

Contents

<i>Preface</i>	xi
1. Solution Chemistry of Iron in Biological Media	1
1.1 Aqueous Solution Chemistry of Iron	1
1.1.1 Oxygen Free Radicals	2
1.1.2 Iron Hydrolysis – a Ubiquitous Phenomenon	5
1.1.3 Hydrolysis of Iron(III) in Acid Media – Formation of Polynuclear Species	7
1.1.4 Ageing of Amorphous Ferrihydrite to more Crystalline Products	9
1.2 Biomineralisation	10
1.2.1 Magnetite Biomineralisation by Magnetotactic Bacteria	12
References	15
2. The Importance of Iron for Biological Systems	17
2.1 Introduction	17
2.2 Physical Techniques for the Study of Iron in Biological Systems	19
2.3 Haemoproteins	24
2.3.1 Oxygen Carriers	24
2.3.2 Activators of Molecular Oxygen	28
2.3.3 Electron Transport Proteins	35
2.4 Iron–Sulfur Proteins	39
2.5 Other Iron Containing Proteins	45
2.5.1 Mononuclear Non-Haem Iron Enzymes	45
2.5.2 Dinuclear Non-Haem Iron Enzymes	50
References	56
3. Microbial Iron Transport and Metabolism	59
3.1 Introduction	59
3.2 Siderophores	63
3.2.1 Iron Transport Across the Outer Membrane in Gram-Negative Bacteria	66
3.2.2 Transport Across the Periplasm and Cytoplasmic Membrane	75
3.2.3 Iron Release from Ferric Siderophores and Ferric Reduction	79
3.2.4 Fe^{2+} Transport Systems in <i>E. coli</i>	80
3.2.5 Fe^{3+} Iron Acquisition by Pathogens	80
3.3 Intracellular Iron Metabolism	86

3.4	Control of Gene Expression by Iron	88
	References	94
4.	Iron Uptake by Plants and Fungi	103
4.1	Iron Acquisition by Plants	103
4.1.1	Introduction	103
4.1.2	Iron Acquisition by the Roots of Plants	105
4.1.3	Long Distance Iron Transport	110
4.1.4	Intracellular Iron Transport	112
4.2	Iron Acquisition by Yeast	118
4.2.1	Introduction – Pathways for Iron Uptake	118
4.2.2	Cell Surface Reductases	119
4.2.3	High Affinity Iron Transport System	120
4.2.4	Low Affinity Ferrous Iron Transport	125
4.2.5	Siderophore-Mediated Iron Uptake	126
4.2.6	Intracellular Iron Metabolism	129
4.2.7	Iron Transport in Other Fungi	130
4.2.8	Regulation of Iron Uptake/Homeostasis in Yeast	131
	References	131
5.	Cellular Iron Uptake and Export in Mammals	141
5.1	The Transferrins	141
5.2	Structure of Transferrins	143
5.3	Transferrin Iron Binding and Release	146
5.4	Iron Uptake by Mammalian Cells – Uptake of Transferrin Bound Iron	151
5.4.1	The Transferrin Receptor	151
5.4.2	The Transferrin-to-Cell Cycle	155
5.4.3	Transferrin Binding to its Receptor	157
5.5	Cellular Iron Uptake and Export	161
5.5.1	Red Blood Cell Precursors	162
5.5.2	Tissue Macrophages	164
5.5.3	Hepatocytes	167
5.6	Uptake of Iron from Other Sources than Transferrin	168
5.7	Nontransferrin Bound Iron	169
5.8	Ferritin Bound Iron	170
5.9	Haptoglobin and Haemopexin as Iron Transporters	170
	References	173
6.	Intracellular Iron Storage and Biomineralisation	183
6.1	Intracellular Iron Storage	183
6.1.1	Ferritin: Distribution and Primary Structure	184
6.1.2	Three-Dimensional Structure	186
6.1.3	The Mineral Core	198
6.1.4	Iron Deposition in Ferritin	200
6.1.5	Iron Mobilisation from Ferritin	207
6.1.6	Haemosiderin	209

