List of Figures, xvii
List of Color Plates, xxi
Preface, xxiii
Abbreviations, xxv

1. Introduction, 1

1.1. Historical Background, 1

1.2. Advantages of Tissue Culture, 6

- 1.2.1. Control of the Environment, 6
- 1.2.2. Characterization and Homogeneity of Sample, 6
- 1.2.3. Economy, Scale, and Mechanization, 6
- 1.2.4. *In Vitro* Modeling of *In Vivo* Conditions, 7

1.3. Limitations, 7

- 1.3.1. Expertise, 7
- 1.3.2. Quantity, 7
- 1.3.3. Dedifferentiation and Selection, 7
- 1.3.4. Origin of Cells, 7
- 1.3.5. Instability, 7

1.4. Major Differences *In Vitro*, 7

1.5. Types of Tissue Culture, 8

2. Training Programs, 11

2.1. Objectives, 11

2.2. Basic Exercises, 11

- Exercise 1 Aseptic Technique I: Pipetting and Transfer of Fluids, 13*
- Exercise 2 Introduction to Cell Cultures, 14*

Exercise 3 Aseptic Technique II: Preparing Medium for Use, 15

Exercise 4 Feeding a Monolayer Culture, 15

Exercise 5 Washing and Sterilizing Glassware, 16

Exercise 6 Preparation and Sterilization of Water, 16

Exercise 7 Preparation and Sterilization of Dulbecco's Phosphate-Buffered Saline (D-PBS) without Ca^{2+} and Mg^{2+} (D-PBSA), 17

Exercise 8 Preparation of pH Standards, 17

Exercise 9 Preparation of Stock Medium from Powder and Sterilization by Filtration, 18

Exercise 10 Preparation of Complete Medium from 10 $\times$ Stock, 18

Exercise 11 Preparation of Complete Medium from Powder, 19

Exercise 12 Counting Cells by Hemocytometer and Electronic Counter, 19

Exercise 13 Subculture of Cells Growing in Suspension, 20

Exercise 14 Subculture of Continuous Cell Line Growing in Monolayer, 22

Exercise 15 Staining a Monolayer Cell Culture with Giemsa, 23

Exercise 16 Construction and Analysis of Growth Curve, 23

2.3. Advanced Exercises, 24

Exercise 17 Cryopreservation of Cultured Cells, 25

Exercise 18 Detection of Mycoplasma, 25

Exercise 19 Cell Line Characterization, 27

Exercise 20 Primary Culture, 28

Exercise 21 Cloning of Monolayer Cells, 29

2.4. Specialized Exercises, 30

3. Biology of Cultured Cells, 31

- 3.1. The Culture Environment, 31**
- 3.2. Cell Adhesion, 31**
 - 3.2.1. Cell Adhesion Molecules, 31
 - 3.2.2. Intercellular Junctions, 32
 - 3.2.3. Extracellular Matrix, 33
 - 3.2.4. Cytoskeleton, 33
 - 3.2.5. Cell Motility, 34
- 3.3. Cell Proliferation, 34**
 - 3.3.1. Cell Cycle, 34
 - 3.3.2. Control of Cell Proliferation, 35
- 3.4. Differentiation, 35**
 - 3.4.1. Maintenance of Differentiation, 35
 - 3.4.2. Dedifferentiation, 37
- 3.5. Cell Signaling, 38**
- 3.6. Energy Metabolism, 39**
- 3.7. Initiation of the Culture, 39**
- 3.8. Evolution of Cell Lines, 40**
 - 3.8.1. Senescence, 41
- 3.9. The Development of Continuous Cell Lines, 41**
- 3.10. Origin of Cultured Cells, 42**

4. Laboratory Design and Layout, 43

- 4.1. Planning, 43**
- 4.2. Construction and Services, 44**
- 4.3. Layout of Aseptic Room or Suite, 47**
 - 4.3.1. Sterile Handling Area, 48
 - 4.3.2. Laminar Flow, 48
 - 4.3.3. Quarantine and Containment, 48
 - 4.3.4. Service Bench, 48
- 4.4. Incubation, 48**
 - 4.4.1. Incubators, 48
 - 4.4.2. Hot Room, 48
- 4.5. Preparation Area, 51**
 - 4.5.1. Media Preparation, 51
 - 4.5.2. Washup, 51
 - 4.5.3. Storage, 51

