
Contents

Abbreviations	ix
1. An introduction to ice environments and their biology	1
1.1 Introduction	1
1.2 Introduction to functional dynamics and the organisms	2
1.2.1 Community structure and function	2
1.2.2 Organisms	6
1.3 The cryosphere: past and present	8
1.3.1 The last glacial maximum	8
1.3.2 Contemporary fluctuations of glaciers and ice sheets	8
1.3.3 Snowball Earth	9
1.4 Sea ice	12
1.4.1 Nature of sea ice	12
1.4.2 Sea ice communities	14
1.5 Lake ice	16
1.6 Glaciers	19
1.6.1 Ice mass balance zones in glacial ecosystems	19
1.6.2 Hydrological zonation in surface ecosystems	21
1.6.3 Supraglacial lakes	23
1.6.4 Water distribution in subsurface ecosystems	24
1.6.5 Water in subglacial habitats	25
1.6.6 Overview: broad structure and characteristics of glacial ecosystems	27
1.6.7 Life on glaciers	30
1.7 Snow	31
1.7.1 Physical and chemical characteristics	31
1.7.2 Biological activity in snow	35
2. Snow	37
2.1 Snow as an environment	37
2.2 Life on and in snow	37
2.2.1 Snow algae	37
2.2.2 Bacteria in snow	39
2.3 Impact of snow on environments it covers seasonally	41
2.3.1 Activity under the snow	41
2.3.2 Impact of the release of accumulated nutrients in the snow pack at spring melt	44
2.3.3 Variations in snow depth	46

3. Ice surface environments	47
3.1 Ice shelves	47
3.1.1 Introduction	47
3.1.2 Biology of ice shelf lakes	48
3.2 Glaciers and ice sheets	52
3.2.1 Supraglacial habitats	52
3.2.2 Spatial variations in the biota in supraglacial habitats	56
3.2.3 Cryoconite	57
3.2.4 Carbon cycling and biological production	64
3.2.5 Other debris habitats, including the ice margin	71
4. Sea and lake ice	73
4.1 Sea ice	73
4.1.1 Introduction	73
4.1.2 Adaptations	77
4.1.3 Community structure and production	78
4.2 Lake ice	92
4.2.1 Introduction	92
4.2.2 Community structure and production	95
5. Subglacial environments	101
5.1 Introduction	101
5.2 Biology of subglacial environments	104
5.2.1 Wet-based glaciers	105
5.2.2 Blood Falls	107
5.3 Life in glacial ice	110
5.4 Subglacial lakes	111
5.5 Lake Vida	117
6. Astrobiology	121
6.1 Introduction	121
6.2 Extraterrestrial cryospheric environments	122
6.2.1 Mars	122
6.2.2 Europa: a Jovian moon	125
6.2.3 Enceladus: a small Saturnian moon	126
6.2.4 Titan: a large Saturnian moon	127
6.3 Weaknesses of terrestrial analogues for extraterrestrial cryospheric environments	128
7. Future directions	129
7.1 Introduction	129
7.2 Priority field sites for future research	130
7.3 Remote sensing development	133
7.4 Sensor technology	135
7.5 Modelling	139
7.6 Molecular biology	140
7.7 Elucidating the evolution of extremophile communities	141
Glossary	143
References	149
Index	173
