

Contents

Preface xi

1 In the Beginning . . . 1

- 1.1 Approaching the Study of Life 1
- 1.2 Billions and Billions of Creatures . . . 5
- 1.3 . . . All Alike! 11
- 1.4 Where To from Here 16

2 Evolution 19

- 2.1 Inheritance 23
- 2.2 Variation 28
- 2.3 Selection 34
- 2.4 A Brief History of Life on Earth 41
- 2.5 Evolution and Life 47
- 2.6 Suggested Readings 47

3 A Little Bit of Chemistry 49

- 3.1 Matter 49
 - 3.1.1 Atoms 50
 - 3.1.2 Molecules and Bonds 54
- 3.2 Reactions 58
- 3.3 Organic Chemistry 62
- 3.4 Energy and Thermodynamics 66
- 3.5 Chemistry and Life 70
- 3.6 Suggested Readings 71

4 The Structure and Function of Bacteria 73

- 4.1 Membranes and Boundaries 75
- 4.2 Cytoplasm and Metabolism 77
- 4.3 Chromosomes and Genomes 82
- 4.4 Bacterial Life 86
- 4.5 Suggested Readings 88

5	Biological Macromolecules	91
5.1	Protein	92
5.1.1	Protein Structure	95
5.1.2	Protein Evolution	102
5.1.3	Protein Function	103
5.2	Nucleic Acids	104
5.2.1	DNA	104
5.2.2	RNA	107
5.2.3	DNA Evolution	111
5.3	Macromolecules and Life	116
5.4	Suggested Readings	117
6	Eukaryotes	119
6.1	Eukaryotic Gene Structure and Transcription	120
6.2	Components of the Eukaryotic Cell	124
6.2.1	The Nucleus	124
6.2.2	The Endoplasmic Reticulum and Golgi Apparatus	126
6.2.3	The Mitochondrion	126
6.2.4	The Chloroplast	130
6.2.5	Other Plastids	133
6.2.6	The Proteasome, the Lysosome, and the Peroxisome	133
6.3	Lifestyles of the Single-Celled Eukaryote	134
6.4	Suggested Readings	137
7	Multicellular Organisms and Development	139
7.1	The Origin of Multicellular Organisms	139
7.2	Development	145
7.2.1	Molecular Maps	148
7.2.2	Cell-to-Cell Signaling	151
7.2.3	Cell Motion	153
7.2.4	Differentiation	156
7.2.5	Organogenesis	158
7.3	Growth	159
7.4	Multicellular Life and Humanity	162
7.5	Suggested Readings	163
8	Anatomy, Physiology, and Systems Biology	165
8.1	Homeostasis	165
8.2	Tissues	168
8.3	Organ Systems	175
8.3.1	The Cardiovascular System	175
8.3.2	The Immune System	178
8.3.3	The Nervous System	181
8.4	Systems Biology	186
8.5	Suggested Readings	187

9	Disease and Its Treatment	189
9.1	General Principles of Pathology and Therapeutics	190
9.1.1	Cellular Stress and Responses to It	190
9.1.2	Cell Injury	192
9.1.3	Cell Death	193
9.1.4	General Principles of Therapeutics	194
9.2	Healing	196
9.3	Genetics and Disease	198
9.4	Infectious Disease and Antibiotics	200
9.5	Cardiovascular Disease	201
9.6	Cancer	205
9.7	Drug Discovery	208
9.8	Molecular Medicine	211
9.9	Suggested Readings	212
10	Molecular Biotechnology	215
10.1	Molecular Instrumentation	215
10.1.1	Measurements of Mass and Charge	216
10.1.2	Macromolecular Structure Determination	221
10.1.3	Assays of Molecular Activity	223
10.1.4	Distribution of Molecules Through Space and Time	224
10.1.5	Nucleic Acid Instrumentation	225
10.2	Model Organisms: Germs, Worms, Weeds, Bugs, and Rodents	230
10.2.1	<i>Escherichia coli</i>	232
10.2.2	<i>Saccharomyces cerevisiae</i>	232
10.2.3	<i>Arabidopsis thaliana</i>	233
10.2.4	<i>Caenorhabditis elegans</i>	233
10.2.5	<i>Drosophila melanogaster</i>	234
10.2.6	<i>Danio rerio</i>	234
10.2.7	<i>Mus musculus</i>	235
10.3	Genetic Engineering	235
10.4	Molecular Biotechnology and Human Life	238
10.5	Suggested Readings	239
11	Molecular Bioethics	241
11.1	Molecular Biology and Medicine	242
11.2	Molecular Biology and Agriculture	245
11.3	Molecular Biology and Society	246
11.4	Regulation and Control of Molecular Biotechnology	249
11.5	Learning about Life	250
11.6	Suggested Readings	251
	Glossary	253
	Index	285
