

Contents

Colour plates appear between page 416 and page 417 in Volume 1 and between page 1262 and page 1263 in Volume 2.

Volume 1

Contributors	xv
Preface	xxviii
Foreword	xxxii

General Concepts in Evolutionary Genetics

Evolution: Views of	3
<i>James F Crow</i>	
Evolution: Selectionist View	8
<i>Andreas Wagner</i>	
Evolution: Neutralist View	9
<i>Andreas Wagner</i>	
The Neo-selectionist Theory of Genome Evolution	10
<i>Giorgio Bernardi</i>	
Fitness and Selection	17
<i>Brian Charlesworth</i>	
Genetic Drift in Human Populations	18
<i>Andrew J Bohonak</i>	
Heterozygosity	20
<i>Wen-Hsiung Li</i>	
Effective Population Size	21
<i>Michael C Whitlock</i>	
Population Differentiation: Measures	22
<i>Stefano Mona and Giorgio Bertorelle</i>	
Evolutionary Distance	24
<i>Wen-Hsiung Li</i>	
Gene Trees and Species Trees	25
<i>Wen-Hsiung Li</i>	
Homologous, Orthologous and Paralogous Genes	27
<i>Wen-Hsiung Li</i>	
Evolution: Convergent and Parallel Evolution	28
<i>Caro-Beth Stewart</i>	

Mutation, Adaptation and Natural Selection

Genetic Variation: Polymorphisms and Mutations	37
<i>Alan F Wright</i>	

Polymorphisms: Origins and Maintenance	46
<i>Kenneth M Weiss</i>	
Molecular Evolution: Introduction	51
<i>David Penny</i>	
Molecular Evolution: Overview	63
<i>Jan Klein</i>	
Molecular Evolution: Genetics of Adaptation	68
<i>Michael Travisano</i>	
Neutral Theory of Molecular Evolution	74
<i>Naoyuki Takahata</i>	
Molecular Evolution: Nearly Neutral Theory	79
<i>Tomoko Ohta</i>	
Molecular Evolution: Rates	84
<i>Lindell Bromham</i>	
Molecular Evolution: Patterns and Rates	89
<i>Lindell Bromham</i>	
Rate of Nucleotide Substitution	93
<i>Wen-Hsiung Li</i>	
Synonymous and Nonsynonymous Rates	94
<i>Soojin Yi</i>	
Mutational Change in Evolution	98
<i>Dan Graur</i>	
Mutations and New Variation: Overview	108
<i>Mark O Johnston</i>	
Single-base Mutation	117
<i>Dan Graur</i>	
Mutation Rate	122
<i>Bertram Müller-Myhsok</i>	
Mutation Rates: Evolution	123
<i>David Metzgar</i>	
Spectrum of Mutations in the Human Genome Inferred by Single Nucleotide Polymorphisms	126
<i>Zhao Zhongming</i>	
Mutational Biases	131
<i>Lev Y Yampolsky and Arlin Stoltzfus</i>	
Dating Mutations	138
<i>Roberto Colombo</i>	