5. Equipment, 55

- 5.1. Requirements of A Tissue Culture Laboratory, 55**
- 5.2. Aseptic Area, 55**
 - 5.2.1. Laminar-Flow Hood, 55
 - 5.2.2. Pipette Cylinders, 56
 - 5.2.3. Aspiration Pump, 57
 - 5.2.4. Service Carts, 57
 - 5.2.5. Inverted Microscope, 58
 - 5.2.6. Centrifuge, 58
 - 5.2.7. Sterile Liquid Handling—Pipetting and Dispensing, 58
 - 5.2.8. Cell Counter, 61

- 5.2.9. CCD Camera and Monitor, 62
- 5.2.10. Dissecting Microscope, 63

5.3. Incubation, 63

- 5.3.1. Incubator, 63
- 5.3.2. Humid CO₂ Incubator, 63
- 5.3.3. Temperature Recorder, 64
- 5.3.4. Roller Racks, 64
- 5.3.5. Magnetic Stirrer, 65

5.4. Preparation and Sterilization, 65

- 5.4.1. Washup, 65
- 5.4.2. Water Purifier, 65
- 5.4.3. Sterilizing and Drying Ovens, 66
- 5.4.4. Steam Sterilizer (Autoclave), 66
- 5.4.5. Balances, 68
- 5.4.6. pH Meter, 68
- 5.4.7. Hot Plate Magnetic Stirrer, 68
- 5.4.8. Automatic Dispensers, 68
- 5.4.9. Conductivity Meter, 68
- 5.4.10. Osmometer, 68
- 5.4.11. Glassware Washing Machine, 68

5.5. Storage, 69

- 5.5.1. Refrigerators and Freezers, 69
- 5.5.2. Cryostorage Containers, 69
- 5.5.3. Controlled-Rate Freezer, 70

5.6. Laboratory Backup, 70

- 5.6.1. Computers and Networks, 70
- 5.6.2. Upright Microscope, 70
- 5.6.3. Low-Temperature Freezer, 70
- 5.6.4. Confocal Microscope, 70
- 5.6.5. PCR Cycler, 71

5.7. Specialized Equipment, 71

- 5.7.1. Microinjection Facilities, 71
- 5.7.2. Colony Counter, 71
- 5.7.3. Centrifugal Elutriator, 71
- 5.7.4. Flow Cytometer, 71

5.8. Consumable Items, 71

- 5.8.1. Pipettes, 71
- 5.8.2. Hemocytometer, 72
- 5.8.3. Culture Vessels, 72
- 5.8.4. Sterile Containers, 72
- 5.8.5. Syringes and Needles, 72
- 5.8.6. Sterilization Filters, 72
- 5.8.7. Paper Towels and Swabs, 72
- 5.8.8. Disinfectants, 72

6. Aseptic Technique, 73**6.1. Objectives of Aseptic Technique, 73**

- 6.1.1. Maintaining Sterility, 73

6.2. Elements of Aseptic Environment, 74

- 6.2.1. Quiet Area, 74
- 6.2.2. Work Surface, 74
- 6.2.3. Personal Hygiene, 76
- 6.2.4. Reagents and Media, 76
- 6.2.5. Cultures, 76

6.3. Sterile Handling, 76

- 6.3.1. Swabbing, 76
- 6.3.2. Capping, 76
- 6.3.3. Flaming, 76
- 6.3.4. Handling Bottles and Flasks, 77
- 6.3.5. Pipetting, 77
- 6.3.6. Pouring, 78

6.4. Laminar Flow, 78**6.5. Standard Procedure, 79**

Protocol 6.1. Aseptic Technique in Vertical Laminar Flow, 80

Protocol 6.2. Working on the Open Bench, 82

- 6.5.1. Petri Dishes and Multiwell Plates, 83

Protocol 6.3. Handling Dishes or Plates, 83

6.6. Apparatus and Equipment, 84

- 6.6.1. Incubators, 84
- 6.6.2. Boxed Cultures, 84
- 6.6.3. Gassing with CO₂, 85

7. Safety, Bioethics, and Validation, 87**7.1. Laboratory Safety, 87****7.2. Risk Assessment, 87****7.3. Standard Operating Procedures, 87****7.4. Safety Regulations, 89****7.5. General Safety, 89**

- 7.5.1. Operator, 89
- 7.5.2. Equipment, 89
- 7.5.3. Glassware and Sharp Items, 90
- 7.5.4. Chemical Toxicity, 91
- 7.5.5. Gases, 92
- 7.5.6. Liquid Nitrogen, 92
- 7.5.7. Burns, 93

