<b>1 Preparation . . . . .</b>	<b>1</b>
Choosing a topic for study . . . . .	3
Ecological research questions . . . . .	4
Monitoring individual species and groups of species . . . . .	4
Monitoring species richness . . . . .	5
Monitoring population sizes and density . . . . .	5
Monitoring community structure . . . . .	6
Monitoring behaviour . . . . .	6
A note of caution . . . . .	6
Creating aims, objectives and hypotheses . . . . .	7
Reviewing the literature . . . . .	8
Primary literature . . . . .	9
Secondary literature . . . . .	9
Other sources of information . . . . .	9
Search terms . . . . .	10
Reading papers . . . . .	10
Practical considerations . . . . .	11
Legal aspects . . . . .	11
Health and safety issues . . . . .	12
Implementation . . . . .	13
Time management . . . . .	16
Project design and data management . . . . .	18
Designing and setting up experiments and surveys . . . . .	20
Types of data . . . . .	20
Sampling designs . . . . .	22
Planning statistical analysis . . . . .	28
Choosing sampling methods . . . . .	33
Summary . . . . .	34

<b>2</b>	<b>Monitoring site characteristics</b> . . . . .	<b>35</b>
	Site selection . . . . .	35
	Site characterisation . . . . .	36
	Habitat mapping . . . . .	36
	Examination of landscape scale . . . . .	41
	Measuring microclimatic variables . . . . .	42
	Monitoring substrates . . . . .	45
	Monitoring water . . . . .	51
	Other physical attributes . . . . .	54
	Measuring biological attributes . . . . .	56
	Identification . . . . .	58
<b>3</b>	<b>Sampling static organisms</b> . . . . .	<b>67</b>
	Sampling techniques for static organisms . . . . .	70
	Quadrat sampling . . . . .	73
	Pin-frames . . . . .	83
	Transects . . . . .	84
	Distribution of static organisms . . . . .	88
	Forestry techniques . . . . .	90
<b>4</b>	<b>Sampling mobile organisms</b> . . . . .	<b>95</b>
	General issues . . . . .	96
	Distribution of mobile organisms . . . . .	97
	Direct observation . . . . .	97
	Behaviour . . . . .	98
	Indirect methods . . . . .	103
	Capture techniques . . . . .	104
	Marking individuals . . . . .	106
	Radio-tracking . . . . .	108
	Invertebrates . . . . .	111
	Direct observation . . . . .	112
	Indirect methods . . . . .	114
	Capture techniques . . . . .	115
	Marking individuals . . . . .	117
	Capturing aquatic invertebrates . . . . .	121
	Netting . . . . .	123
	Suction sampling . . . . .	127
	Benthic coring . . . . .	128
	Drags, dredges and grabs . . . . .	128
	Wet extraction . . . . .	129
	Artificial substrate samplers . . . . .	131
	Baited traps . . . . .	132
	Capturing soil-living invertebrates . . . . .	133
	Dry sieving . . . . .	133
	Floatation and phase-separation . . . . .	134
	Tullgren funnels as a method of dry extraction . . . . .	134

Chemical extraction . . . . .	137
Electrical extraction . . . . .	138
Capturing ground-active invertebrates . . . . .	139
Pitfall traps . . . . .	139
Suction samplers . . . . .	148
Emergence traps . . . . .	150
Capturing invertebrates from plants . . . . .	152
Pootering . . . . .	153
Sweep netting . . . . .	154
Beating . . . . .	156
Fogging . . . . .	156
Capturing airborne invertebrates . . . . .	158
Sticky traps . . . . .	161
Using attractants . . . . .	162
Refuges . . . . .	165
Flight interception (window and malaise) traps . . . . .	165
Light traps . . . . .	167
Rotary traps . . . . .	172
Water traps . . . . .	172
Fish . . . . .	174
Direct observation . . . . .	176
Indirect methods . . . . .	176
Capture techniques . . . . .	177
Marking individuals . . . . .	181
Amphibians . . . . .	184
Direct observation . . . . .	186
Indirect methods . . . . .	187
Capture techniques . . . . .	187
Marking individuals . . . . .	192
Reptiles . . . . .	193
Direct observation . . . . .	193
Indirect methods . . . . .	194
Capture techniques . . . . .	195
Marking individuals . . . . .	199
Birds . . . . .	200
Direct observation . . . . .	201
Indirect methods . . . . .	209
Capture techniques . . . . .	211
Marking individuals . . . . .	213
Mammals . . . . .	216
Direct observation . . . . .	217
Indirect methods . . . . .	219
Capture techniques . . . . .	225
Marking individuals . . . . .	233

<b>5</b>	<b>Analysing and interpreting information</b>	<b>235</b>
	Keys to tests	238
	Exploring and describing data	244
	Transforming and screening data	244
	Spatial and temporal distributions	252
	Population estimation techniques: densities and population sizes	252
	Richness and diversity	256
	Similarity, dissimilarity and distance coefficients	258
	Recording descriptive statistics	261
	Testing hypotheses using basic statistical tests and simple general linear models	261
	Differences between samples	265
	Relationships between variables	269
	Associations between frequency distributions	274
	More advanced general linear models for predictive analysis	276
	Multiple regression	276
	Analysis of covariance and multivariate analysis of variance	277
	Discriminant function analysis	279
	Generalized linear models	280
	Extensions of the generalized linear model	285
	Statistical methods to examine pattern and structure in communities:	
	classification, indicator species and ordination	286
	Classification	287
	Indicator species analysis	292
	Ordination	294
<b>6</b>	<b>Presenting the information</b>	<b>305</b>