Diffusion Theory <i>Gil McVean</i>	143	Evolutionary and Population Genetics	
Molecular Clocks in Mammals <i>Wen-Hsiung Li and Kateryna D Makova</i>	148	Gene Flow, Haplotype Patterns and Modern Human Origins <i>Alan R Templeton</i>	237
Molecular Clocks <i>Andrew Peter Martin</i>	154	HapMap Project <i>Bryan J Traynor and Andrew Singleton</i>	243
Purifying Selection: Action on Silent Sites <i>R Nielsen and H Akashi</i>	160	Migration <i>Guido Barbujani</i>	248
Selection against Amino Acid Replacements in Human Proteins <i>Sankar Subramanian</i>	164	Nonrandom Mating <i>Dennis H O'Neil</i>	253
Identifying Regions of the Human Genome that Exhibit Evidence for Positive Selection <i>Ryosuke Kimura and Jun Ohashi</i>	170	Human Population Stratification and its Assessment by Microarray Genotyping <i>Marc Bauchet</i>	258
Positive Selection on Genes in Humans as Compared to Chimpanzees <i>Margaret A Bakewell and Jianzhi Zhang</i>	179	Sequence Alignment <i>Julie D Thompson and Olivier Poch</i>	266
Selection Operating on Protein-coding Genes in the Human Genome <i>Diogo Meyer and Eugene E Harris</i>	186	Sequence Similarity <i>Jaap Heringa</i>	271
Selective and Structural Constraints <i>Austin L Hughes</i>	191	Phylogenetics <i>Wen-Hsiung Li</i>	279
Substitution Matrices <i>Stephen F Altschul</i>	194	Phylogenetic Footprinting <i>Wyeth W Wasserman and Wynand Alkema</i>	287
Fixation Probabilities and Times <i>Sarah P Otto and Michael C Whitlock</i>	197	Molecular Phylogeny Reconstruction <i>Sudhir Kumar and Alan Filipski</i>	291
Genetic Code: Evolution <i>Edward N Trifonov</i>	201	Evolutionary Distance: Estimation <i>Masatoshi Nei and Jianzhi Zhang</i>	296
Codon Usage in Molecular Evolution <i>Richard L Grantham</i>	204	Coalescent Theory <i>Simon Tavaré</i>	300
Linkage Disequilibrium <i>Peter JP Croucher</i>	210	Stationary Allele Frequency Distributions <i>Bruce Rannala</i>	309
Recombination and Human Genetic Diversity <i>Chris CA Spencer</i>	212	Developmental Evolution <i>Susan Lindsay</i>	312
Comparison of Rates and Patterns of Meiotic Recombination between Human and Chimpanzees <i>Jan Freudenberg</i>	220	Morphological Diversity: Evolution <i>Graham Budd</i>	316
Rapid Evolution of Genes on the Human X-chromosome <i>Erika M Kvikstad and Kateryna D Makova</i>	226	Male-driven Evolution <i>Hans Ellegren</i>	319
		Coevolution: Molecular <i>Ronald M Adkins</i>	322
		Concerted Evolution <i>Daiqing Liao</i>	328
		Sociobiology, Evolutionary Psychology and Genetics <i>Patrick Bateson</i>	333

Are Humans Still Evolving? <i>Floyd A Reed</i>	337	Surnames and Genetics <i>Mark A Jobling</i>	436
Human Evolution		Population History of Europe: Genetics <i>Guido Barbujani</i>	439
Hominids: Molecular Phylogenetics <i>Ulfur Arnason and Morgan Kullberg</i>	345	Genetic Diversity in Africa <i>Alicia Sanchez-Mazas and Estella S Poloni</i>	444
Human Evolution: Overview <i>Bernard A Wood</i>	350	Genetic Diversity in the German Population <i>Michael Krawczak, Timothy T Lu, Sascha Willuweit and Lutz Roewer</i>	451
Molecular Clocks: Determining the Age of the Human–Chimpanzee Divergence <i>Michael I Jensen-Seaman and Kathryn A Hooper-Boyd</i>	355	Genetics and the History of the Basque People <i>Santos Alonso</i>	457
On the Number of Ancestral Human Species <i>Darren Curnoe</i>	360	Genetics and the Origins of the British Population <i>Martin Richards, Cristian Capelli and James F Wilson</i>	463
Human Evolution: Early Radiations <i>Bernard A Wood</i>	368	Genetics and the Origins of the Chinese <i>Qing-Peng Kong, Hui Pan and Ya-Ping Zhang</i>	469
Human Evolution: Radiations in the Last 300 000 Years <i>Oshjorn M Pearson</i>	374	Genetics and the Origins of the Finns <i>Reijo Norio</i>	474
Modern Humans: Origin and Evolution <i>Todd R Disotell</i>	379	Genetics and the Origins of the Irish <i>Brian McEvoy and Daniel G Bradley</i>	484
Modern Human Origins: The 'Out of Africa' Debate <i>John H Relethford</i>	383	Genetics and the Origins of the Polynesians <i>Geoffrey K Chambers</i>	489
Origin of Modern Humans: Interpreting the Molecular Evidence <i>Henry C Harpending</i>	389	Origins of the Australian and New Guinean Aborigines <i>Sheila M van Holst Pellekaan</i>	497
Human Populations: Evolution <i>Rebecca L Cann</i>	396	Origins of the Austro-Asiatic Populations <i>B Mohan Reddy and Vikrant Kumar</i>	507
Human Populations: Origins and Evolution <i>Rosalind M Harding and John H Relethford</i>	401	Peopling of India: Insights from Genetics <i>Partha P Majumder</i>	516
Humans: Demographic History <i>Henry Harpending</i>	406	Population Genetics of the Ashkenazim <i>Marina Faerman</i>	520
DNA Markers and Human Evolution <i>Rebecca L Cann</i>	410	Roma (Gypsies): Genetic Studies <i>Bharti Morar and Luba Kalaydjieva</i>	528
Reconstructing Human History Using Autosomal, Y-Chromosomal and Mitochondrial Markers <i>Bryndis Yngvadottir and Denise R Carvalho-Silva</i>	414	The Peopling of the Americas as Revealed by Molecular Genetic Studies <i>Theodore G Schurr</i>	534
Population History and Linkage Disequilibrium <i>Sebastian Zöllner</i>	421	Primates and the Origin of Culture <i>WC McGrew</i>	558
Human Population Genetics: Drift and Migration <i>Ranajit Chakraborty</i>	426	Human Genome Evolution	
Human Genetics and Languages <i>David Comas, Elena Bosch and Francesc Calafell</i>	430	Evolution of Genome Organization <i>Wolfgang Stephan</i>	567
		Genome Organization of Vertebrates <i>Giorgio Bernardi</i>	571

