PREFACE	xiii
ACKNOWLEDGMENTS	xv
1 HUMAN AND MICROBIAL WORLD	1
1.1 Prologue	1
1.2 Innovations in Microbiology for Human Welfare	1
1.2.1 Impact of Microbes on the Human Genome Project, 2	
1.2.2 Microbial Biosensors, 5	
1.2.3 Molecular Diagnostics, 7	
1.2.4 Nanomedicine, 13	
1.2.5 Personalized Medicine, 16	
1.2.6 Biowarfare, 21	
1.3 The Microbial World	24
1.3.1 Classification System, 25	
1.3.2 Viruses, Viroids, and Prions, 26	
1.3.3 Bacteria, 32	
1.3.4 Eucarya, 35	
1.3.5 Algae, 39	
1.3.6 Fungi, 44	
1.3.7 Protozoa, 47	
1.3.8 Microscopic Invertebrates, 51	
1.3.9 Microbial Interrelationships, 54	
1.3.10 Probiotic Microbes, 56	
1.4 Future Challenges: Metagenomics	57
References	60
2 GENE TECHNOLOGY: APPLICATIONS AND TECHNIQUES	65
2.1 Prologue	65
2.2 Introduction to Gene Technology	65
2.2.1 Genes and Bacteria, 67	
2.2.2 Reporter Genes, 68	
2.2.3 Recombinant DNA Pharmaceuticals, 69	
2.2.4 <i>In vitro</i> DNA Selection, 73	
2.3 Nucleic Acid Hybridization	75
2.3.1 Colony Blot and Southern Blot, 76	
2.3.2 Dot Blot and Zoo Blot, 77	

2.3.3	<i>In situ</i> Hybridization, 79	
2.3.4	Microarray Technology, 83	
2.3.5	Molecular Diagnostic Research, 87	
2.4	DNA Sequencing	88
2.4.1	Dideoxychain Termination Method, 89	
2.4.2	Automated DNA Sequencing, 90	
2.4.3	Maxam and Gilbert Method, 92	
2.4.4	Primer Walking, 96	
2.4.5	Contig Sequencing, 97	
2.4.6	Shotgun Sequencing, 97	
2.4.7	Importance of Sequencing, 99	
2.5	Polymerase Chain Reaction	99
2.6	Omics Technology and Microbes	103
2.6.1	Genomics: A Tool for Understanding Genes, 104	
2.6.2	Transcriptomics: A Tool for Deciphering Gene Function, 108	
2.6.3	Proteomics: A Tool to Unravel the Mysteries of Protein, 112	
2.6.4	Metabolomics: A Tool to Ultimately Understand the Whole Metabolome, 116	
2.6.5	Integration of Omics, 121	
2.7	Bioinformatics in Microbial Technology	124
2.8	Future Challenges: The Biochips	126
	References	137
3	MEDICAL MICROBIOLOGY AND MOLECULAR DIAGNOSTICS	151
3.1	Prologue	151
3.2	Microbial Biology	152
3.2.1	Morphology and Nature of Microorganisms, 152	
3.2.2	Use of Bergey's Manual and Identibacter Interactus, 154	
3.2.3	Bacterial Growth and Physiology, 154	
3.2.4	Antimicrobial Agents, 156	
3.2.5	Bacterial Genetic Variations, 158	
3.2.6	Bacterial Pathogenicity, 158	
3.2.7	Virus-Cell Interaction, 159	
3.3	Infection and Immunity	160
3.3.1	Overview of the Immune System, 160	
3.3.2	The Organs of the Immune System, 161	
3.3.3	Cells of the Immune System, 162	
3.3.4	Innate Immunity, 164	
3.3.5	Adaptive Immunity, 165	
3.3.6	Hypersensitivity, 180	
3.3.7	Immunity in Viral Infections, 183	
3.4	Bacterial Pathogens and Associated Diseases	185
3.4.1	Airborne Bacterial Infections, 186	
3.4.2	Foodborne and Waterborne Diseases, 190	
3.4.3	Soilborne Bacterial Infections, 198	

