List of boxes	XVI
List of acronyms	XVIII
Chapter 1 Introduction	1
1.1 Who is this book for?	1
1.2 Sources of information	2
1.3 What do we mean by 'zoo'?	3
1.4 The scope of the book	4
1.5 The naming of names	13
1.6 Finally ... abbreviations	14
Chapter 2 History and philosophy of zoos	15
2.1 What is a zoo?	16
2.2 Menageries ancient and royal	18
2.3 The development of the modern zoo	20
2.4 The history of aquariums	40
2.5 Zoos today	42
2.6 The philosophy and ethics of zoos	45
Chapter 3 Regulatory framework	54
3.1 The law and legislative processes: a brief introduction	54
3.2 The international framework: global conventions, agreements, and regulations	57
3.3 Zoo legislation within the European Union	62
3.4 The regulatory framework for zoos in the UK: legislation and guidelines	64
3.5 Zoo legislation outside Europe	73
3.6 Zoo associations: from BIAZA and EAZA, to AZA, ARAZPA, and WAZA ..	74
Chapter 4 Behaviour	82
4.1 General principles	82
4.2 Animal behaviour in the zoo	98
4.3 Behavioural response to the zoo environment	100
4.4 Abnormal behaviours	114
4.5 Comparison with the wild	121
Chapter 5 Animal identification and record keeping	129
5.1 The importance of knowing your animals	129
5.2 What species? Nomenclature and taxonomy	131
5.3 Identifying individual animals	134
5.4 Temporary artificial methods of individual identification	146

5.5	Permanent artificial methods of individual identification	150
5.6	Record keeping: what information could, or should, be recorded?	153
5.7	Zoo record-keeping systems	160
Chapter 6	Housing and husbandry	168
6.1	The needs of many	168
6.2	Advances in enclosure design	181
6.3	Husbandry from birth to death	202
6.4	Studying how housing and husbandry affect captive animals	212
6.5	Guidelines and housing and husbandry recommendations	216
Chapter 7	Animal welfare	219
7.1	What is 'animal welfare'?	219
7.2	Animal welfare science	223
7.3	What can compromise zoo animal welfare?	233
7.4	Indices used to evaluate zoo animal welfare	243
7.5	Meeting the needs of zoo animals	252
Chapter 8	Environmental enrichment	259
8.1	What is 'enrichment'?	261
8.2	The evolution of enrichment as a concept	261
8.3	The aims and goals of enrichment	263
8.4	Types of enrichment and their function	267
8.5	Enrichment evaluation	280
8.6	What makes enrichment effective?	281
8.7	The benefits of environmental enrichment	288
Chapter 9	Captive breeding	292
9.1	Reproductive biology	293
9.2	Issues and constraints on reproduction in captivity	306
9.3	Monitoring the reproductive status of animals in captivity	311
9.4	Providing a helping hand: assisted reproductive technologies	316
9.5	Rearing: facilitating the successful survival of offspring	319
9.6	Manipulating exotic animal reproductive output	325
9.7	Working towards self-sustaining populations in captivity	330
Chapter 10	Conservation	345
10.1	What is 'conservation' and why is it necessary?	345
10.2	The role of zoos in the conservation of biodiversity	352
10.3	Zoos as arks	354
10.4	Reintroduction	362
10.5	Other aspects of zoo conservation work	367
10.6	How good are zoos at conserving biodiversity?	375
10.7	Conservation and zoos: looking to the future	376

Chapter 11 Health	379
11.1 What is 'good health'?	379
11.2 Guidelines and legislation on the health of zoo animals	383
11.3 The role of zoo staff in zoo animal health care	387
11.4 Preventive medicine	392
11.5 Diseases of concern in zoo animals	404
11.6 The diagnosis and treatment of disease in zoo animals	419
Chapter 12 Feeding and nutrition	427
12.1 Feeding ecology	428
12.2 Basic nutritional theory	438
12.3 Guidelines and legislation on feeding zoo animals	444
12.4 Working out an animal's dietary requirements	448
12.5 The supply of food	453
12.6 Food storage and preparation	458
12.7 Food presentation	460
12.8 Nutritional problems	467
Chapter 13 Human-animal interactions	475
13.1 Zoo visitors: what do we know about them?	475
13.2 Education and awareness raising	480
13.3 Humans in the zoo: how do they affect the animals?	486
13.4 Training	499
Chapter 14 Research	505
14.1 Why is zoo research important?	505
14.2 What is 'research'?	507
14.3 What is 'zoo research'?	508
14.4 Some methodological difficulties in zoo research	515
14.5 Problems in the analysis of data	520
14.6 Multi-zoo studies	524
14.7 Disseminating the results of zoo research	526
14.8 What zoo research still needs to be done?	527
Chapter 15 We hope you enjoyed your visit	531
15.1 Evaluation	532
15.2 The shape of the collection	534
15.3 Sustainability	535
15.4 Careers in zoos	536
Glossary	542
References	555
Index	614

