

CONTENTS

Foreword by Prof. Dr. Roger Sheldon	xiii
Preface	xv
Contributors	xvii

PART I FUNDAMENTALS **1**

1 IONIC LIQUIDS: DEFINITION, APPLICATIONS, AND CONTEXT FOR BIOTRANSFORMATIONS AND ORGANOCATALYSIS **3**

Pablo Domínguez de María

1.1 Ionic Liquids: Definition, Development, and Overview of Current Main Applications	3
1.2 On the Greenness of ILs: Toward the Third Generation of ILs and DES	6
1.3 Context of ILs in Biotransformations and Organocatalysis	12
References	13

2 IONIC LIQUIDS AND PROTEINS: ACADEMIC AND SOME PRACTICAL INTERACTIONS **15**

Zhen Yang

Abbreviations for Ionic Liquid Cations	15
Abbreviations for Ionic Liquid Anions	16
Abbreviations for Ammonium Ionic Liquids	16
Other Abbreviations	17
2.1 Introduction	17
2.2 Ionic Liquids, Water, and Proteins	18
2.2.1 Ionic Nature of Ionic Liquids	18
2.2.2 Protic and Aprotic Ionic Liquids	19
2.2.3 Water Present in the Ionic Liquids	21
2.2.4 Interactions of Water and Ionic Liquids with Proteins	21
2.2.4.1 Effect of Water and Water Activity	22
2.2.4.2 Effect of Ionic Liquids	26

2.3	Hofmeister Effects on Biocatalysis	26
2.3.1	Hofmeister Effects of Inorganic Salts	27
2.3.1.1	Quantification of Hofmeister Series	28
2.3.1.2	Effect of Ions on Protein Stability	29
2.3.1.3	Effect of Ions on Enzyme Activity	30
2.3.2	Hofmeister Effects of Ionic Liquids	34
2.3.2.1	Effect of Ionic Liquid Ions on Enzyme Performance in Aqueous Solution	34
2.3.2.2	Kinetic Studies of Enzymes in Ionic Liquid-Containing Aqueous Solution	38
2.3.2.3	Enzyme Performance in Ionic Liquid-Dominating Reaction Systems	39
2.4	Impact of Ionic Liquids on Enzymes and Proteins	41
2.4.1	Effect of Ionic Liquids on Enzyme Activity and Stability	41
2.4.1.1	Hydrophobicity and Log <i>P</i>	41
2.4.1.2	Nucleophilicity and H-bond Basicity	44
2.4.1.3	Viscosity	45
2.4.2	Effect of Ionic Liquids on Protein Structure and Dynamics	46
2.4.3	Effect of Ionic Liquids on Protein Refolding and Renaturation	50
2.4.4	Effect of Ionic Liquids on Protein Crystallization and Fibrilization	52
2.5	Protein Extraction by Means of Ionic Liquids	52
2.5.1	Aqueous/Ionic Liquid-Liquid Extraction Systems	52
2.5.2	Ionic Liquid-Based Aqueous Biphasic Systems	53
2.5.3	Water-in-Ionic Liquid Microemulsion Systems	56
2.6	Proper Selection of Ionic Liquids for Biocatalysis	57
2.6.1	Amino Acid Ionic Liquids	57
2.6.2	Ammonium and Phosphonium Ionic Liquids	58
2.6.3	Design of Ionic Liquids for Biocatalysis	59
2.6.4	Proposed Guidelines for Selecting/Designing Biocompatible Ionic Liquids	64
2.7	Concluding Remarks	65
	References	66

PART II IONIC LIQUIDS IN BIOTRANSFORMATIONS 73

3 IONIC LIQUIDS IN BIOTRANSFORMATIONS: MOTIVATION AND DEVELOPMENT 75

Christina Kohlmann and Lasse Greiner

3.1 First Uses of Ionic Liquids in Biotransformations	75
3.2 Motivation to Use IL in Biotransformations	80
3.3 Challenges for the Use of IL in Biotransformations	91
References	98