3.4.4	Arthropodborne Bacterial Infections, 200	
3.4.5	Sexually Transmitted Bacterial Infections, 201	
3.4.6	Other Important Bacterial Diseases, 203	
3.4.7	Actinomycetes Mycetoma, 204	
3.5	Viral Pathogens and Associated Diseases	209
3.5.1	Herpes Simplex Viruses, 210	
3.5.2	Varicella Zoster Virus, 210	
3.5.3	Cytomegalovirus, 210	
3.5.4	Epstein–Barr Virus, 211	
3.5.5	Human Herpes Virus, 211	
3.5.6	Hepatitis, 211	
3.5.7	Respiratory Syncytial Virus, 213	
3.5.8	Influenza Viruses, 214	
3.5.9	Parainfluenza Viruses, 215	
3.5.10	Adenoviruses, 215	
3.5.11	Rhinoviruses, 215	
3.5.12	Coronaviruses, 216	
3.5.13	SARS Virus, 216	
3.5.14	Diarrheal Viruses, 216	
3.5.15	Calicivirus (Sapovirus), 217	
3.5.16	Enterovirus, 217	
3.5.17	Poliomyelitis, 217	
3.5.18	Coxsackie, 217	
3.5.19	Echoviruses, 218	
3.5.20	Mumps, 218	
3.5.21	Measles Virus, 218	
3.5.22	Rubella, 219	
3.5.23	Parvovirus B, 219	
3.5.24	Human Immunodeficiency Viruses, 220	
3.5.25	Human T Cell Lymphotropic Viruses (HTLV), 222	
3.5.26	Papillomaviruses, 222	
3.5.27	Polyomaviruses, 223	
3.5.28	Rabies, 223	
3.5.29	Smallpox, 223	
3.5.30	Monkeypox, 224	
3.5.31	Vaccinia, 224	
3.5.32	Cowpox, 224	
3.5.33	Arthropodborne Viruses, 224	
3.5.34	Lymphocytic Choriomenigitis Virus, 226	
3.5.35	Filovirus, 226	
3.5.36	Hantaviruses, 227	
3.6	Prions	227
3.6.1	Kuru, 227	
3.6.2	Creutzfeldt–Jacob Disease (CJD), 227	
3.6.3	Gerstmann–Straussler Syndrome (GSS), 228	
3.7	Parasitic Infections	228
3.7.1	Nematoda, 229	

3.7.2	Trematoda, 232	
3.7.3	Cestoda, 234	
3.7.4	Protozoan Parasites, 236	
3.7.5	Skin Parasites, 248	
3.8	Fungal Pathogen	249
3.8.1	Superficial Fungal Infections, 249	
3.8.2	Systemic Fungal Infections, 250	
3.9	Microbial Diagnostics	253
3.9.1	Immunodiagnostic Methods, 253	
3.9.2	Molecular Diagnostic Approaches, 258	
3.10	Future Challenges: Promises of Pharmacogenomics	265
	References	267

4	IDENTIFICATION AND CLASSIFICATION OF MICROBES	275
4.1	Prologue	275
4.2	Principles of Taxonomy	276
4.2.1	Strategies Used to Identify Microbes, 280	
4.2.2	Methods for Bacterial Identification, 281	
4.3	Using Phenotypic Characteristics to Identify Microbes	281
4.3.1	Microscopic Morphology, 283	
4.3.2	Metabolic Differences, 288	
4.3.3	Serology, 295	
4.3.4	Fatty Acid Analysis (FAME), 298	
4.4	Using Genotypic Character to Identify Microbes	299
4.4.1	Nucleic Acid Probes to Detect Specific Nucleotide Sequence, 300	
4.4.2	Amplifying Specific DNA Sequences Using PCR, 301	
4.4.3	Sequencing Ribosomal RNA Genes, 302	
4.5	Characterizing Strain Differences	306
4.5.1	Phenotypic Typing Methods, 306	
4.5.2	Molecular Typing Methods, 315	
4.6	Classification of Microbes on the Basis of Phenotypic Characteristics	319
4.6.1	Carbohydrate Utilization, 322	
4.6.2	Enzyme Production, 322	
4.6.3	Mode of Growth, 323	
4.6.4	Motility, 323	
4.6.5	Antigen and Phage Susceptibility, 324	
4.7	Classification of Microbes on the Basis of Genotypic Characters	324
4.7.1	DNA Base Ratio (G + C Ratio), 325	
4.7.2	DNA Hybridization, 326	
4.7.3	Nucleotide Sequence Analysis, 330	
4.7.4	Comparing the Sequence of 16S Ribosomal Nucleic Acid, 331	
4.8	Future Challenges: Aptamers for Detection of Pathogens	333
	References	334