Evolutionary History of the Human Genome <i>Giorgio Bernardi</i>	576	Endogenous Retroviral Sequences; their Evolutionary Contribution to the Human Genome <i>Jens Mayer</i>	686
Sequencing the Human Genome: Novel Insights into its Structure and Function <i>Hildegard Kehrer-Sawatzki and David N Cooper</i>	580	Human Endogenous Retroviruses: Evolutionary Dynamics, Chromosomal Location and Host Benefit <i>Paul Nelson, Graham Freimanis and Denise Roden</i>	692
Single Nucleotide Polymorphism (SNP) <i>Anthony J Brookes</i>	588	Evolutionary History and Impact of Human DNA Transposons <i>Cédric Feschotte</i>	698
Human Genetic Diversity <i>Lynn B Jorde</i>	592	Evolution of Human Retrosequences: Alu <i>Astrid M Roy-Engel, Mark A Batzer and Prescott L Deininger</i>	706
Human and Chimpanzee Nucleotide Diversity <i>Henrik Kaessmann</i>	599	Long Interspersed Nuclear Elements (LINEs): Evolution <i>Anthony V Furano and Stéphane Boissinot</i>	709
Divergence between the Human and Chimpanzee Genomes and its Impact on Protein and Transcriptome Evolution <i>Hildegard Kehrer-Sawatzki and David N Cooper</i>	605	Bacterial DNA in the Human Genome <i>Jan O Andersson</i>	715
Indels in the Evolution of the Human and Chimpanzee Genomes <i>Anna Wetterbom, Lucia Cavelier and Tomas F Bergström</i>	616	Chromosome-specific Repeats (Low-copy Repeats) <i>M-C Potier, G Golfier and EE Eichler</i>	718
Inferring the Process of Human-Chimpanzee Speciation <i>K Ryo Takahasi and Hideki Innan</i>	624	Telomeres <i>Christa Lese Martin and David H Ledbetter</i>	721
Human Genome Diversity Project (HGDP) <i>Morris W Foster</i>	630	Telomeric and Subtelomeric Repeat Sequences <i>Dmitri Churikov and Carolyn M Price</i>	725
Blocks of Limited Haplotype Diversity <i>Newton E Morton</i>	632	Subtelomeres: Evolution in the Human Genome <i>M Katharine Rudd</i>	734
Gene Conversion during Primate Evolution <i>Yoko Satta</i>	634	The Evolution of Centromeric DNA Sequences <i>Joshua J Bayes and Harmit S Malik</i>	743
Biased Gene Conversion and its Impact on Human Genome Evolution <i>Nicolas Galtier and Laurent Duret</i>	641	Segmental Duplications and Their Role in the Evolution of the Human Genome <i>Yali Xue and Chris Tyler-Smith</i>	750
Repetitive DNA: Evolution <i>Wolfgang Stephan and J Bruce Walsh</i>	647	Copy Number Variation in the Human Genome <i>Hildegard Kehrer-Sawatzki</i>	757
Simple Sequence Repeats in the Human Genome: Evolution <i>Donald E Riley and John N Krieger</i>	652	Gene Duplication: Evolution <i>Wen-Hsiung Li</i>	761
Evolution of Microsatellite DNA <i>Iris M Vargas Jentzsch, Andrew Bagshaw, Emmanuel Buschiazzi, Angelika Merkel and Neil J Gemmell</i>	659	Gene Families: Formation and Evolution <i>Tomoko Ohta</i>	765
Evolution of Alpha Satellite DNA <i>Durđica Ugarković</i>	671	Gene Families: Multigene Families and Superfamilies <i>Tomoko Ohta</i>	769
Comparative Genetics of Trinucleotide Repeats in the Human and Ape Genomes <i>Loris Mularoni, Macarena Toll-Riera and M Mar Alba</i>	677	Gene Clustering in Eukaryotes <i>Jeffrey G Lawrence and Thomas Blumenthal</i>	772
		Clustering of Highly Expressed Genes in the Human Genome <i>Hinco J Gierman and Rogier Versteeg</i>	778

