
Contents

List of contributors	ix
Section 1 Introduction	
1 Introduction	3
<i>Anders Pape Møller, Wolfgang Fiedler, and Peter Berthold</i>	
Section 2 Climate	
2 Climate change	9
<i>James W. Hurrell and Kevin E. Trenberth</i>	
Section 3 Methods for studying climate change effects	
3 Long-term time series of ornithological data	33
<i>Anders Pape Møller and Wolfgang Fiedler</i>	
4 Capture-mark-recapture models	39
<i>Vladimir Grosbois and Olivier Gimenez</i>	
5 Using animal models to infer and predict the evolutionary consequences of climate change	47
<i>Erik Postma</i>	
6 Time-series analyses	57
<i>Jan Lindström and Mads C. Forchhammer</i>	
7 Population analyses	67
<i>Bernt-Erik Sæther and Steinar Engen</i>	
8 Habitat suitability modelling	77
<i>Wilfried Thuiller and Tamara Münkemüller</i>	
Section 4 Biological consequences of climate change	
9 Changes in migration	89
<i>Esa Lehikoinen and Tim H. Sparks</i>	
10 Effects of climate change on timing of breeding and reproductive success in birds	113
<i>Peter O. Dunn and David W. Winkler</i>	

11 Food availability, mistiming, and climatic change	129
<i>Christiaan Both</i>	
12 Genetic perspectives on the evolutionary consequences of climate change in birds	149
<i>Ben C. Sheldon</i>	
13 Sexual selection and climate change	169
<i>Claire N. Spottiswoode and Nicola Saino</i>	
14 Population consequences of climate change	191
<i>Bernt-Erik Sæther and Steinar Engen</i>	
15 Host–parasite interactions and climate change	213
<i>Santiago Merino and Anders Pape Møller</i>	
16 Predator–prey interactions and climate change	227
<i>Vincent Bretagnolle and Hanneke Gillis</i>	
17 Range margins, climate change, and ecology	249
<i>Jon E. Brommer and Anders Pape Møller</i>	
18 Bird communities and climate change	275
<i>Lluís Brotons and Frédéric Jiguet</i>	
19 Conservation consequences of climate change for birds	295
<i>Abraham J. Miller-Rushing, Richard B. Primack, and Cagan H. Sekercioglu</i>	
20 Conclusions	311
<i>Anders Pape Møller, Wolfgang Fiedler, and Peter Berthold</i>	
Index	315
