

Contents

<i>Detailed Contents</i>	vii
<i>Boxes outlining the methods for the statistical tests included in this book</i>	xvii

Section 1 Planning an experiment

1 Where do I begin?	3
2 Planning your experiment	19
3 Questionnaires, focus groups, and interviews	54
4 Research, the law, and you	65

Section 2 Handling your data

5 What to do with raw data	111
6 An introduction to hypothesis testing	147
7 Hypothesis testing: do my data fit an expected ratio?	172
8 Hypothesis testing: associations and relationships	209
9 Hypothesis testing: do my samples come from the same population? Parametric data	255
10 Hypothesis testing: do my samples come from the same population? Non-parametric data	321

Section 3 Reporting your results

11 Reporting your research	361
----------------------------	-----

Appendix a.	How to choose a research project	397
Appendix b.	Planning your experiment	401
Appendix c.	Which statistical test should I choose?	409
Appendix d.	Tables of critical values for statistical tests	416
Appendix e.	Maths and statistics	434
