

CONTENTS

Preface	xiv
1. Ca^{2+} Chemistry, Storage and Transport in Biologic Systems:	
An Overview	1
<i>Tashi G. Kinjo and Paul P.M. Schnetkamp</i>	
Why Ca^{2+} : Unique Chemical and Physical Features	1
Ca^{2+} Evolution: A Rejection from Cytoplasm	2
Ca^{2+} Signaling and Storage: The Endoplasmic Reticulum	2
The Role of Ca^{2+} within the ER	3
ER Heterogeneity: Ca^{2+} Tunneling Versus Ca^{2+} Compartmentalization	3
Ca^{2+} Signaling and Storage: Mitochondria	4
Mitochondrial Ca^{2+} : Uptake Function and Effects	4
Ca^{2+} Buffering: Cytosolic and Luminal	5
Channels that Lead to an Increase in Cytosolic Ca^{2+}	5
Intracellular Ca^{2+} Release Channels	6
Plasma Membrane Ca^{2+} Channels	7
Cyclic Nucleotide-Gated Channels	7
P2X Receptors	7
SOCE and the TRP Gene Family	8
Mechanisms of Store-Operated Ca^{2+} Entry	8
Mechanisms to Lower Cytosolic Ca^{2+}	8
PMCA Gene Family	9
SERCA Gene Family	9
NCX Gene Family	9
NCKX Gene Family	9
2. Monitoring Intracellular Ca^{2+} in Brain Slices	
with Fluorescent Indicators	12
<i>Sean J. Mulligan and Brian A. MacVicar</i>	
Ca^{2+} Sensitive Fluorescent Chemical Indicators	12
Single-Wavelength Probes	13
Dual-Wavelength Ratiometric Probes	15
Ca^{2+} Binding Affinity	16
Ca^{2+} Indicator Form	18
Dextran Conjugates	18
AM-Esters	20
Quantitative Measurement of $[\text{Ca}^{2+}]_i$	21
3. A Brief History of Calcium Channel Discovery	27
<i>Richard W. Tsien and Curtis F. Barrett</i>	
The Key Role of Ca^{2+} Channels in Cellular Signaling	27
The Winding Road of Calcium Channel Discovery	30
The Diversity of Native Ca^{2+} Channel Currents	36

4. Biochemical Studies of Voltage-Gated Ca^{2+} Channels	48
<i>William A. Catterall</i>	
Purification and Biochemical Characterization of Skeletal Muscle Ca^{2+} Channels	48
Biochemical Properties of Other Ca_v1 Channels	53
Biochemical Properties of the Ca_v2 Family of Ca^{2+} Channels	54
Interactions of Ca^{2+} Channels with Intracellular Regulatory Proteins	55
5. Molecular Properties of Voltage-Gated Calcium Channels	61
<i>Terrance P. Snutch, Jean Peloquin, Eleanor Mathews and John E. McRory</i>	
Native Voltage-Gated Ca^{2+} Channels	61
High Voltage-Activated Ca^{2+} Channels	61
Cloned Calcium Channels	66
Low Voltage-Activated (T-Type) Channels	77
Auxiliary Ca^{2+} Channel Subunits	79
6. Role of β Subunits in Voltage-Gated Calcium Channel Functions	95
<i>Thierry Cens, Sophie Restituito, Matthieu Rousset and Pierre Charnet</i>	
Isolation, Characterization and Cloning	95
Association with Ca^{2+} Channels	97
Role in Channel Expression and Targeting	98
Role in Channel Properties: Activation, Inactivation and Facilitation	99
Role in Channel Regulation by Heterotrimeric G-Proteins	103
7. Distribution and Targeting Mechanisms of Voltage Activated Ca^{2+} Channels	113
<i>Stefan Herlitze and Melanie D. Mark</i>	
Distribution of Ca^{2+} Channel Types Specified by Their Pore Forming $\alpha1$ Subunit	113
Distribution of L-Type Channels	113
Distribution of P/Q-, N- and R-Type Channels	116
Ca_v2 in Pancreas	121
Distribution of T-Type Channels	121
Distributions of the Ancillary Subunits β , $\alpha_2\text{-}\delta$ and γ	122
Mechanisms of Ca^{2+} Channel Targeting: Transport from the ER to the Plasma Membrane and Specified Subcellular Structures	125
Ca^{2+} Channel Complex Formation in Heterologous Expression Systems	125
Up and Down Regulation of Ca^{2+} Channel Expression: β Subunits, γ Subunits, AKAP and kir/Gem	127
Targeting of Ca^{2+} Channels in Skeletal and Cardiac Muscle	128
Sorting of Ca^{2+} Channels in Polarized Cells: A Correlation between Polarized Sorting in Epithelial Cells and Neurons	129