7.6. Fire, 93**7.7. Ionizing Radiation, 93**

- 7.7.1. Ingestion, 94
- 7.7.2. Disposal of Radioactive Waste, 94
- 7.7.3. Irradiation from Labeled Reagents, 95
- 7.7.4. Irradiation from High-Energy Sources, 95

7.8. Biohazards, 95

- 7.8.1. Levels of Biological Containment, 95
- 7.8.2. Microbiological Safety Cabinets, 95
- 7.8.3. Human Biopsy Material, 97
- 7.8.4. Genetic Manipulation, 100
- 7.8.5. Disposal of Biohazardous Waste, 100
- 7.8.6. Fumigation, 100

7.9. Bioethics, 101

- 7.9.1. Animal Tissue, 101
- 7.9.2. Human Tissue, 101

7.10. Validation, 102

- 7.10.1. Authentication, 103
- 7.10.2. Provenance, 103
- 7.10.3. Contamination, 103

8. Culture Vessels and Substrates, 105**8.1. The Substrate, 105**

- 8.1.1. Attachment and Growth, 105
- 8.1.2. Substrate Materials, 105

8.2. Choice of Culture Vessel, 106

- 8.2.1. Cell Yield, 106
- 8.2.2. Suspension Culture, 108
- 8.2.3. Venting, 108
- 8.2.4. Sampling and Analysis, 109
- 8.2.5. Uneven Growth, 109
- 8.2.6. Cost, 109

8.3. Specialized Systems, 110

- 8.3.1. Permeable Supports, 110

8.4. Treated Surfaces, 110

- 8.4.1. Matrix Coating, 110

Protocol 8.1. Preparation of ECM, 111

- 8.4.2. Feeder Layers, 111
- 8.4.3. Three-Dimensional Matrices, 112
- 8.4.4. Metallic Substrates, 113
- 8.4.5. Nonadhesive Substrates, 113

9. Defined Media and Supplements, 115**9.1. Development of Media, 115****9.2. Physicochemical Properties, 115**

- 9.2.1. pH, 115

Protocol 9.1. Preparation of pH Standards, 116

- 9.2.2. CO₂ and Bicarbonate, 116
- 9.2.3. Buffering, 117
- 9.2.4. Oxygen, 117
- 9.2.5. Osmolality, 118
- 9.2.6. Temperature, 118
- 9.2.7. Viscosity, 119
- 9.2.8. Surface Tension and Foaming, 119

9.3. Balanced Salt Solutions, 119**9.4. Complete Media, 120**

- 9.4.1. Amino Acids, 120
- 9.4.2. Vitamins, 120
- 9.4.3. Salts, 120
- 9.4.4. Glucose, 123
- 9.4.5. Organic Supplements, 123
- 9.4.6. Hormones and Growth Factors, 123
- 9.4.7. Antibiotics, 123

9.5. Serum, 123

- 9.5.1. Protein, 123
- 9.5.2. Growth Factors, 124
- 9.5.3. Hormones, 124
- 9.5.4. Nutrients and Metabolites, 124
- 9.5.5. Lipids, 125
- 9.5.6. Minerals, 125
- 9.5.7. Inhibitors, 125

9.6. Selection of Medium and Serum, 125

- 9.6.1. Batch Reservation, 127

- 9.6.2. Testing Serum, 127
- 9.6.3. Heat Inactivation, 127

9.7. Other Supplements, 127

- 9.7.1. Amino Acid Hydrolysates, 127
- 9.7.2. Embryo Extract, 127
- 9.7.3. Conditioned Medium, 128

10. Serum-Free Media, 129

10.1. Disadvantages of Serum, 129

10.2. Advantages of Serum-Free Media, 134

- 10.2.1. Selective Media, 134
- 10.2.2. Regulation of Proliferation and Differentiation, 134

10.3. Disadvantages of Serum-Free Media, 134

10.4. Replacement of Serum, 134

- 10.4.1. Serum-Free Subculture, 134
- 10.4.2. Hormones, 135
- 10.4.3. Growth Factors, 135
- 10.4.4. Nutrients in Serum, 135
- 10.4.5. Proteins and Polyamines, 135
- 10.4.6. Matrix, 139

10.5. Selection of Serum-Free Medium, 139

- 10.5.1. Commercially Available Serum-Free Media, 139
- 10.5.2. Serum Substitutes, 141
- 10.5.3. Adaptation to Serum-Free Media, 142