4 IONIC LIQUIDS AND OTHER NONCONVENTIONAL SOLVENTS IN BIOTRANSFORMATIONS: MEDIUM ENGINEERING AND PROCESS DEVELOPMENT 103

Pedro Lozano and Eduardo García-Verdugo

4.1 Introduction: Toward Greener Catalytic Processes	103
4.2 The Importance of the Medium Engineering in Biotransformations	106
4.2.1 Enzymes in Nonaqueous Environments	106
4.3 Biocatalysis in Monophasic ILs Systems	110
4.3.1 Medium Engineering in Monophasic ILs System	110
4.3.2 Isolation and Recyclability Issues in Monophasic ILs System	115
4.4 (Bio)catalytic Processes in SCFs	118
4.4.1 Properties of SFCs	118
4.4.2 Medium Engineering in Supercritical Biocatalysis	119
4.4.3 Processes Design for SCF Biocatalysis	122
4.5 Multiphase Biotransformations	124
4.5.1 Biocatalytic Processes in Biphasic Fluorous Solvents	125
4.5.2 Bioprocesses in Water/scCO ₂ Systems	126
4.5.3 Bioprocesses in Biphasic ILs System	128
4.5.3.1 Biphasic ILs/Water System	128
4.5.3.2 Phase Behavior of IL/scCO ₂ Biphasic Systems	132
4.5.3.3 Bioprocesses in IL/scCO ₂ Biphasic Systems	134
4.6 Prospects	140
Acknowledgments	140
References	141

5	IONIC LIQUIDS AS (CO-)SOLVENTS FOR HYDROLYTIC ENZYMES	151
	<i>Hua Zhao</i>	
	Nomenclature of ILs	151
	Cations	151
	Anions	152
5.1	Introduction	152
5.1.1	Type of Hydrolases	152
5.1.2	Properties and Applications of ILs	154
5.2	State-of-the-art: Lipases, Esterases, Proteases in ILs as (co-)Solvents	155
5.2.1	Effect of Physical Properties of ILs on Hydrolase Activity and Stability	156
5.2.1.1	IL Polarity	156
5.2.1.2	Hydrogen-bond (<i>H</i> -bond) Basicity and Nucleophilicity of Anions	157
5.2.1.3	IL Network	160
5.2.1.4	Ion Kosmotropicity	161
5.2.1.5	Viscosity	165
5.2.1.6	Hydrophobicity	165
5.2.1.7	Enzyme Dissolution	170
5.2.2	Other Factors Influencing Hydrolase Activity and Stability	171
5.2.2.1	Halide Impurities in ILs	171
5.2.2.2	Water Activity	172
5.2.3	Methods to Improve Hydrolase Activity and Stability	174
5.2.3.1	Enzyme Immobilization	174
5.2.3.2	PEG-Modification	176
5.2.3.3	EPRP	177
5.2.3.4	Water-in-IL Microemulsions.	178
5.2.3.5	Coating Enzymes with ILs	179
5.2.3.6	Designing Hydrolase-Compatible ILs	179
5.3	Use of ILs for (dynamic) Kinetic Resolutions ((D)KRs)	183
5.3.1	Kinetic Resolutions via Hydrolysis in Aqueous Solutions of ILs	183
5.3.1.1	Enantioselective Hydrolysis of Amino Acid Esters	183
5.3.1.2	Enantioselective Hydrolysis of Other Esters	184
5.3.2	Kinetic Resolution via Synthesis in Nonaqueous Solutions of ILs	187

5.3.2.1	Evaluating Hydrolase's Enantioselectivity via the Kinetic Resolution of 1-phenylethanol	187
5.3.2.2	Kinetic Resolutions of Other Alcohols	188
5.3.2.3	Kinetic Resolutions of Amines	199
5.3.2.4	Kinetic Resolutions Integrated with Supported IL Membranes (SILMs) or Microfluidic Separation	199
5.3.2.5	Kinetic Resolution Using IL/scCO ₂ Biphase Systems	202
5.4	Hydrolase-Catalyzed Esterifications of Saccharides and Cellulose Derivatives in ILs	205
5.5	ILs for Glycosidases	210
5.5.1	Glycosidase-Catalyzed Synthesis in ILs	210
5.5.2	Cellulase-catalyzed Hydrolysis in ILs	211
5.6	Prospects	212
	Acknowledgments	213
	References	213

6 IONIC LIQUIDS AS (CO-)SOLVENTS FOR NONHYDROLYTIC ENZYMES **229**

Daniela Gamemara, Patricia Saenz Méndez, Gustavo Seoane, and Pablo Domínguez de María

	Nomenclature of ILs	229
6.1	Ionic Liquids and Nonhydrolytic Enzymes	231
6.2	Use of ILs in Oxidoreductase-Catalyzed Enzymatic Reactions	232
6.2.1	Dehydrogenases	232
6.2.2	Laccases, Peroxidases, Oxidases, and Oxygenases	247
6.3	ILs in Lyase-Catalyzed Reactions	253
6.3.1	Aldolases	253
6.3.2	Oxynitrilases	254
6.4	Prospects	256
	References	256