Gene Distribution in Human Chromosomes	781	Gene Evolution and Human Adaptation	885
<i>Giorgio Bernardi and Salvatore Saccone</i>		<i>Eugene E Harris</i>	
Evolution of Gene Deserts in the Human Genome	784	The Evolution of Introns in Human Genes	893
<i>James Taylor</i>		<i>Elodie Gazave, Olga Fernando and Arcadi Navarro</i>	
The Impact of Gene Duplication on Human Genome Evolution	791	Intron Evolution in Duplicated Human Genes	901
<i>James A Cotton</i>		<i>Kamel Jabbari and Edda Rayko</i>	
Genetic Redundancy	797	Intron Loss and Gain	906
<i>David C Krakauer</i>		<i>Tobias Mourier and Daniel C Jeffares</i>	
DNA Methylation: Evolution	803	Introns: Movements	913
<i>Aharon Razin and Ruth Shemer</i>		<i>Manyuan Long and Rüdiger Cerff</i>	
Evolution of Imprinting: Imprinted Gene Function in Human Disease	807	Introns: Phase Compatibility	918
<i>Benjamin JA Dickins and Gavin Kelsey</i>		<i>László Patthy</i>	
Imprinting: Evolution	817	Evolutionarily Conserved Intronic Splicing Regulatory Elements in the Human Genome	922
<i>Hamish G Spencer</i>		<i>Eric L Van Nostrand and Gene W Yeo</i>	
Epigenetic Variation in Humans	821	Evolutionary Conservation of Splice Sites	928
<i>Jon F Wilkins</i>		<i>Michelle L. Hastings and Ravi Sachidanandam</i>	
Dosage Compensation Mechanisms: Evolution	827	Alternative Splicing: Evolution	935
<i>Ignacio Marín</i>		<i>László Patthy</i>	
Evolution of X-chromosome Inactivation	831	Alternative Splicing in the Human Genome and its Evolutionary Consequences	940
<i>Alexander I Shevchenko and Suren M Zakian</i>		<i>Liliana Florea</i>	
Conserved DNA Sequence Elements in the Human Genome	838	Dual-coding Regions in Alternatively Spliced Human Genes	948
<i>Alison P Lee and B Venkatesh</i>		<i>Han Liang and Laura F Landweber</i>	
The Biological Significance of Conserved Non-Genic DNA	846	Birth and Evolution of Human Exons	953
<i>Emmanouil T Dermizakis</i>		<i>Maria Dulcetti Vibriantovski, Noboru Jo Sakabe and Manyuan Long</i>	
Evolutionarily Conserved Noncoding DNA	853	Exons and Protein Modules	957
<i>Anil G Jegga and Bruce J Aronow</i>		<i>László Patthy</i>	
Human-specific Accelerated Evolution of Noncoding Sequences	861	Insertion and Deletion of Exons During Human Gene Evolution	960
<i>Matthew T Webster</i>		<i>David N Cooper</i>	
Rapidly Evolving Regions of the Human Genome	868	Exons: Shuffling	966
<i>Subhash Mohan Agarwal</i>		<i>László Patthy</i>	
GC-rich Isochores in the Interphase Nucleus	874	Pseudoexons	969
<i>Salvatore Saccone and Giorgio Bernardi</i>		<i>Manyuan Long</i>	
Volume 2		Domain Duplication and Gene Elongation	972
Evolution of Human Gene Structure and Function		<i>Wen-Hsiung Li and Kateryna D Makova</i>	
Gene Structure: Evolution	881		
<i>Tomoko Ohta</i>			