List of boxes

Box 2.1	Jumbo the elephant	24
Box 2.2	The last passenger pigeon	28
Box 2.3	Willie B., the story of a lowland gorilla	30
Box 2.4	Zoo architecture and protected buildings	33
Box 2.5	Pioneering zoo directors and curators	35
Box 2.6	Ecosystem exhibits	38
Box 2.7	What do we mean by 'ethics'?	45
Box 2.8	Utilitarianism, holism, and animal rights	47
Box 3.1	A brief guide to the European Union	56
Box 3.2	Devolved zoo legislation within the UK	56
Box 3.3	How does zoo licensing work in the UK?	65
Box 3.4	Research work requiring a Home Office licence	73
Box 4.1	Tinbergen's 'Four Whys'	83
Box 4.2	Individual differences in behaviour: the influence of personality	93
Box 4.3	Effects of conspecifics: flamingo breeding displays	107
Box 4.4	Stereotypy and Carnivores: why are some species worse than others?	118
Box 4.5	Comparing behaviour in the zoo with behaviour in the wild	122
Box 5.1	The naming of animals: who is right?	133
Box 5.2	Standard body measurements for animals	155
Box 5.3	DNA: from sampling to interpretation	159
Box 6.1	Space versus complexity	185
Box 6.2	Post-occupancy evaluation	214
Box 7.1	Pain	226
Box 7.2	Stress	231
Box 7.3	The use of cortisol as a measure of animal welfare	246
Box 8.1	Is training enrichment?	278
Box 8.2	Using enrichment timetables can make provisioning practical	283
Box 8.3	Enrichment is not only for primates	289
Box 9.1	Sex determination and differences between male and female reproductive morphology	299
Box 9.2	Genetic terms explained	309
Box 9.3	The frozen zoo	319
Box 9.4	Hand-rearing	326
Box 9.5	Captive management or captive breeding	330
Box 9.6	Surplus animals	340
Box 9.7	The captive breeding of elephants	341
Box 10.1	Small is beautiful: saving the <i>Partula</i> snails	348
Box 10.2	Saved from extinction: accident or planning?	355
Box 10.3	Saving the amphibians from oblivion	357
Box 10.4	The use of mitochondrial DNA in conservation biology	361

Box 10.5	EAZA campaigns	371
Box 11.1	Body condition scoring	382
Box 11.2	Dentistry for zoo animals	392
Box 11.3	How do vaccines work?	396
Box 11.4	The McMaster flotation technique for measuring parasite burden ..	399
Box 11.5	The anaesthesia of giraffes	422
Box 11.6	A short note about Immobilon®	423
Box 12.1	The plants fight back	437
Box 12.2	Feeding live prey	445
Box 12.3	National Research Council publications on nutrient requirements ..	447
Box 12.4	The history of zoo animal nutrition	449
Box 12.5	Why do keepers chop up food for zoo animals?	461
Box 12.6	Carcass feeding: what to feed carnivores instead of live prey	464
Box 13.1	Visitor behaviours and preferences in the zoo: the view from Asia ..	478
Box 13.2	What can happen when the keeper–animal relationship goes wrong	497
Box 13.3	What can be achieved through training?	501
Box 13.4	Cautionary notes on implementing training in zoos	502
Box 14.1	Are zoo animal populations 'abnormal'?	513
Box 14.2	The spread of participation index	518
Box 14.3	How do we sample behaviour?	519
Box 14.4	Zoo journals	527
Box 14.5	Managing and coordinating zoo research	528
