<i>Preface</i>	xi
<i>Abbreviations</i>	xiii
<i>List of Contributors</i>	xix
1 Biotransformations in Small-molecule Pharmaceutical Development	1
<i>Joseph P. Adams, Andrew J. Collis, Richard K. Henderson and Peter W. Sutton</i>	
2 Biocatalyst Identification and Scale-up: Molecular Biology for Chemists	83
<i>Kathleen H. McClean</i>	
3 Kinetic Resolutions Using Biotransformations	117
3.1 Stereo- and Enantio-selective Hydrolysis of <i>rac</i> -2-Octylsulfate Using Whole Resting Cells of <i>Pseudomonas</i> spp.	117
<i>Petra Gadler and Kurt Faber</i>	
3.2 Protease-catalyzed Resolutions Using the 3-(3-Pyridine)propionyl Anchor Group: <i>p</i> -Toluenesulfonamide	121
<i>Christopher K. Savile and Romas J. Kazlauskas</i>	
3.3 Desymmetrization of Prochiral Ketones Using Enzymes	125
<i>Andrew J. Carnell</i>	
3.4 Enzymatic Resolution of 1-Methyl-tetrahydroisoquinoline using <i>Candida rugosa</i> Lipase	129
<i>Gary Breen</i>	
4 Dynamic Kinetic Resolution for the Synthesis of Esters, Amides and Acids Using Lipases	133
4.1 Dynamic Kinetic Resolution of 1-Phenylethanol by Immobilized Lipase Coupled with <i>In Situ</i> Racemization over Zeolite Beta	133
<i>Kam Loon Fow, Yongzhong Zhu, Gaik Khuan Chuah and Stephan Jaenicke</i>	

4.2	Synthesis of the (<i>R</i>)-Butyrate Esters of Secondary Alcohols by Dynamic Kinetic Resolution Employing a Bis(tetrafluorosuccinato)-bridged Ru(II) Complex	137
	<i>S.F.G.M. van Nispen, J. van Buijtenen, J.A.J.M. Vekemans, J. Meuldijk and L.A. Hulshof</i>	
4.3	Dynamic Kinetic Resolution 6,7-Dimethoxy-1-methyl-1,2,3,4-tetrahydroisoquinoline	141
	<i>Michael Page, John Blacker and Matthew Stirling</i>	
4.4	Dynamic Kinetic Resolution of Primary Amines with a Recyclable Palladium Nanocatalyst (Pd/AlO(OH)) for Racemization	148
	<i>Soo-Byung Ko, Mahn-Joo Kim and Jaiwook Park</i>	
4.5	Dynamic Kinetic Resolution of Amines Involving Biocatalysis and <i>In Situ</i> Free-radical-mediated Racemization	153
	<i>Stéphane Gastaldi, Gérard Gil and Michèle P. Bertrand</i>	
4.6	Chemoenzymatic Dynamic Kinetic Resolution of (<i>S</i>)-Ibuprofen	157
	<i>A.H. Kamaruddin and F. Hamzah</i>	
4.7	Dynamic Kinetic Resolution Synthesis of a Fluorinated Amino Acid Ester Amide by a Continuous Process Lipase-mediated Ethanolysis of an Azalactone	162
	<i>Matthew Truppo, David Pollard, Jeffrey Moore and Paul Devine</i>	
5	Enzymatic Selectivity in Synthetic Methods	165
5.1	Alcalase-catalysed Syntheses of Hydrophilic Di- and Tri-peptides in Organic Solvents	165
	<i>Xue-Zhong Zhang, Rui-Zhen Hou, Li Xu and Yi-Bing Huang</i>	
5.2	Selective Alkoxycarbonylation of 1 α ,25-Dihydroxyvitamin D ₃ Diol Precursor with <i>Candida antarctica</i> Lipase B	170
	<i>Miguel Ferrero, Susana Fernández and Vicente Gotor</i>	
5.3	The Use of Lipase Enzymes for the Synthesis of Polymers and Polymer Intermediates	173
	<i>Alan Taylor</i>	
