Metabolism: Cellular Organization	1	Non-Homologous Recombination	423
Metabolome	8	Nonribosomal Peptides: Biosynthesis	432
Metal Homeostasis	17	Nuclear Receptors, Chemistry of	441
Metallo-Enzymes and Metallo-Proteins, Chemistry of	27	Nucleic Acid Enzymes (Ribozymes and Deoxyribozymes): <i>In Vitro</i> Selection and Application	450
Metallointercalators as Probes of DNA Recognition and Reactions	34	Nucleic Acids: Chemical Damage	467
Metalloproteinases, Biophysics and Chemistry of	46	Nucleic Acids: Hydration	480
Metalloregulatory Proteins	56	Nucleobase Self-Assembly Codes: Constitutional Transcription	488
Metals in Medicine: Imaging Agents	66	Olfaction, Chemical Biology of	500
Metals in Medicine: Therapeutic Agents	80	Origins of Life: Emergence of Amino Acids	510
Methylerythritol Phosphate Pathway for Formation of Isoprene Units	126	Origins of Life: Emergence of the RNA World	517
Microarrays in Chemical Biology	134	Oxygen-Activating Enzymes, Chemistry of	529
MicroRNA	144	Passive Diffusion Across Membranes	541
Microtubule Dynamics	153	Pathogen-Host Interactions: Chemical Biology Approach	550
Mitochondrial Medicine	161	Pentose Phosphate Pathway	564
Mitogen-Activated Protein Kinases (MAPKs): ERKs, JNKs, and p38s	169	Peptide Combinatorial Libraries	575
Modified Nucleosides in RNA	177	Peptide Nucleic Acids (PNAs)	588
Molecular Recognition: Computational Analysis and Modelling	190	Peptide Synthesis: Coupling Methods	597
NAD(P) Dependent Dehydrogenases	200	Peptidomimetics	606
Naturally Occurring Peptide Hormones and Neurotransmitters: Synthesis	210	Pharmaceutical Industry: Biocatalysts and Chemocatalysts	617
Natural Products: An Overview	240	Pharmaceuticals: Natural Products and Natural Product Models	633
Natural Products as Anticancer Agents	249	Pharmacokinetics of Drug Candidates	652
Natural Products in Plants: Chemical Diversity	261	Phosphate Mimics: Cyclic Compounds	661
Nature: A Model System for Chemists	277	Photosynthesis: Electron Transfer Chemistry	676
Neocarzinostatin: Protein-Small Molecule Interactions	285	Physical Chemistry in Biology	683
Neoglycoproteins, Chemistry of	298	Plant-Derived Natural Products Research: Recent Progress in Drug Discovery	690
Neuropeptides: Chemical Activity Profiling and Proteomic Approaches	307	Plant Terpenoids	712
Neurotransmission: Measuring Chemical Events	319	Platinum Anticancer Drugs, Chemical Biology of	721
Neurotransmitter Release	331	PLP-Dependent Enzymes, Chemistry of	731
Nitric Oxide: Biological Targets	342	Polyketide Biosynthesis: Fungi	736
NMR: Applications in Chemical Biology	350	Polyketide Biosynthesis: Modular Polyketide Synthases	746
NMR-Based Metabolomics Technology in Biomarker Research	374	Polyketide Biosynthesis, Polyethers	760
NMR: Lipids	387	Polymerase Chain Reaction (PCR) in Chemical Biology	772
NMR: Proteins	396	Polymer Therapeutics	783
NMR Spectroscopy: Paramagnetic Metalloproteins	408