5 DIVERSITY OF MICROORGANISMS	339
5.1 Prologue	339
5.2 Physiological Diversity of Microorganisms	339
5.2.1 Anaerobic Chemotrophs, 340	
5.2.2 Anoxygenic Phototrophs, 340	
5.2.3 Oxygenic Phototrophs, 342	
5.2.4 Aerobic Chemolithotrophs, 343	
5.2.5 Aerobic Chemoorganotrophs, 344	
5.3 Thriving in Terrestrial Environment	345
5.3.1 Microbial Population Counts in Soil, 346	
5.3.2 Bacteria that Form a Resting Stage, 348	
5.3.3 Bacteria that Associate with Plants, 349	
5.3.4 Isolation of Antibiotic-Producing Bacteria from Soil, 351	
5.4 Aquatic Environment	353
5.4.1 Sheathed Bacteria, 353	
5.4.2 Prostheated Bacteria, 354	
5.4.3 Bacteria that Derive their Nutrients from Other Organisms, 357	
5.4.4 Bacteria that Move by Unusual Mechanisms, 358	
5.4.5 Bacteria that Form Storage Granules, 359	
5.4.6 Bacteriological Examination of Water—Qualitative Tests, 360	
5.4.7 Membrane Filter Method, 361	
5.4.8 Standard Plate Count—Quantitative Test, 363	
5.5 Animals as Habitat	364
5.5.1 Bacteria that Inhabit the Skin, 365	
5.5.2 Bacteria that Inhabit the Mucous Membrane, 366	
5.5.3 Obligate Intracellular Parasites, 367	
5.6 Archaea in Extreme Environments	368
5.6.1 Extreme Halophiles, 369	
5.6.2 Extreme Thermophiles, 371	
5.6.3 Thermophilic Extreme Acidophiles, 372	
5.7 Biogeochemical Cycles	373
5.7.1 Various Cycles, 376	
5.7.2 Consequences of Biogeochemical Cycles Gone Wild, 376	
5.8 Environmental Influence and Control of Microbial Growth	377
5.8.1 Temperature, 378	
5.8.2 Osmotic Pressure, 379	
5.8.3 UV Light, 381	
5.8.4 pH, 382	
5.8.5 Oligodynamic Action, 384	
5.9 Microorganisms and Organic Pollutants	385
5.9.1 Environmental Law, 386	
5.9.2 Process of Biodegradation, 387	
5.9.3 Relationship between Contaminant Structure, Toxicity, and Biodegradability, 389	
5.9.4 Environmental Factors, 391	

5.9.5	Biodegradation of Organic Pollutants, 392	
5.9.6	Bioremediation, 394	
5.10	Microorganisms and Metal Pollutants	396
5.10.1	Metals Defined, 398	
5.10.2	Metal Toxicity Effect on Microbial Cells, 399	
5.10.3	Mechanism of Microbial Metal Resistance and Detoxification, 400	
5.10.4	Metal-Microbe Interaction, 402	
5.10.5	Microbial Approaches in Remediation of Metal-Contaminated Soil and Sediments, 403	
5.11	Environmentally Transmitted Pathogens	405
5.11.1	Transmission of Pathogen, 405	
5.11.2	Indicator Organisms in Polluted Water, 431	
5.11.3	Microbiology of Sewage Treatment, 449	
5.12	Microorganisms as Friends of Man	453
5.12.1	Microbes to Join the Oil Industry, 454	
5.12.2	Microbes and Biodiesel: Production and Feedstocks, 455	
5.12.3	Genetic Modification of Lignin Biosynthesis for Improved Biofuel Production, 457	
5.12.4	Microbes and Biogas Production, 459	
5.12.5	Biosensors for Environmental Monitoring, 460	
5.12.6	Microbes as Mining Agents, 462	
5.12.7	Microbial Fuel Cells, 464	
5.12.8	Microbes as a Source of Bioenergy, 466	
5.13	Microbes as a Disastrous Enemy	468
5.13.1	Microbes as Biowarfare Agents, 470	
5.14	Future Challenges: Microbes in the Space	472
	References	475

