

CONTENTS

Preface	ix
Glossary	xi
Abbreviations	xvii
1 The preparation of solutions in bioscience research	1
1.1 Introduction	1
1.2 Concentration	2
1.3 Using balances to weigh out reagents	3
1.4 Practical considerations when making a 1.0 M solution	6
1.5 Dilutions and the use of pipettes	11
1.6 Water, acids and bases	15
1.7 Buffers	21
1.8 The equilibrium/dissociation constant (K_a) for an acid or base and the Henderson-Hasselbalch equation	24
1.9 Summary	26
2 Microscopy	27
2.1 Introduction	27
2.2 Microscopes – general principles	29
2.3 Principles of image formation	30
2.4 Light microscopy	32
2.5 Electron microscopy	46
2.6 Summary	49
3 Spectrophotometry	51
3.1 Introduction	51
3.2 The electromagnetic spectrum	51
3.3 The absorbance of light	54
3.4 Absorbtion spectrophotometry	56
3.5 The laws of the absorbance of light	57
3.6 The Beer Lambert law	61
3.7 Spectrophotometers	63
3.8 Applications of spectrophotometry in bioscience	68
3.9 Summary	73

4	Data analysis and presentation	74
4.1	Introduction	74
4.2	Statistical analysis of data: some key definitions	76
4.3	Distributions	79
4.4	Statistical comparison of data	85
4.5	Presentation, structure and organization of data in laboratory reports	94
4.6	Summary	100
5	The extraction and clarification of biological material	103
5.1	General introduction	103
5.2	Extraction	103
5.3	Extraction methods for animal and plant tissue	105
5.4	Extraction methods for bacteria	107
5.5	Clarification	108
5.6	Centrifugation techniques	115
5.7	Points of good practice in centrifugation	119
5.8	Summary	120
6	Electrophoresis of proteins and nucleic acids	121
6.1	General introduction	121
6.2	Separation of protein mixtures by gel electrophoresis	122
6.3	Other electrophoretic techniques applied to proteins	136
6.4	Separation of nucleic acids by gel electrophoresis	137
6.5	Applications of gel electrophoresis of nucleic acids	141
6.6	Summary	146
7	Chromatography	147
7.1	General introduction	147
7.2	The theory of chromatography	147
7.3	Factors to consider in chromatography	152
7.4	Methods used to elute samples in chromatography	153
7.5	Different types of chromatography and what properties can be used to separate molecules	153
7.6	Thin layer chromatography (TLC)	156
7.7	High pressure liquid chromatography (HPLC)	158
7.8	Gas liquid chromatography (GLC)	161
7.9	Ion exchange chromatography (IEX)	162
7.10	Size exclusion chromatography	164
7.11	Affinity chromatography	166
7.12	Summary	167

8 Cell culture techniques	169
8.1 Introduction	169
8.2 Growth and maintenance of cells in culture	174
8.3 Summary	192
Suggestions for further reading	195
Index	198
