist, Peter L. Hurd, and Stefano Ghirlanda
Box 16.1. Game Trees 269
17. Behavior in Groups 285
Ryan L. Earley and Lee Alan Dugatkin
Box 17.1. Mechanisms of Dominance Hierarchy Formation 295
Box 17.2. Reproductive Skew 300
Peter Nonacs
18. Altruism and Cooperation 308
Andy Gardner, Ashleigh S. Griffin, and Stuart A. West
Box 18.1. Use and Abuse of Altruism 310
Box 18.2. Hamilton's Rule 312
Box 18.3. How to Analyze a Kin Selection Model 314
19. Evolution of Complex Societies 327
David C. Queller and Joan E. Strassmann
Box 19.1. Haplodiploid Pedigree and Relatedness 330

Section V. Reproductive Behavior

20. Sexual Selection 343
Michael D. Jennions and Hanna Kokko
Box 20.1. Anisogamy and the Parasitic Nature of the Origins of Sperm 346
Box 20.2. Sex Allocation Theory and the Fisher Condition 351
21. Sexual Selection in External Fertilizers 365
Don R. Levitan
22. Postcopulatory Sexual Selection 379
Scott Pitnick and David J. Hosken
Box 22.1. Multiple Mating by Females 380
Box 22.2. Ejaculate Expenditure and Allocation Models 383
23. Sexual Conflict 400
Claudia Fricke, Amanda Bretman, and Tracey Chapman
Box 23.1. Key Lessons from Sexual Conflict Theory 401
Box 23.2. Sexual Conflict as Social Selection: Insights from Selection Theory 403
Box 23.3. Sexual Conflict Can Fuel Evolutionary Change Leading to Reproductive Isolation 405
24. Mate Choice 416
Robert C. Brooks and Simon C. Griffith
Box 24.1. Sensory Bias 424
Rebecca C. Fuller
25. Alternative Mating Strategies 434
Stephen M. Shuster
