<i>List of illustrations</i>	xi
<i>Notes on contributors</i>	xiii
<i>Acknowledgements</i>	xxvi
1 Genetics and society: perspectives from the twenty-first century <i>Paul Atkinson, Peter Glasner and Margaret Lock</i>	1
Section One	
Biomedical applications of new genetic technologies	15
2 Introduction <i>Susan E. Kelly</i>	17
3 Biomedicalising genetic health, diseases and identities <i>Adele E. Clarke, Janet K. Shim, Sara Shostak and Alondra Nelson</i>	21
4 Stem cells, translational research and the sociology of science <i>Steven P. Wainwright, Clare Williams, Mike Michael and Alan Cribb</i>	41
5 Reproductive genetics: from choice to ambivalence and back again <i>Anne Kerr</i>	59
6 Localising genetic testing and screening in Cyprus and Germany: contingencies, continuities, ordering effects and bio-cultural intimacy <i>Stefan Beck and Jörg Niewöhner</i>	76
7 Nutrigenomics <i>Ruth Chadwick</i>	94

Section Two	
Commercialisation	105
8 Introduction: genomes and markets <i>Paul Atkinson</i>	107
9 Making Europe unsafe for agbiotech <i>Les Levidow</i>	110
10 Genetic information and insurance underwriting: contemporary issues and approaches in the global economy <i>Mark A. Rothstein and Yann Joly</i>	127
11 On a critical path: genomics, the crisis of pharmaceutical productivity and the search for sustainability <i>Paul Martin, Michael Hopkins, Paul Nightingale and Alison Kraft</i>	145
12 States, markets and networks in bioeconomy knowledge value chains <i>Philip Cooke</i>	163
Section Three	
Representations of genomics	181
13 Introduction <i>Maureen McNeil</i>	183
14 Stakeholder representations in genomics <i>Edna Einsiedel</i>	187
15 Human genetics and cloning in the media: mapping the research field <i>Joan Haran and Jenny Kitzinger</i>	203
16 Cultural imaginaries and laboratories of the real: representing the genetic sciences <i>Suzanne Anker</i>	222
17 Genes in our knot <i>Mike Fortun</i>	247
Section Four	
Regulation	261
18 Introduction: expressing the gene: the discursive and institutional regulation of genetics <i>Andrew Webster</i>	263

19	Law and regulation <i>Sheila McLean</i>	267
20	Forensic DNA databases and biolegality: the co-production of law, surveillance technology and suspect bodies <i>Michael Lynch and Ruth McNally</i>	283
21	Biobanks and the challenges of governance, legitimacy and benefit <i>Oonagh Corrigan and Richard Tutton</i>	302
Section Five Bioethics and genetics		319
22	Introduction <i>Ruth Chadwick</i>	321
23	Rethinking privacy in the genetic age <i>David Weisbrot</i>	324
24	Bioethics and human genetic engineering <i>John H. Evans and Cynthia E. Schairer</i>	349
25	Towards a bioethics of disability and impairment <i>Jackie Leach Scully</i>	367
26	Ethical perspectives on animal biotechnology <i>Mickey Gjerris, Anna Olsson, Jesper Lassen and Peter Sandøe</i>	382
Section Six Diversity and justice		399
27	Introduction <i>Barbara Katz Rothman</i>	401
28	Religion and nationhood: collective identities and the New Genetics <i>Barbara Prainsack and Yael Hashiloni-Dolev</i>	404
29	Extravagance, or the good and the bad of genetic diversity <i>Amade M'charek</i>	422
30	Eugenics <i>Lene Koch</i>	437
31	Human dignity and biotechnology policy <i>Ubaka Ogbogu and Timothy Caulfield</i>	448

Section Seven

New forms of knowledge production

32	Introduction	465
	<i>Alberto Cambrosio</i>	
33	Centralising labels to distribute data: the regulatory role of genomic consortia	469
	<i>Sabina Leonelli</i>	
34	Innovative genetic technologies, governance and social accountability	486
	<i>Andrew Webster</i>	
35	Genomic platforms and hybrid formations	502
	<i>Alberto Cambrosio, Peter Keating, Pascal Bourret, Philippe Mustar and Susan Rogers</i>	
	<i>Index</i>	521