7 IONIC LIQUIDS AND WHOLE-CELL-CATALYZED PROCESSES **261**

Danielle Dennewald and Dirk Weuster-Botz

	Abbreviations	261
	Abbreviations of Ionic Liquid Cations	261
	Abbreviations of Ionic Liquid Anions	262
	Abbreviation of Ionic Liquid	262
	List of Abbreviations	262

7.1	Ionic Liquids Compatible with Whole-Cell Biocatalysis: Fundamentals and Design	263
7.1.1	Biocompatibility	264
7.1.2	Availability and Purity	265
7.1.3	Stability	265
7.1.4	Process Design Criteria	265
	7.1.4.1 Viscosity, Density, and Corrosiveness	266
	7.1.4.2 Water Miscibility	266
7.1.5	Monophasic versus Biphasic Reaction Mode	266
7.1.6	Hazard Potential	268
	7.1.6.1 Ecotoxicity	268
	7.1.6.2 Biodegradability	269
7.1.7	Recyclability	271
7.1.8	Availability of Information	271
7.2	Biocompatibility, Tolerance, and Accumulation in the Cell	272
7.2.1	Methods	272
7.2.2	Tolerance	273
	7.2.2.1 Composition of the Ionic Liquid and Organism Type	273
	7.2.2.2 Other Factors of Influence	276
	7.2.2.3 Comparison with Organic Solvents	277
7.2.3	Interaction Mechanism	278
	7.2.3.1 Effect on the Cell Membrane	279
	7.2.3.2 Accumulation inside the Cell	280
7.3	State of the Art	281
7.3.1	Asymmetric Reductions by Whole Cells in Ionic Liquids	282
7.3.2	Other Whole-Cell Biotransformations in Ionic Liquids	304
7.4	Prospects	308
	References	310

8 NONSOLVENT APPLICATIONS OF IONIC LIQUIDS IN BIOTRANSFORMATIONS **315**

Pablo Domínguez de María and Christina Kohlmann

8.1	Introduction	315
8.2	Ionic Liquids as Additives in Biotransformations	316
8.3	Ionic Liquids for Coating Enzymes: The ILCE Concept	318

8.4	Ionic Liquids Combined with Membranes and Biotransformations	321
8.5	Ionic Liquids Anchoring Substrates	321
8.6	Ionic Liquids and Bioelectrochemistry	324
	References	329

PART III IONIC LIQUIDS IN ORGANOCATALYSIS 331

9 IONIC LIQUIDS AS (CO-)SOLVENTS AND CO-CATALYSTS FOR ORGANOCATALYTIC REACTIONS 333

Štefan Toma and Radovan Šebesta

9.1	Nontraditional Media in Organocatalysis	333
9.2	Early Organocatalytic Reactions in Ionic Liquids	334
9.3	Ionic Liquids as Solvents for Organocatalytic Reactions	335
9.3.1	Aldol Reactions	335
9.3.2	Mannich Reactions	341
9.3.3	α -Amination and Aminoxylation of Carbonyl Compounds	342
9.3.4	Michael Additions	343
9.3.5	Miscellaneous Reactions	351
9.4	Ionic Liquids as Co-catalysts for Organocatalytic Reactions: Toward New Reactivities and Selectivities	353
9.5	Key Factors in Choosing Ionic Liquids for Organocatalysis and Prospects	355
	References	356

10 "NONSOLVENT" APPLICATIONS OF IONIC LIQUIDS IN ORGANOCATALYSIS 361

Michelangelo Gruttadauria, Francesco Giacalone,

Paola Agrigento, and Renato Noto

10.1	Introduction	361
10.2	Immobilizing Ionic Liquids and Organocatalysts	363
10.2.1	Strategy 1a: Covalently Attached "Ionic Liquid" Moieties as Supports	363
10.2.2	Strategy 1b: Covalently Attached "Ionic Liquid" Moieties as Linkers	369
10.2.3	Strategy 1c: Covalently Attached "Ionic Liquid" Moieties as Organocatalysts	372
10.3	Anchoring of Organocatalyst to Ionic Liquids	378
10.3.1	Aldol Reactions	379
10.3.2	Michael Reactions	393

10.3.3 Morita–Baylis–Hillman Reaction and Claisen–Schmidt Reaction	4
10.4 Ionic Liquids as Organocatalysts	4
10.5 Conclusions	4
References	4