5.4	Bioconversion of 3-Cyanopyridine into Nicotinic Acid with <i>Gordona terrae</i> NDB1165	182
	<i>Tek Chand Bhalla</i>	
5.5	Enzyme-promoted Desymmetrization of Prochiral Dinitriles	186
	<i>Marloes A. Wijdeven, Piotr Kielbasiński and Floris P.J.T. Rutjes</i>	
5.6	Epoxide Hydrolase-catalyzed Synthesis of (<i>R</i>)-3-Benzoyloxy-2-methylpropane-1,2-diol	190
	<i>Takeshi Sugai, Aya Fujino, Hitomi Yamaguchi and Masaya Ikunaka</i>	
5.7	One-pot Biocatalytic Synthesis of Methyl (<i>S</i>)-4-Chloro-3-hydroxybutanoate and Methyl (<i>S</i>)-4-Cyano-3-hydroxybutanoate	199
	<i>Maja Majerić Elenkov, Lixia Tang, Bernhard Hauer and Dick B. Janssen</i>	

6 Aldolase Enzymes for Complex Synthesis	203
6.1 One-step Synthesis of L-Fructose Using Rhamnulose-1-phosphate Aldolase in Borate Buffer <i>William A. Greenberg and Chi-Huey Wong</i>	203
6.2 Straightforward Fructose-1,6-bisphosphate Aldolase-mediated Synthesis of Aminocyclitols <i>Marielle Lemaire and Lahssen El Blidi</i>	206
6.3 Synthesis of D-Fagomine by Aldol Addition of Dihydroxyacetone to N-Cbz-3-Aminopropanal Catalysed by D-Fructose-6-phosphate Aldolase <i>José A. Castillo, Teodor Parella, Tomoyuki Inoue, Georg A. Sprenger, Jesús Joglar and Pere Clapés</i>	212
6.4 Chemoenzymatic Synthesis of 5-Thio-D-xylopyranose <i>Franck Charmantray, Philippe Dellis, Virgil Hélaine, Soth Samreth and Laurence Hecquet</i>	218
7 Enzymatic Synthesis of Glycosides and Glucuronides	227
7.1 Glycosynthase-assisted Oligosaccharide Synthesis <i>Adrian Scaffidi and Robert V. Stick</i>	227
7.2 Glycosyl Azides: Novel Substrates for Enzymatic Transglycosylations <i>Vladimír Křen and Pavla Bojarová</i>	232
7.3 Facile Synthesis of Alkyl β -D-Glucopyranosides from D-Glucose and the Corresponding Alcohols Using Fruit Seed Meals <i>Wen-Ya Lu, Guo-Qiang Lin, Hui-Lei Yu, Ai-Ming Tong and Jian-He Xu</i>	236
7.4 Laccase-mediated Oxidation of Natural Glycosides <i>Cosimo Chirivì, Francesca Sagui and Sergio Riva</i>	240
7.5 Biocatalysed Synthesis of Monoglucuronides of Hydroxytyrosol, Tyrosol, Homovanillic Alcohol and 3-(4'-Hydroxyphenyl)propanol Using Liver Cell Microsomal Fractions <i>Olha Khymenets, Pere Clapés, Teodor Parella, María-Isabel Covas, Rafael de la Torre, and Jesús Joglar</i>	245
7.6 Synthesis of the Acyl Glucuronide of Mycophenolic Acid <i>Matthias Kittelmann, Lukas Oberer, Reiner Aichholz and Oreste Ghisalba</i>	251
8 Synthesis of Cyanohydrins Using Hydroxynitrile Lyases	255
8.1 Synthesis of (S)-2-Hydroxy-2-methylbutyric Acid by a Chemoenzymatic Methodology <i>Manuela Avi and Herfried Griengl</i>	255
8.2 (S)-Selective Cyanohydrin Formation from Aromatic Ketones Using Hydroxynitrile Lyases <i>Chris Roberge, Fred Fleitz and Paul Devine</i>	259

8.3	Hydroxynitrile-lyase-catalysed Synthesis of Enantiopure (S)-Acetophenone Cyanohydrins <i>Jan von Langermann, Annett Mell, Eckhard Paetzold and Udo Kragl</i>	262