The Contribution of Frameshift Translation to the Generation of Novel Human Proteins <i>Kohji Okamura and Stephen W Scherer</i>	976	Vertebrate Immune System: Evolution <i>Austin L Hughes</i>	1063
Transposable Element-driven Duplications during Hominoid Genome Evolution <i>Bud Mishra</i>	983	Evolution of the Human Immune System <i>Nadia Danilova</i>	1068
The Contribution of Transposable Elements to Human Proteins <i>Jean-Nicolas Volff</i>	990	Complement System: Evolution <i>Masaru Nonaka</i>	1074
Evolutionary Emergence of Genes Through Retrotransposition <i>Richard Cordaux and Mark A Batzer</i>	996	Somatic Hypermutation of Antigen Receptor Genes: Evolution <i>Marilyn Diaz and Laurent K Verkoczy</i>	1080
Multigene Families: Evolution <i>J Bruce Walsh and Wolfgang Stephan</i>	1004	Neuropeptides and their Receptors: Evolution <i>Charles HV Hoyle</i>	1085
Paralogous Genes and Chromosomal Regions <i>Lars-Gustav Lundin, Dan Larhammar and Finn Hallböök</i>	1009	Nuclear Receptor Genes: Evolution <i>Gareth I Owen</i>	1090
Bi-directional Gene Pairs in the Human Genome <i>Kanako O Koyanagi, Tadashi Imanishi and Takashi Gojobori</i>	1012	Olfactory Receptor Genes: Evolution <i>Yoshihito Niimura</i>	1097
Gene Fusion <i>Esther Betrán</i>	1017	Visual Pigment Genes: Evolution <i>Shozo Yokoyama</i>	1106
Protein Families: Evolution <i>Richard R Copley</i>	1022	Bitter Taste Sensitivity in Humans and Chimpanzees <i>Maik Behrens and Wolfgang Meyerhof</i>	1111
Fibroblast Growth Factors: Evolution <i>David M Ornitz</i>	1028	Evolution of Skin Pigmentation Differences in Humans <i>Heather L Norton</i>	1118
Globin Genes: Evolution <i>Ross C Hardison</i>	1034	Population Genetics of Lactase Persistence and Lactose Intolerance <i>Catherine Janet, Ellen Ingram and Dallas Mary Swallow</i>	1127
Hox Genes and Body Plan: Evolution <i>Ella Tour and William McGinnis</i>	1040	Defensins: Evolution <i>Austin L Hughes</i>	1133
Pax Genes: Evolution and Function <i>Maxime Bouchard, Alexander Schleiffer, Frank Eisenhaber and Meinrad Busslinger</i>	1044	Cystic Fibrosis Transmembrane Conductance Regulator Sequences: Comparative Analysis <i>Jian-Min Chen, Guillaume Lecointre, Erick Denamur and Claude Férec</i>	1136
Low-density Lipoprotein Receptor (LDLR) Family: Genetics and Evolution <i>Wolfgang Johann Schneider</i>	1051	ATP-binding Cassette (ABC) Transporter Supergene Family: Genetics and Evolution <i>Michael Dean</i>	1141
Major Histocompatibility Complex (MHC) Genes: Evolution <i>Austin L Hughes</i>	1055	Proteases: Evolution <i>Christopher Southan</i>	1146
Major Histocompatibility Complex (MHC) Genes: Polymorphism <i>Diogo Meyer and Steven J Mack</i>	1059	Serpins: Evolution <i>Gary A Silverman, David J Askew, James A Irving, Cliff J Luke, Dion Kaiserman, Phillip I Bird and James C Whisstock</i>	1152
		Adaptive Evolution of Primate Sperm Proteins <i>Nathaniel L Clark</i>	1158

