

BRIEF CONTENTS

PART I Foundations of Evolutionary Biology

1	An Overview of Evolutionary Biology.....	2
2	Early Evolutionary Ideas and Darwin's Insight	28
3	Natural Selection.....	60
4	Phylogeny and Evolutionary History	100
5	Inferring Phylogeny.....	136

PART II Evolutionary Genetics

6	Transmission Genetics and the Sources of Genetic Variation	178
7	The Genetics of Populations	202
8	Evolution in Finite Populations	242
9	Evolution at Multiple Loci	290
10	Genome Evolution.....	334

PART III The History of Life

11	The Origin and Evolution of Early Life	378
12	Major Transitions.....	404
13	Evolution and Development.....	432
14	Species and Speciation.....	454
15	Extinction and Evolutionary Trends	498

PART IV Evolutionary Interactions

16	The Evolution of Sex	538
17	Sexual Selection	562
18	The Evolution of Sociality	584
19	Coevolution.....	620
20	Evolution and Medicine.....	646