8. The Calcium Channel and the Transmitter Release Site	141
<i>Elise F. Stanley and Allen W. Chan</i>	
Background	141
Presynaptic Ca^{2+} Channel Types	142
Ca^{2+} Channel Localization at the Presynaptic Nerve Terminal	143
The Calcium Channel and the Triggering of Transmitter Release	144
Calcium Channel Interaction with the Proteins of the Transmitter Release Site	146
Modulation of Presynaptic Ca^{2+} Channels	148
9. Determinants of G Protein Inhibition of Presynaptic Calcium Channels	154
<i>Aparna Nirdosh and Gerald W. Zamponi</i>	
Functional Consequences of Direct G Protein Action on Calcium Channels	155
Stoichiometry between G Proteins and the Calcium Channel	156
G Protein Modulation Depends on the Nature of the Calcium Channel Subunits	157
$\text{G}\beta$ Subunits Mediate Calcium Channel Inhibition	157
Channel and G Protein Structural Basis of G Protein Modulation	158
Interactions between G Protein and Protein Kinase C (PKC) Pathways	159
RGS Proteins and G Protein Modulation of Calcium Channels	160
Interactions between G Proteins and Synaptic Release Proteins	160
10. Phosphorylation-Dependent Regulation of Voltage-Gated Ca^{2+} Channels	168
<i>Roger A. Bannister, Ulises Meza and Brett A. Adams</i>	
Regulation of Ca^{2+} Channels by Protein Kinase A (PKA)	168
Regulation of Ca^{2+} Channels by Protein Kinase C (PKC)	171
Regulation of Ca^{2+} Channels by Protein Kinase G (PKG)	172
Regulation of T-Type Ca^{2+} Channels by Ca^{2+} /Calmodulin- Dependent Protein Kinases (CaM Kinases)	172
Regulation of Ca^{2+} Channels by Tyrosine Kinases	173
Regulation of Ca^{2+} Channels by Mitogen-Activated Protein (MAP) Kinases	174
Regulation of Ca^{2+} Channels by Lipid Kinases	175
Regulation of Ca^{2+} Channels by Cyclin-Dependent Kinase 5 (Cdk5)	176
Regulation of Ca^{2+} Channels by Calcineurin	176

11.	Ca²⁺-Dependent Modulation of Voltage-Gated Ca²⁺ Channels	183
	<i>Amy Lee and William A. Catterall</i>	
	Feedback Regulation of VGCCs by Ca ²⁺ in Paramecium and Aplysia	183
	Ca ²⁺ -Dependent Modulation of Ca _v 1.2 (L-Type) Channels	184
	Molecular Determinants of Ca ²⁺ -Dependent Modulation in Ca _v 1.2 Channels	185
	Ca ²⁺ -Dependent Regulation of Ca _v 2.1 (P/Q-Type) Channels	187
	Differential Modulation of Ca _v 2.1 by CaM and Neuronal Ca ²⁺ -Binding Proteins	190
12.	Voltage-Dependent Inactivation of Voltage Gated Calcium Channels	194
	<i>Mary T. An and Gerald W. Zamponi</i>	
	What Have We Learnt from Other Types of Voltage Gated Cation Channels?	195
	α1 Subunit Structural Inactivation Determinants in High Voltage Activated Channels	197
	Role of Ancillary Subunits in Calcium Channel Inactivation	199
	Possible Molecular Mechanism of Calcium Channel Inactivation	200
13.	Selective Permeability of Voltage-Gated Calcium Channels	205
	<i>William A. Sather</i>	
	Selectivity by Ion Binding Affinity	206
	A Multi-Ion Pore Confers High Flux	206
	Amino Acid Residues of the Selectivity Filter	208
	A Single High-Affinity Locus	211
	Non-Equivalence of EEEE Locus Glutamates	212
	Functional Groups that Bind Ca ²⁺	213
	Structure-Based Selectivity Models	215
14.	The Run-Down Phenomenon of Ca²⁺ Channels	219
	<i>Klaus J.F. Kepplinger and Christoph Romanin</i>	
	Which Native Calcium Channel Types Exhibit Run-Down?	219
	Prevention and Reversal of Channel Run-Down	220
	The Nucleotides ATP and ADP	220
	Regulation by Phosphorylation/Dephosphorylation	222
	Is Calpastatin the Regulatory Protein in the Cytoplasm?	222
	Molecular Determinants of Calpastatin in the Regulation of Calcium Channel Activity	223
	Which Subunits of the L-Type Calcium Channel Are Involved in the Run-Down Process?	223
	Molecular Determinants for Run-Down in the α _{1C} Subunit	223
	Summary of the Molecular Mechanisms and Determinants of Run-Down	226