Drug Metabolism: Evolution <i>Daniel W Nebert</i>	1166	Alternative Polyadenylation in the Human Genome: Evolution <i>Bin Tian</i>	1262
rRNA Genes: Evolution <i>Iris L Gonzalez and James E Sylvester</i>	1172	Mitochondrial Genome Evolution	
MicroRNA Evolution in the Human Genome <i>Bing Su and Rui Zhang</i>	1177	Mitochondrial Genome: Evolution <i>Mark Stoneking</i>	1273
Pseudogene Evolution in the Human Genome <i>Zhaolei Zhang and Deyou Zheng</i>	1182	Mitochondrial Non-Mendelian Inheritance: Evolutionary Origin and Consequences <i>C William Birky Jr</i>	1278
Human Lineage-specific Gene Inactivation <i>Wendy E Grus and Jianzhi Zhang</i>	1191	Mitochondrial Genome Sequences and Their Phylogeographic Interpretation <i>Vincent Macaulay and Martin Richards</i>	1282
Pseudogenes: Age <i>Allen R Rhoads and Felix Friedberg</i>	1197	Mitochondrial Origins of Human Nuclear Genes and DNA Sequences <i>William F Martin</i>	1286
Pseudogenes: Patterns of Mutation <i>Rosa Martínez-Arias, Francesc Calafell and Jaume Bertranpetit</i>	1199	Chromosomal Evolution	
Processed Pseudogenes and Their Functional Resurrection in the Human and Mouse Genomes <i>Hiroaki Sakai, Takeshi Itoh and Takashi Gojobori</i>	1203	Chromosomes in Mammals: Diversity and Evolution <i>Johannes Wienberg and Stefan Müller</i>	1295
Evolution of Gene Expression		Chromosome Numbers in Mammals <i>Harry Scherthan</i>	1301
Transcriptional Regulation: Evolution <i>Gregory A Wray</i>	1211	Chromosome Rearrangement Patterns in Mammalian Evolution <i>Johannes Wienberg and Stefan Müller</i>	1309
Promoters: Evolution <i>Deborah L Gumucio</i>	1214	Hotspots of Mammalian Chromosome Evolution <i>Lutz Froenicke and Leslie A Lyons</i>	1315
Evolution of Human Gene Expression Control <i>Courtney C Babbitt and Gregory A Wray</i>	1218	Chromosomal Rearrangements in Primates <i>Roscoe Stanyon and Francesca Bigoni</i>	1322
Positive Selection and the Evolution of Prodynorphin <i>Matthew V Rockman</i>	1222	Chromosomal Rearrangements in the Human and Chimpanzee Lineages <i>Hildegard Kehrer-Sawatzki and David N Cooper</i>	1328
Human Transcriptome Evolution <i>Xun Gu and Yong Huang</i>	1228	Human Chromosome Evolution <i>Gerald P Holmquist and Johannes Wienberg</i>	1335
Evolution of Gene Expression in Human and Chimpanzee Brains <i>Naoki Osada, Sugano Sumio and Yutaka Suzuki</i>	1236	Polyploid Origin of the Human Genome <i>Masanori Kasahara</i>	1340
Human and Chimpanzee Transcriptomes: Comparative Evolution <i>Philipp Khaitovich, Hildegard Kehrer-Sawatzki and David N Cooper</i>	1242	Chromatin Structure and Human Genome Evolution <i>Colin AM Semple</i>	1345
Human and Macaque Transcriptomes: A comparison <i>Stephen J Walker</i>	1249	Mammalian Sex Chromosome Evolution <i>Gerald J Wyckoff and Christine M Malcom</i>	1352
Transcription Factor-binding Sites: Recent Evolution in the Human Lineage <i>Berthold Göttgens</i>	1257	Evolution of the Mammalian X Chromosome <i>Paul D Waters and Terence J Robinson</i>	1356
		Y Chromosome Evolution <i>Vladimir A Gvozdev</i>	1362