10.6. Development of Serum-Free Medium, 142

10.7. Preparation of Serum-Free Medium, 142

10.8. Protein-Free Media, 143

10.9. Conclusions, 143

11. Preparation and Sterilization, 145

11.1. Preparation of Reagents and Materials, 145

11.2. Sterilization of Apparatus and Liquids, 145

11.3. Apparatus, 146

- 11.3.1. Glassware, 146
 - Protocol 11.1. Preparation and Sterilization of Glassware, 147*
- 11.3.2. Glass Pipettes, 149
 - Protocol 11.2. Preparation and Sterilization of Glass Pipettes, 150*
- 11.3.3. Screw Caps, 151
 - Protocol 11.3. Preparation and Sterilization of Screw Caps, 153*
- 11.3.4. Selection of Detergent, 153
- 11.3.5. Miscellaneous Equipment, 154
- 11.3.6. Reusable Sterilizing Filters, 154
 - Protocol 11.4. Sterilizing Filter Assemblies, 154*

11.4. Reagents and Media, 155

- 11.4.1. Water, 155
 - Protocol 11.5. Preparation and Sterilization of Ultrapure Water (UPW), 156*
- 11.4.2. Balanced Salt Solutions, 157

Protocol 11.6. Preparation and Sterilization of D-PBSA, 157

- 11.4.3. Preparation and Sterilization of Media, 158

Protocol 11.7. Preparation of Medium from 1× Stock, 158

Protocol 11.8. Preparation of Medium from 10× Concentrate, 159

- 11.4.4. Powdered Media, 161

Protocol 11.9. Preparation of Medium from Powder, 161

- 11.4.5. Customized Medium, 162

Protocol 11.10. Preparation of Customized Medium, 162

11.5. Sterilization of Media, 162

- 11.5.1. Autoclavable Media, 162
- 11.5.2. Sterile Filtration, 163

Protocol 11.11. Sterile Filtration with Syringe-Tip Filter, 163

Protocol 11.12. Sterile Filtration with Vacuum Filter Flask, 164

Protocol 11.13. Sterile Filtration with Small In-Line Filter, 166

Protocol 11.14. Sterile Filtration with Large In-Line Filter, 167

- 11.5.3. Serum, 168

Protocol 11.15. Collection and Sterilization of Serum, 168

Protocol 11.16. Dialysis of Serum, 171

- 11.5.4. Preparation and Sterilization of Other Reagents, 171

11.6. Control, Testing, and Storage of Media, 171

- 11.6.1. Quality Control, 171
- 11.6.2. Sterility Testing, 171
- 11.6.3. Culture Testing, 172
- 11.6.4. Storage, 173

12. Primary Culture, 175

12.1. Types of Primary Cell Culture, 175

12.2. Isolation of the Tissue, 176

- 12.2.1. Mouse Embryo, 176
 - Protocol 12.1. Isolation of Mouse Embryos, 176*
- 12.2.2. Chick Embryo, 177
 - Protocol 12.2. Isolation of Chick Embryos, 177*
- 12.2.3. Human Biopsy Material, 178
 - Protocol 12.3. Human Biopsies, 180*

12.3. Primary Culture, 182

- 12.3.1. Primary Explant, 182
 - Protocol 12.4. Primary Explants, 182*
- 12.3.2. Enzymatic Disaggregation, 184
- 12.3.3. Warm Trypsin, 185
 - Protocol 12.5. Tissue Disaggregation in Warm Trypsin, 185*
- 12.3.4. Trypsinization with Cold Preexposure, 187

- Protocol 12.6. Tissue Disaggregation in Cold Trypsin*, 187
- 12.3.5. Chick Embryo Organ Rudiments, 189
- Protocol 12.7. Chick Embryo Organ Rudiments*, 189
- 12.3.6. Other Enzymatic Procedures, 192
- 12.3.7. Collagenase, 192
- Protocol 12.8. Tissue Disaggregation in Collagenase*, 192
- 12.3.8. Mechanical Disaggregation, 195
- Protocol 12.9. Mechanical Disaggregation by Sieving*, 195
- 12.3.9. Separation of Viable and Nonviable Cells, 195
- Protocol 12.10. Enrichment of Viable Cells*, 197
- 12.3.10. Primary Culture in Summary, 197
- 12.3.11. Primary Records, 197