8.4	(R)- and (S)-Cyanohydrin Formation from Pyridine-3-carboxaldehyde Using CLEA TM -immobilized Hydroxynitrile Lyases <i>Chris Roberge, Fred Fleitz and Paul Devine</i>	266
8.5	A New (R)-Hydroxynitrile Lyase from <i>Prunus mume</i> for Asymmetric Synthesis of Cyanohydrins <i>Yasuhisa Asano</i>	269
9	Synthesis of Chiral <i>sec</i>-Alcohols by Ketone Reduction	273
9.1	Asymmetric Synthesis of (S)-Bis(trifluoromethyl)phenylethanol by Biocatalytic Reduction of Bis(trifluoromethyl)acetophenone <i>David Pollard, Matthew Truppo and Jeffrey Moore</i>	273
9.2	Enantioselective and Diastereoselective Enzyme-catalyzed Dynamic Kinetic Resolution of an Unsaturated Ketone <i>Birgit Kosjek, David Tellers and Jeffrey Moore</i>	276
9.3	Enzyme-catalysed Synthesis of α -Alkyl- β -hydroxy Ketones and Esters by Isolated Ketoreductases <i>Ioulia Smonou and Dimitris Kalaitzakis</i>	278
9.4	Asymmetric Reduction of Phenyl Ring-containing Ketones Using Xerogel-encapsulated W110A Secondary Alcohol Dehydrogenase from <i>Thermoanaerobacter ethanolicus</i> <i>Musa M. Musa, Karla I. Ziegelmann-Fjeld, Claire Vieille, J. Gregory Zeikus and Robert S. Phillips</i>	284
9.5	(R)- and (S)-Enantioselective Diaryl Methanol Synthesis Using Enzymatic Reduction of Diaryl Ketones <i>Matthew Truppo, Krista Morley, David Pollard and Paul Devine</i>	288
9.6	Highly Enantioselective and Efficient Synthesis of Methyl (R)- <i>o</i> -Chloromandelate, Key Intermediate for Clopidogrel Synthesis, with Recombinant <i>Escherichia coli</i> <i>Tadashi Ema, Nobuyasu Okita, Sayaka Ide and Takashi Sakai</i>	291
10	Reduction of Functional Groups	295
10.1	Reduction of Carboxylic Acids by Carboxylic Acid Reductase Heterologously Expressed in <i>Escherichia coli</i> <i>Andrew S. Lamm, Arshdeep Khare and John P.N. Rosazza</i>	295
10.2	Light-driven Stereoselective Biocatalytic Oxidations and Reductions <i>Andreas Taglieber, Frank Schulz, Frank Hollmann, Monika Rusek and Manfred T. Reetz</i>	299
10.3	Unnatural Amino Acids by Enzymatic Transamination: Synthesis of Glutamic Acid Analogues with Aspartate Aminotransferase <i>Thierry Gefflaut, Emmanuelle Sagot and Jean Bolte</i>	306

10.4	Synthesis of L-Pipecolic Acid with Δ^1 -Piperidine-2-carboxylate Reductase from <i>Pseudomonas putida</i> <i>Hisaaki Mihara and Nobuyoshi Esaki</i>	310
10.5	Synthesis of Substituted Derivatives of L-Phenylalanine and of other Non-natural L-Amino Acids Using Engineered Mutants of Phenylalanine Dehydrogenase <i>Philip Conway, Francesca Paradisi and Paul Engel</i>	314
11	Enzymatic Oxidation Chemistry	319
11.1	Monoamine Oxidase-catalysed Reactions: Application Towards the Chemo-enzymatic Deracemization of the Alkaloid ($\pm$)-Crispine A <i>Andrew J. Ellis, Renate Reiss, Timothy J. Snape and Nicholas J. Turner</i>	319