X and Y Chromosomes: Homologous Regions <i>Nisrine El-Mogharbel and Jennifer AM Graves</i>	1367	The Chimpanzee Genome Project <i>David N Cooper and Hildegard Kehrer-Sawatzki</i>	1486
Evolution of Common Fragile Sites <i>Anne Helmrich</i>	1376	Comparing the Human and Chimpanzee Genomes <i>Monica Uddin, Derek E Wildman and Morris Goodman</i>	1500
Comparative Genomics		Nucleotide Sequence Divergence between Humans and Chimpanzees <i>Feng-Chi Chen and Trees-Juen Chuang</i>	1506
Comparative Cytogenetics <i>Matthew Breen and Cordelia Langford</i>	1385	Human-specific Changes of Genome Structure <i>R Alan Harris and Aleksandar Milosavljevic</i>	1515
Comparative Cytogenetics Technologies <i>Stefan Müller and Johannes Wienberg</i>	1390	Evolution and Disease Susceptibility	
Reconstruction of Ancestral Genomes <i>Roscoe Stanyon, Fiorella Garofalo and Francesca Bigoni</i>	1395	Evolutionary Thinking in the Medical Sciences <i>Stephen C Stearns</i>	1525
Comparative Human Genomics <i>I King Jordan and Eugene V Koonin</i>	1403	Darwinian Medicine <i>George C Williams</i>	1527
Orthologues, Paralogues and Xenologues in Human and Other Genomes <i>Olga Zhaxybayeva, J Peter Gogarten and Lorraine Olendzenski</i>	1413	Pathological Missense Mutations Provide New Insights into the Evolution of Trypsinogen Genes <i>Jian-Min Chen, David N Cooper and Claude Férec</i>	1532
Comparing the Human and Sea Urchin Genomes <i>R Andrew Cameron</i>	1419	Balancing Selection in Human Evolution <i>Eric J Vallender and Welkin E Johnson</i>	1539
Comparing the Human and Fish Genomes <i>Yoichiro Nakatani and Shinichi Morishita</i>	1425	Selective Constraints on Human Disease Mutations and Polymorphisms <i>Hernán Dopazo</i>	1546
Comparing the Human and Medaka Genomes <i>Takashi Sasaki and Nobuyoshi Shimizu</i>	1435	Genetic of Large Populations and Association Studies <i>Pauline Hélène Garnier-Géré and Lounès Chikhi</i>	1564
<i>Fugu</i> : The Pufferfish Model Genome <i>B Venkatesh</i>	1439	Genetic Disease in the Ashkenazim: Role of a Founder Effect <i>Inbal Kedar-Barnes, Paul Rozen, Mordechai Shohat and Hagit N Baris</i>	1569
The Mouse Genome as a Rodent Model in Evolutionary Studies <i>Jessica Vamathevan, Joanna D Holbrook and Richard D Emes</i>	1445	Single Nucleotide Polymorphisms in Human Disease and Evolution: Phylogenies and Genealogies <i>Paul D Thomas</i>	1575
The Rat Genome as a Rodent Model in Evolutionary Studies <i>Kim Fechtel</i>	1452	Structural Diversity of the Human Genome and Disease Susceptibility <i>Richard S Smith, María Gutiérrez-Arcelus, Charles W Tran, Stephanie Park, Cheryn J Couter and Charles Lee</i>	1586
Comparing the Human and Canine Genomes <i>Marek Switonski and Izabela Szczerbal</i>	1460	Segmental Duplications and Genetic Disease <i>Beverly S Emanuel and Tamim H Shaikh</i>	1598
Primate Phylogenetics <i>Todd R Disotell</i>	1469	Genetics of Susceptibility to Human Infectious Diseases <i>Richard A Kaslow, Sadeep Shrestha and Jianming 'James' Tang</i>	1603
The Sequencing of the Rhesus Macaque Genome and its Comparison with the Genome Sequences of Human and Chimpanzee <i>Richard A Gibbs, Kim C Worley, Hildegard Kehrer-Sawatzki and David N Cooper</i>	1473		

The Genetics of Malarial Resistance and Susceptibility <i>Brian C Verrelli</i>	1613	An Evolutionary Genetic Framework for Heritable Disorders <i>Matthew C Keller</i>	1640
The Evolution of Fatness and Susceptibility to Obesity <i>Jonathan CK Wells</i>	1619	Analysis of Ancient DNA	
Thrifty Genotype Hypothesis and Complex Genetic Disease <i>Pnina Vardi and Konstantin Bloch</i>	1625	Ancient DNA: Recovery and Analysis <i>Susanne Hummel</i>	1649
An Evolutionary Framework for Common Disease <i>Francesca Luca and Anna Di Rienzo</i>	1629	Ancient DNA: Phylogenetic Applications <i>Michael Knapp, Linda Vigilant and Michael Hofreiter</i>	1656
On Sequence Variants that Influence the Risk of Common Diseases <i>Kári Stefánsson and Jeffrey R Gulcher</i>	1635	Neanderthal Mitochondrial DNA <i>William Goodwin and Igor Ovchinnikov</i>	1660
		Reconstructing Ancient DNA Sequences <i>in silico</i> <i>Jian Ma</i>	1666
