Preface	xi	3.2	Sources and Kinds of Variation	32		
Contributors	xiii	3.3	Examples of Clitellate Model Organisms	34		
		3.4	Cryptic Speciation	41		
		3.5	Conclusions and Recommendations	41		
Part I Annelids as Model Systems in Biology						
1. Developing Models for Lophotrochozoan and Annelid Biology	3	4. Annelid Life Cycle Cultures 47				
<i>Kenneth M. Halanych and Elizabeth Borda</i>		<i>Donald J. Reish and Bruno Pernet</i>				
1.1	Introduction	3	4.1	Introduction	47	
1.2	Phylogenetic Considerations	4	4.2	Criteria for the Selection of Species	48	
1.3	Genetic and Developmental Tools	5	4.3	Summary of Culture Techniques	48	
1.4	Annelid Model Organisms	6	4.4	Life Cycle Cultures of Polychaeta	50	
1.5	Other Potential Annelid Models	8	4.5	Life Cycle Cultures of Oligochaeta	56	
			4.6	Life Cycle Cultures of Hirudinea (Leeches)	58	
2. Annelid Phylogeny—Molecular Analysis with an Emphasis on Model Annelids	13	Part II Evolution and Development				
<i>Christoph Bleidorn</i>		5. Annelids in Evolutionary Developmental Biology 65				
2.1	Introduction	13	<i>Dian-Han Kuo</i>			
2.2	Genes	14	5.1	Introduction	65	
2.3	Molecular Annelid Phylogeny	16	5.2	Evo-Devo Today	66	
2.4	Choosing Model Organisms	24	5.3	Evo-Devo as Comparative Biology	66	
2.5	Branch Lengths	24	5.4	Why Annelid Development Is Interesting for Metazoan Evo-Devo Biologists	67	
2.6	Problems in Inferring Annelid Phylogeny	24	5.5	Case Study 1: Segmentation	68	
2.7	Conclusions	25	5.6	Case Study 2: Spiral Cleavage and Axis Specification	74	
3. Cryptic Speciation in Clitellate Model Organisms	31					
<i>Christer Erséus and Daniel Gustafsson</i>						
3.1	Introduction	31				

- 5.7 Tools for Analyzing Molecular Mechanisms of Development 79
- 5.8 The Future of the Annelid Model Systems for Evo-Devo 81

6. Evolution, Development and Ecology of *Capitella* sp. I: A Waxing Model for Polychaete Studies 88

Susan D. Hill and Robert M. Savage

- 6.1 Introduction 88
- 6.2 Speciation Studies 89
- 6.3 *Capitella* Sp. I Morphology 91
- 6.4 Replacement of Lost Segments and Reproductive Trade-Offs 92
- 6.5 Metatrochophores, Ciliary Bands and Musculature 93
- 6.6 Gene Expression during the Specification and Differentiation of Germ Layers 95
- 6.7 Sex among the Vermes 100
- 6.8 Annelids and the Segmentation Debate 101
- 6.9 A-P Polarity—*Hox* and *ParaHox* Genes 106
- 6.10 Annelid Genomics: Draft Genome Sequence 108
- 6.11 The Future—Where Is This Going? 109

7. Stem Cell Genesis and Differentiation in Leech 116

Shirley A. Lang and Daniel H. Shain

- 7.1 Introduction 116
- 7.2 Stem Cell Genesis and Development 117
- 7.3 Factors Affecting Stem Cell Genesis 121
- 7.4 Stem Cell Differentiation 124
- 7.5 Gene Expression 128
- 7.6 Conclusion 130

Part III Neurobiology and Regeneration

8. Cellular and Behavioral Properties of Learning in Leech and Other Annelids 135

Kevin M. Crisp and Brian D. Burrell

- 8.1 Introduction 135
- 8.2 Learning in the Leech Whole-Body Shortening Reflex and Role of the S Interneuron 137
- 8.3 Role of the S Interneuron: Modulation of Excitability 139
- 8.4 Learning in the Leech Swim Circuit 144
- 8.5 Using the Leech to Study Intrinsic Forms of Sensitization 146
- 8.6 Synaptic Plasticity in Leech CNS 147
- 8.7 Conclusions 150

9. Development, Regeneration and Immune Responses of the Leech Nervous System 156

Michel Salzet and Eduardo Macagno

- 9.1 Introduction 156
- 9.2 Background 157
- 9.3 Recent Work on the Development of the Nervous System 157
- 9.4 Neuronal Regeneration and Repair 169
- 9.5 Neuroimmune Responses 173
- 9.6 Cellular and Humoral Immune Mechanisms: A Leech Innate Immune Response 176
- 9.7 Conclusions and Future Directions 179

10. *Lumbriculus variegatus* and the Need for Speed: A Model System for Rapid Escape, Regeneration and Asexual Reproduction 185