11.2	Glucose Oxidase-catalysed Synthesis of Aldonic Acids <i>Fabio Pezzotti, Helene Therisod and Michel Therisod</i>	323
11.3	Oxidation and Halo-hydroxylation of Monoterpenes with Chloroperoxidase from <i>Leptoxiphium fumago</i> <i>Bjoern-Arne Kaup, Umberto Piantini, Matthias Wüst and Jens Schrader</i>	327
11.4	Chloroperoxidase-catalyzed Oxidation of Phenyl Methylsulfide in Ionic Liquids <i>Cinzia Chiappe</i>	330
11.5	Stereoselective Synthesis of β -Hydroxy Sulfoxides Catalyzed by Cyclohexanone Monooxygenase <i>Stefano Colonna, Nicoletta Gaggero, Sara Pellegrino and Francesca Zambianchi</i>	332
11.6	Enantioselective Kinetic Resolution of Racemic 3-Phenylbutan-2-one Using a Baeyer–Villiger Monooxygenase <i>Anett Kirschner and Uwe T. Bornscheuer</i>	337
11.7	Desymmetrization of 1-Methylbicyclo[3.3.0]octane-2,8-dione by the Retro-claisenase 6-Oxo Camphor Hydrolase <i>Gideon Grogan and Cheryl Hill</i>	341
11.8	Synthesis of Optically Pure Chiral Lactones by Cyclopentadecanone Monooxygenase-catalyzed Baeyer–Villiger Oxidations <i>Shaoshao Wang, Jianzhong Yang and Peter C.K. Lau</i>	344
12	Whole-cell Oxidations and Dehalogenations	351
12.1	Biotransformations of Naphthalene to 4-Hydroxy-1-tetralone by <i>Streptomyces griseus</i> NRRL 8090 <i>Arshdeep Khare, Andrew S. Lamm and John P.N. Rosazza</i>	351
12.2	Hydroxylation of Imidacloprid for the Synthesis of Olefin Imidacloprid by <i>Stenotrophomonas maltophilia</i> CGMCC 1.1788 <i>Sheng Yuan and Yi-jun Dai</i>	355

12.3	Biocatalytic Synthesis of 6-Hydroxy Fluvastatin using <i>Motierella rammaniana</i> DSM 62752 in Shake Flask Culture and on Multi-gram Scale using a Wave Bioreactor <i>Matthias Kittelmann, Maria Serrano Correia, Anton Kuhn, Serge Parel, Jürgen Kühnöl, Reiner Aichholz, Monique Ponelle and Oreste Ghisalba</i>	359
12.4	Synthesis of 1-Adamantanol from Adamantane through Regioselective Hydroxylation by <i>Streptomyces griseoplanus</i> Cells <i>Koichi Mitsukura, Yoshinori Kondo, Toyokazu Yoshida and Toru Nagasawa</i>	367
12.5	Enantioselective Benzylic Microbial Hydroxylation of Indan and Tetralin <i>Renata P. Limberger, Cleber V. Ursini, Paulo J.S. Moran and J. Augusto R. Rodrigues</i>	369
12.6	Stereospecific Biotransformation of (<i>R,S</i>)-Linalool by <i>Corynespora cassicola</i> DSM 62475 into Linalool Oxides <i>Marco-Antonio Mirata and Jens Schrader</i>	376
12.7	The Biocatalytic Synthesis of 4-Fluorocatechol from Fluorobenzene <i>Louise C. Nolan and Kevin E. O'Connor</i>	379
12.8	Synthesis of Enantiopure (<i>S</i>)-Styrene Oxide by Selective Oxidation of Styrene by Recombinant <i>Escherichia coli</i> JM101 (pSPZ10) <i>Katja Buehler and Andreas Schmid</i>	385
12.9	Biotransformation of α -Bromo and α,α' -Dibromo Alkanone into α -Hydroxyketone and α -Diketone by <i>Spirulina platensis</i> <i>Takamitsu Utsukihara and C. Akira Horiuchi</i>	391