6.2	Biom mineralisation	210
	References	215
7.	Intracellular Iron Metabolism and Cellular Iron Homeostasis	223
7.1	Intracellular Iron Metabolism	223
7.1.1	The Labile Iron Pool	224
7.1.2	Mitochondrial Iron Uptake and Metabolism	226
7.1.3	Haem Biosynthesis	228
7.1.4	Iron-Sulfur Protein Biogenesis in Eukaryotes	233
7.1.5	Intracellular Haem Degradation – Haem Oxygenase	240
7.2	Cellular Iron Homeostasis	247
7.2.1	Structural Features of IREs	251
7.2.2	Hereditary Hyperferritinaemia Cataract Syndrome	253
7.2.3	Iron Regulatory Protein 1	254
7.2.4	Iron Regulatory Protein 2	259
	References	261
8.	Iron Absorption in Mammals, with Particular Reference to Man, and Regulation of Systemic Iron Balance	271
8.1	Iron Metabolism in Man: An Overview	271
8.2	Sources of Dietary Iron in Man and the Importance of Luminal Factors	273
8.3	Iron Losses and Requirements for Absorbed Iron	275
8.4	Molecular Mechanisms of Mucosal Iron Absorption	276
8.4.1	Iron Uptake at the Apical Pole	279
8.4.2	Iron Transfer Across the Mucosal Cell	282
8.4.3	Release of Iron at the Basolateral Membrane and Uptake by Apotransferrin	283
8.5	Regulation of Iron Uptake by the Enterocyte	284
8.6	Regulation of Systemic Iron Balance	285
	References	294
9.	Pathophysiology of Iron Deficiency and Iron Overload in Man	299
9.1	Introduction: Acquired and Genetic Disorders of Iron Metabolism	299
9.2	Homeostatic Control of the Internal Milieu and Consequences of Its Disruption	300
9.3	Iron Overload Syndromes	303
9.4	Primary Iron Overload, Hereditary Haemochromatosis (HH)	303
9.4.1	HFE Haemochromatosis (Type 1)	304
9.4.2	Other Types of Haemochromatosis	308
9.4.3	Nonhaemochromatotic Primary Iron Overload	311
9.4.4	Treatment of Primary Iron Overload	312
9.5	Secondary Iron Overload	313
9.5.1	Treatment of Secondary Iron Overload	315
9.6	Iron Deficiency and IDA	318
9.6.1	Epidemiology	318
9.6.2	Causes	319

9.6.3	Clinical Stages of Iron Deficiency and Laboratory Diagnosis	320
9.6.4	Treatment of Iron Deficiency	322
9.7	Anaemia of Chronic Disease	324
9.8	Conclusions	324
	References	325
10.	Iron and Oxidative Stress	335
10.1	Introduction to Free Radicals	335
10.2	Reactive Oxygen Species (ROS)	336
10.3	Cytoprotective Enzymes and Antioxidants	338
10.3.1	Superoxide Dismutase	338
10.3.2	Catalase and Glutathione Peroxidase	340
10.3.3	Glutathione	340
10.3.4	Thioredoxin System	342
10.3.5	Haem Oxygenase	342
10.3.6	Ferritin	343
10.3.7	Low Molecular Weight Antioxidants	343
10.4	Ageing and Cytoprotection	345
10.5	Oxidative Stress	348
10.5.1	NF κ B	348
10.5.2	Caspases	350
10.5.3	JNK	353
10.5.4	MAPK Signalling Pathway-amplification Cascade	353
10.6	Cyclin Dependent Kinases	356
10.7	Deregulation of Calcium Homeostasis and Oxidative Stress	357
10.8	Nitric Oxide and Cyclic Guanylate Cyclase	358
10.9	Activation of cAMP Dependent PKA	360
10.10	Importance of Iron, ROS and RNS in Phagocytic Cells	360
10.10.1	Macrophages	360
10.10.2	Glial Cells	364
	References	365
11.	Brain Iron Homeostasis and Its Perturbation in Various Neurodegenerative Diseases	371
11.1	Introduction	371
11.2	Mechanisms for Iron Transport into Brain	372
11.3	Importance of Iron in the Developing Foetus	376
11.4	Iron Uptake and Turnover Within the Brain	377
11.5	Importance of IRPs in Brain Iron Homeostasis	378
11.6	Brain Iron Speciation	379
11.7	Neurodegenerative Diseases	379
11.7.1	Parkinson's Disease	381
11.7.2	Alzheimer's Disease	389
11.7.3	Frederich's Ataxia	393
11.7.4	Aceruloplasminaemia	395
	References	398

12. Interactions Between Iron and Other Metals	403
12.1 Introduction	403
12.2 Interactions Between Iron and Essential Metals	404
12.2.1 Mars and Venus – Iron and Copper	404
12.2.2 Iron and Zinc	414
12.2.3 Iron and Manganese	420
12.2.4 Iron and Cobalt	424
12.3 Iron and Toxic Metals	429
12.3.1 Iron and Aluminium	429
12.3.2 Iron and Lead	432
12.3.3 Iron and Cadmium	434
References	435
Concluding Remarks	445
Index	453