6 MICROBES IN AGRICULTURE 481

6.1	Prologue	481
6.2	The Soil Plant Microorganisms	482
6.2.1	Soil Fertility, 483	
6.2.2	Rhizosphere Environment, 488	
6.2.3	Ammonification in Soil, 491	
6.2.4	Nitrification in Soil, 493	
6.2.5	Organic Compounds Released by Plants, 495	
6.2.6	Nitrogen-Fixing Bacteria, 495	
6.3	Root Microbial Interaction	500
6.3.1	Biological Dinitrogen Fixation, 504	
6.3.2	Free-Living Dinitrogen Fixation, 505	
6.3.3	Associative Nitrogen Fixation, 506	
6.3.4	Legume-Rhizobia Symbioses, 507	
6.3.5	Mycorrhizal Association, 507	

6.4 Pathogenic Microbes in Agriculture	508
6.4.1 Microbes and Agriculture, 510	
6.4.2 Biopesticides, 512	
6.4.3 Commercial Microbial Pesticides, 514	
6.4.4 Bioweedicides, 518	
6.4.5 Diseases Caused by Bacteria, 519	
6.4.6 Diseases Caused by Virus, 525	
6.4.7 Soil Biological Control and Plant Diseases, 528	
6.5 Microbes as a Tool of Genetic Engineering	535
6.5.1 <i>Agrobacterium</i> : The Friendly Bacteria, 536	
6.5.2 Transformation Technology: Refined Tools for Genetic Transformation, 537	
6.5.3 Transgenic Cellulosic Biofuel Crops, 541	
6.5.4 Expression of Microbial Enzymes in Crops, 545	
6.5.5 Genetic Transformation for Crop Improvement: Biotic Stress Tolerance, 547	
6.5.6 Genetic Transformation for Crop Improvement: Altering Plant Development, 552	
6.5.7 Genomics: Gene Mining and Gene Expression Profiling, 554	
6.6 Future Challenges: Functional Genomics Approach for Improvement of Crops	557
References	560

7 MICROBES AS A TOOL FOR INDUSTRY AND RESEARCH	567
7.1 Prologue	567
7.2 Historical Development	567
7.2.1 Era of Pasteur and Fermentation, 568	
7.2.2 Discovery of Antibiotics, 572	
7.2.3 Growth of Industrial Fermentation, 573	
7.2.4 Production of Strains, 576	
7.2.5 Strain Development, 577	
7.3 Clinical Diagnostics in a New Era	578
7.3.1 Genes and Diseases, 579	
7.3.2 Biomedical Research in the Postgenomic Era, 582	
7.3.3 Molecular Diagnostics Technology and Health Care Industries, 586	
7.3.4 Therapeutic Applications of rDNA Pharmaceuticals, 593	
7.3.5 Aptamers as Therapeutics, 595	
7.3.6 Immunodiagnostics, 599	
7.3.7 Reporter Genes in Molecular Diagnostics, 602	
7.3.8 Human Genome Project and Health Services, 604	
7.3.9 Prognostics, Diagnostics, and Therapeutics of Disease-Causing Pathogens, 607	
7.3.10 Promise of Pharmacogenomics, 611	
7.4 Industrial Microorganisms and Product Formation	615
7.4.1 Microorganisms and Their Products, 616	

7.4.2 Primary and Secondary Metabolites, 617	
7.4.3 Characteristics of Large-Scale Fermentation, 619	
7.4.4 Fermentation Scale-Up, 621	
7.5 Major Industrial Products for Health and Industry	622
7.5.1 Immobilized Enzymes, 623	
7.5.2 Antibiotics, 626	
7.5.3 Organic Acids, 632	
7.5.4 Enzymes, 635	
7.5.5 Solvents, 637	
7.5.6 Amino Acids, 638	
7.5.7 Vitamins, 640	
7.5.8 Yeast, 641	
7.5.9 Single Cell Protein, 643	
7.5.10 Fermented Food, 645	
7.5.11 Mushroom, 647	
7.5.12 Beverages, 647	
7.6 Food Diagnostics, Food Preservation, and Foodborne Microbial Diseases	649
7.6.1 Food Preservation and Microbial Growth, 650	
7.6.2 Microbial Sampling and Food Poisoning, 662	
7.6.3 Food Diagnostics, 666	
7.7 Future Challenges: Next Generation Diagnostics Industry	680