Mark J. Zoran and Veronica G. Martinez

- 10.1 Introduction 185
- 10.2 Neural Regeneration in Oligochaetes 187

- 10.3 *Lumbriculus variegatus*, a Model System for Regeneration and Asexual Reproduction 191
- 10.4 Neural Morphallaxis 192
- 10.5 Accessible Model for Life Science Education 198

Part IV Environmental and Ecological Studies

11. Polychaetes in Environmental Studies 205

Victoria Díaz-Castañeda and Donald J. Reish

- 11.1 Introduction 205
- 11.2 Estuarine Occurrence 206
- 11.3 Intertidal Occurrence 207
- 11.4 Mussel Beds 207
- 11.5 Sea Grasses 208
- 11.6 Sabellarid and Serpulid Reefs 209
- 11.7 Benthic Community Structure 209
- 11.8 Unusual Benthic Habitats 210
- 11.9 Feeding Guilds 213
- 11.10 Algal "Gardening" Behavior 214
- 11.11 Polychaetes as Environmental Indicators and Remediators 214
- 11.12 Biomonitoring 217
- 11.13 Toxicological Tests 219
- 11.14 Economic Importance of Polychaetes 221
- 11.15 Conclusions 221

12. Oligochaete Worms for Ecotoxicological Assessment of Soils and Sediments 228

Jörg Römcke and Philipp Egeler

- 12.1 Introduction 228
- 12.2 Principles of Environmental Risk Assessment 229
- 12.3 Soil Tests with Lumbricidae 230

- 12.4 Soil Tests with Enchytraeidae 232
- 12.5 Sediment Tests with Lumbriculidae and Tubificidae 235
- 12.6 Oligochaetes in Ecotoxicology 237
- 12.7 Conclusions 238

13. Evolution and Ecology of *Ophryotrocha* (Dorvilleidae, Eunicida) 242

Daniel J. Thornhill, Thomas G. Dahlgren, and Kenneth M. Halanych

- 13.1 Introduction 242
- 13.2 General Morphology 242
- 13.3 Taxonomic and Phylogenetic Considerations 243
- 13.4 Reproductive Biology 247
- 13.5 Ecology 250
- 13.6 Future Research 252

14. Cosmopolitan Earthworms—A Global and Historical Perspective 257

Robert J. Blakemore

- 14.1 Introduction 257
- 14.2 Number of Earthworm Species 267
- 14.3 Characteristics and Origins of Cosmopolitan Earthworms 268
- 14.4 Overview of Results 268
- 14.5 Discussion 269
- 14.6 Regional Species Totals and Proportions of Exotics 271
- 14.7 Earthworms, Archaeology and Human History 273
- 14.8 Benefits and Risks of Earthworm Transportations 277
- 14.9 Conclusions 278

Part V Extreme Environments and Biological Novelties

15. Hydrothermal Vent Annelids 287

Florence Pradillon and Françoise Gaill

- 15.1 Introduction 287
- 15.2 *Alvinella pompejana*: a Symbiotic System 289
- 15.3 Temperature Adaptation 290
- 15.4 Temperature Adaptation at a Molecular Level 290
- 15.5 *Alvinella* Tubes 291
- 15.6 Collagens 292
- 15.7 Temperature Adaptation at a Cellular Level: the Case of Developing Embryos 295
- 15.8 Behavioral Adaptation to a High-Temperature Environment 297
- 15.9 Future Development of Thermal Adaptation Studies 297
- 15.10 Perspectives 298

16. Glacier Ice Worms 301

Paula L. Hartzell and Daniel H. Shain

- 16.1 Introduction 301
- 16.2 Natural History 303
- 16.3 Classification and Phylogenetic Relationships 305
- 16.4 Origins 306
- 16.5 Clades 307
- 16.6 Physiology 309
- 16.7 Conservation Status 311

17. Sperm Ultrastructure in Assessing Phylogenetic Relationships among Clitellate Annelids 314

Roberto Marotta and Marco Ferraguti

- 17.1 Introduction 314
- 17.2 The Spermatozoon of *Propappus volki* (Michaelsen 1916) 317
- 17.3 Sperm Ultrastructure in Branchiobdellids, *Acanthobdella peledina*, and Hirudineans 320
- 17.4 Sperm Ultrastructure inside Tubificidae 320
- 17.5 Plesiomorphic Spermatozoon of Clitellates and Spermatological Apomorphic Trends 324
- 17.6 Patterns of Spermatological Characters among Clitellates 324

18. Clitellate Cocoons and Their Secretion 328

Jon'elle Coleman and Daniel H. Shain

- 18.1 Introduction 328
- 18.2 Reproductive Biology 330
- 18.3 Clitellum and CGCs 330
- 18.4 Cocoon Production 331
- 18.5 Brooding Behavior within Glossiphoniidae 334
- 18.6 Cocoon Structure: Surface Topology and Ultrastructural Properties 335
- 18.7 Evolution of Clitellate Cocoons and Their Secretion 341
- 18.8 Biomaterials Applications 342

Index 347
