

Contents

Preface	vii
Contributors	xiii
1. Discriminant Analysis for Dimensionality Reduction: An Overview of Recent Developments	1
<i>Jieping Ye and Shuiwang Ji</i>	
2. A Taxonomy of Emerging Multilinear Discriminant Analysis Solutions for Biometric Signal Recognition	21
<i>Haiping Lu, Konstantinos N. Plataniotis, and Anastasios N. Venetsanopoulos</i>	
3. A Comparative Survey on Biometric Identity Authentication Techniques Based on Neural Networks	47
<i>Raghudeep Kannavara and Nikolaos Bourbakis</i>	
4. Designing Classifiers for Fusion-Based Biometric Verification	81
<i>Kritha Venkataramani and B. V. K. Vijaya Konar</i>	
5. Person-Specific Characteristic Feature Selection for Face Recognition	113
<i>Sreekar Krishna, Vineeth Balasubramanian, John Black, and Sethuraman Panchanathan</i>	
6. Face Verification Based on Elastic Graph Matching	143
<i>Anastasios Tefas and Ioannis Pitas</i>	
7. Combining Geometrical and Statistical Models for Video-Based Face Recognition	171
<i>Amit K. Roy-Chowdhury and Yilei Xu</i>	
8. A Biologically Inspired Model for the Simultaneous Recognition of Identity and Expression	195
<i>Donald Neth and Alex M. Martinez</i>	
9. Multimodal Biometrics Based on Near-Infrared Face Recognition	225
<i>Rui Wang, Shengcai Liao, Zhen Lei, and Stan Z. Li</i>	
10. A Novel Unobtrusive Face and Hand Geometry Authentication System Based on 2D and 3D Data	241
<i>Filareti Tsalakanidou and Sotiris Malassiotis</i>	
11. Learning Facial Aging Models: A Face Recognition Perspective	271
<i>Narayanan Ramanathan and Rama Chellappa</i>	

12. Super-Resolution of Face Images	295
<i>Sung Won Park and Marios Savvides</i>	
13. Iris Recognition	315
<i>Yung-Hui Li and Marios Savvides</i>	
14. Learning in Fingerprints	339
<i>Alessandra Lumini, Loris Nanni, and Davide Maltoni</i>	
15. A Comparison of Classification- and Indexing-Based Approaches for Fingerprint Identification	365
<i>Xuejun Tan, Bir Bhanu, and Rong Wang</i>	
16. Electrocardiogram (ECG) Biometric for Robust Identification and Secure Communication	383
<i>Francis Minhthang Bui, Foteini Agrafioti, and Dimitrios Hatzinakos</i>	
17. The Heartbeat: The Living Biometric	429
<i>Steven A. Israel, John M. Irvine, Brenda K. Wiederhold, and Mark D. Wiederhold</i>	
18. Multimodal Physiological Biometrics Authentication	461
<i>Alessandro Riera, Aureli Soria-Frisch, Mario Caparrini, Ivan Cester, and Giulio Ruffini</i>	
19. A Multiresolution Analysis of the Effect of Face Familiarity on Human Event-Related Potentials	483
<i>Brett DeMarco and Evangelia Micheli-Tzanakou</i>	
20. On-Line Signature-Based Authentication: Template Security Issues and Countermeasures	497
<i>Patrizio Campisi, Emanuele Maiorana, and Alessandro Neri</i>	
21. Unobtrusive Biometric Identification Based on Gait	539
<i>Xiaxi Huang and Nikolaos V. Boulgouris</i>	
22. Distributed Source Coding for Biometrics: A Case Study on Gait Recognition	559
<i>Savvas Argyropoulos, Dimosthenis Ioannidis, Dimitrios Tzovaras, and Michael G. Strintzis</i>	
23. Measuring Information Content in Biometric Features	579
<i>Richard Youmaran and Andy Adler</i>	
24. Decision-Making Support in Biometric-Based Physical Access Control Systems: Design Concept, Architecture, and Applications	599
<i>Svetlana N. Yanushkevich, Vlad P. Shmerko, Oleg Boulanov, and Adrian Stoica</i>	
25. Privacy in Biometrics	633
<i>Stelvio Cimato, Marco Gamassi, Vincenzo Piuri, Roberto Sassi, and Fabio Scotti</i>	
26. Biometric Encryption: The New Breed of Untraceable Biometrics	655
<i>Ann Cavoukian and Alex Stoianov</i>	
Index	719