15. Calcium Channels As Therapeutic Targets.....	231
<i>Francesco Belardetti and Sian Spacey</i>	
L-Type Channels	231
N-Type Channels	233
P/Q-Type Channels	233
T-Type Channels	235
16. Calcium Channelopathies	240
<i>Nancy M. Lorenzon and Kurt G. Beam</i>	
Calcium Channelopathies of the Nervous System	240
Calcium Channelopathies of Muscle	250
17. The Molecular Basis of Ca²⁺ Antagonist Drug	
 Action-Recent Developments	262
<i>Jörg Striessnig, Jean-Charles Hoda, Edwin Wappl</i>	
<i>and Alexandra Koschak</i>	
A Multisubsite Model of the Ca ²⁺ Antagonist Drug	
Binding Domains	264
Towards a Three-Dimensional Model of the DHP	
Binding Domain	266
PAA and BTZ Binding Residues	275
Differences in DHP Sensitivity between Ca _v 1.2, Ca _v 1.3	
and Ca _v 1.4 L-Type Ca ²⁺ Channels	275
18. Calcium Channel Block and Inactivation:	
 Insights from Structure-Activity Studies	281
<i>Steffen Hering, Stanislav Sokolov, Stanislav Berjukow,</i>	
<i>Rainer Marksteiner, Eva Margreiter and Evgeni N. Timin</i>	
Amino Acid Residues Located in the Putative Drug-Binding	
Region Affect Drug-Sensitivity and Channel Inactivation	284
Drug-Sensitivity Is Affected by Inactivation Determinants	
Located Outside the Putative Drug-Binding Region	286
β-Subunits Modulate Inactivation and Channel Inhibition	287
Inactivation Determinants and DHP Sensitivity	287
On the Role of Ca ²⁺ -Dependent Inactivation in Drug Sensitivity	290
Simulation of the Drug-Channel Interaction	290
19. Block of Voltage-Gated Calcium Channels by Peptide Toxins	294
<i>Christina I. Schroeder, Richard J. Lewis and David J. Adams</i>	
L-Type VSCC Antagonists	295
N-Type VSCC Antagonists	300
P/Q-Type VSCC Antagonists	302
R-Type VSCC Antagonists	303
T-Type Antagonists	304

20.	Calcium Channels in the Heart	309
	<i>Stéphanie Barrère-Lemaire, Matteo E. Mangoni and Joël Nargeot</i>	
	I-Cardiac Ca^{2+} Channels in Working Myocardial Cells	309
	Cardiac Ca^{2+} Channels and Pacemaker Activity	315
21.	Post-Genomic Insights into T-Type Calcium Channel Functions in Neurons	326
	<i>Emmanuel Bourinet, Philippe Lory, Jean Chemin, Steve Dubel, Régis Lambert, Olivier Poirot, Arnaud Monteil, Anne Feltz and Joël Nargeot</i>	
	Contributions of Recombinant Channel Studies	327
	T-Type Channels and Neurophysiology	329
22.	Voltage-Gated Ca^{2+} Channels of the Vertebrate Retina: From the Genetics of Blindness to Encoding the Visual World	334
	<i>Melanie E.M. Kelly and Steven Barnes</i>	
	Ca^{2+} Channels in the Graded Potential Neurons of the Outer Retina	336
	Ca^{2+} Channel Subtypes in Spiking Cells of the Inner Retina	339
	Differential Expression of Ca^{2+} Channel Subtypes during Retinal Development	341
23.	Exploring the Function and Pharmacotherapeutic of Potential Voltage-Gated Ca^{2+} Channels with Gene-Knockout Models	346
	<i>Jörg Striessnig and Alexandra Koschak</i>	
	The Ca_v1 (L-Type) Ca^{2+} Channel Family	348
	The Ca_v2 (P/Q-, N- and R-Type) Ca^{2+} Channel Family	353
	The Ca_v3 (T-Type) Ca^{2+} Channel Family	359
	Ca^{2+} Channel β -Subunits	362
	Other Subunits	364
	Index	373