13. Subculture and Cell Lines, 199

- 13.1. Subculture and Propagation, 199
- 13.2. Terminology, 199
- 13.3. Culture Age, 201
- 13.4. Cell Line Designations, 204
- 13.5. Choosing a Cell Line, 204
- 13.6. Routine Maintenance, 205
- 13.6.1. Significance of Cell Morphology, 205
- 13.6.2. Replacement of Medium, 205
- Protocol 13.1. Feeding a Monolayer Culture*, 206
- 13.7. Subculture, 207
- 13.7.1. Criteria for Subculture, 207
- Protocol 13.2. Subculture of Monolayer Cells*, 209
- 13.7.2. Growth Cycle and Split Ratios, 211
- 13.7.3. Cell Concentration at Subculture, 212
- 13.7.4. Propagation in Suspension, 212
- 13.7.5. Subculture of Cells Growing in Suspension, 212
- Protocol 13.3. Subculture in Suspension*, 213
- 13.7.6. Standardization of Culture Conditions, 214
- 13.7.7. Use of Antibiotics, 216
- 13.7.8. Maintenance Records, 216

14. Cloning and Selection, 217

- 14.1. Cell Cloning, 217
- Protocol 14.1. Dilution Cloning*, 218
- 14.2. Stimulation of Plating Efficiency, 219
- 14.2.1. Conditions that Improve Clonal Growth, 219
- 14.2.2. Conditioned Medium, 221
- Protocol 14.2. Preparation of Conditioned Medium*, 222
- 14.2.3. Feeder Layers, 222
- Protocol 14.3. Preparation of Feeder Layers*, 222
- 14.3. Suspension Cloning, 223
- Protocol 14.4. Cloning in Agar*, 223

Protocol 14.5. Cloning in Methocel, 225

14.4. Isolation of Clones, 227

- Protocol 14.6. Isolation of Clones with Cloning Rings*, 227
- Protocol 14.7. Isolating Cell Colonies by Irradiation*, 228
- 14.4.1. Other Isolation Techniques for Monolayer Clones, 228
- 14.4.2. Suspension Clones, 230
- Protocol 14.8. Isolation of Suspension Clones*, 230

14.5. Replica Plating, 231

14.6. Selective Inhibitors, 231

14.7. Isolation of Genetic Variants, 232

Protocol 14.9. Methotrexate Resistance and DHFR Amplification, 232

14.8. Interaction with Substrate, 234

- 14.8.1. Selective Adhesion, 234
- 14.8.2. Selective Detachment, 234
- 14.8.3. Nature of Substrate, 234
- 14.8.4. Selective Feeder Layers, 235
- 14.8.5. Selection by Semisolid Media, 235

15. Cell Separation, 237

15.1. Cell Density and Isopyknic Sedimentation, 237

Protocol 15.1. Cell Separation by Centrifugation on a Density Gradient, 237

15.2. Cell Size and Sedimentation Velocity, 240

- 15.2.1. Unit Gravity Sedimentation, 240
- 15.2.2. Centrifugal Elutriation, 241

15.3. Antibody-Based Techniques, 241

- 15.3.1. Immune Panning, 241
- 15.3.2. Magnetic Sorting, 241

Protocol 15.2. Magnet-Activated Cell Sorting (MACS), 242

15.4. Fluorescence-Activated Cell Sorting, 244

15.5. Other Techniques, 245

15.6. Beginner's Approach to Cell Separation, 246

16. Characterization, 247

16.1. The Need for Characterization, 247

16.2. Record Keeping and Provenance, 247

16.3. Authentication, 247

- 16.3.1. Species Identification, 248
- 16.3.2. Lineage or Tissue Markers, 248
- 16.3.3. Unique Markers, 250
- 16.3.4. Transformation, 250

