Fatty Acid Desaturases, Chemistry of	1	Integrin Signaling	393
Flavin-Mediated Hydroxylation Reactions	8	Intramembrane Proteolysis	406
Flavoenzymes, Chemistry of	17	Ion Channels	419
Fluorescence in Living Systems: Applications in Chemical Biology	28	Ion Channels: Computational Analysis	437
Fluorescence Spectroscopy: Applications in Chemical Biology	39	Ion Channels in Medicine	448
Fluorescence Techniques for Proteins	61	Iron-Sulfur Clusters: Properties and Functions	458
Fluorescence to Study Nucleic Acids	72	Iron-Sulfur World	469
Förster Resonance Energy Transfer (FRET) for Proteins	80	Isoprostanes	477
Forward Chemical Genetics	94	Kinases and Dephosphorylases: Chemistry and Roles	486
Glycan Biosynthesis in Mammals	112	Lantibiotics: Biosynthesis and Modes of Action	494
Glycans: Array-Based Techniques	127	Large G-Proteins	503
Glycan Synthesis: Key Strategies	139	Lead Optimization in Drug Discovery	511
Glycoconjugates: Structure and Biosynthesis	151	Lipidated Peptide Synthesis	520
Glycosphingolipids, Chemistry of	164	Lipid Bilayers: Properties	531
Glycosylation of Proteins in the Golgi Apparatus	184	Lipid Domains, Chemistry of	546
Glycosyltransferases, Chemistry of	198	Lipid Homeostasis, Chemistry of	551
G-Protein-Coupled Receptors: Drug Design Strategies	211	Lipid Signals: Extracellular	560
Group II Introns	232	Lipidomics	566
Hemes in Biology	240	Lipids: Chemical Diversity	575
Hemozoin: A Paradigm for Biomaterials in Disease	250	Lipids: Organization and Aggregation	589
High Throughput Screening (HTS) Techniques: Applications in Chemical Biology	260	Lipids: Phase Transitions	601
Histone Modifications: Chemistry and Structural Consequences	275	Locked Nucleic Acids	616
HIV: Small Molecule Approaches	284	Lysosomal Disorders	622
Hormone Signaling	289	Marine Natural Products: Chemical Diversity	633
Human Hemoglobin: Identification of a Key Intermediate	298	Mass Spectrometry: Applications in Phosphoproteomics	654
Hydration Forces	306	Mass Spectrometry of Lipid Analyses	661
Hypoxic Response and Associated Diseases	314	Mass Spectrometry to Identify Posttranslational Modifications	670
Informatics for Glycans	329	Mathematical Modelling of Biological Signaling Networks	703
Inorganic Chemistry in Biology	340	Mechanosensitive Channels	712
Inositol Phosphates	349	Membrane Compartments in Immune Cell Signaling and Trafficking	718
Inositol Phospholipids: Biosynthesis and Biological Functions	360	Membrane Fluidity	728
Integrated and Organized Cellular Energetic Systems	366	Membrane Potentials in Living Systems	742
		Membrane Proteins: Properties	751
		Membrane Protein Structure: Techniques	761
		Metabolic Diseases: Biological Mechanisms	773