16.4. Cell Morphology, 250

- 16.4.1. Microscopy, 251

Protocol 16.1. Using an Inverted Microscope, 251

- 16.4.2. Staining, 252

Protocol 16.2. Staining with Giemsa, 252

Protocol 16.3. Staining with Crystal Violet, 252

- 16.4.3. Culture Vessels for Cytology: Monolayer Cultures, 253
- 16.4.4. Preparation of Suspension Culture for Cytology, 253
- Protocol 16.4. Preparation of Suspension Cells for Cytology by Cytoentrifuge, 253*
- Protocol 16.5. Filtration Cytology, 254*
- 16.4.5. Photomicrography, 260
- Protocol 16.6. Digital Photography on a Microscope, 261*
- 16.5. Chromosome Content, 262**
 - Protocol 16.7. Chromosome Preparations, 262*
 - 16.5.1. Chromosome Banding, 264
 - 16.5.2. Chromosome Analysis, 264
 - 16.5.3. Chromosome Painting, 265
- 16.6. DNA Content, 266**
 - 16.6.1. DNA Hybridization, 266
 - 16.6.2. DNA Fingerprinting, 266
 - Protocol 16.8. Multilocus DNA Fingerprinting of Cell Lines, 267*
 - 16.6.3. DNA Profiling, 270
 - Protocol 16.9. DNA STR Profiling of Cell Lines, 270*
- 16.7. RNA and Protein Expression, 273**
- 16.8. Enzyme Activity, 273**
 - 16.8.1. Isoenzymes, 274
 - 16.8.2. Isoenzyme Electrophoresis with Authentikit, 275
 - Protocol 16.10. Isoenzyme Analysis, 276*
- 16.9. Antigenic Markers, 278**
 - 16.9.1. Immunostaining, 278
 - Protocol 16.11. Indirect Immunofluorescence, 278*
 - 16.9.2. Immunoanalysis, 280
- 16.10. Differentiation, 280**

17. Differentiation, 281

- 17.1. Expression of the *In Vivo* Phenotype, 281**
 - 17.1.1. Dedifferentiation, 281
 - 17.1.2. Lineage Selection, 281
- 17.2. Stages of Differentiation, 282**
- 17.3. Proliferation and Differentiation, 282**
- 17.4. Commitment and Lineage, 282**
- 17.5. Stem Cell Plasticity, 283**
- 17.6. Markers of Differentiation, 284**
- 17.7. Induction of Differentiation, 284**
 - 17.7.1. Cell Interaction, 284
 - 17.7.2. Systemic or Exogenous Factors, 286
 - 17.7.3. Cell-Matrix Interactions, 286
 - 17.7.4. Polarity and Cell Shape, 288
 - 17.7.5. Oxygen Tension, 289
- 17.8. Differentiation and Malignancy, 289**
- 17.9. Practical Aspects, 289**

18. Transformation and Immortalization, 291

- 18.1. Role in Cell Line Characterization, 291**

 - 24.4. Primary Culture, 423**
 - 24.5. Characterization, 423**
 - 24.6. Development of Cell Lines, 424**
 - 24.6.1. Continuous Cell Lines, 424
 - 24.7. Selective Culture of Tumor Cells, 424**
 - 24.7.1. Selective Media, 424
 - 24.7.2. Confluent Feeder Layers, 425
 - Protocol 24.1. *Growth on Confluent Feeder Layers*, 425
 - 24.7.3. Suspension Cloning, 426
 - 24.7.4. Histotypic Culture, 426
 - 24.7.5. Xenografts, 427
 - 24.7.6. Characterization of Tumor Cell Cultures, 427

24.7.7. Preservation of Tissue by Freezing, 427

Protocol 24.2. Freezing Biopsies, 427

24.8. Specific Tumor Types, 428

24.8.1. Breast, 428

24.8.2. Lung, 428

24.8.3. Stomach, 428

24.8.4. Colon, 428

Protocol 24.3. Culture of Colorectal Tumors, 429

24.8.5. Pancreas, 431

24.8.6. Ovary, 431

24.8.7. Prostate, 431

24.8.8. Bladder, 432

24.8.9. Skin, 432

24.8.10. Cervix, 432

24.8.11. Glioma, 432

24.8.12. Neuroblastoma, 433

24.8.13. Seminoma, 433

24.8.14. Lymphoma and Leukemia, 433

25. Organotypic Culture, 435

25.1. Cell Interaction and Phenotypic Expression, 435

25.1.1. Effect of Cell Density, 435

25.1.2. Reciprocal Interactions, 435

25.1.3. Choice of Models, 436

25.2. Organ Culture, 436

25.2.1. Gas and Nutrient Exchange, 436

25.2.2. Structural Integrity, 438

25.2.3. Growth and Differentiation, 438

25.2.4. Limitations of Organ Culture, 438

25.2.5. Types of Organ Culture, 439

Protocol 25.1. Organ Culture, 439

25.3. Histotypic Culture, 440

25.3.1. Gel and Sponge Techniques, 440

25.3.2. Hollow Fibers, 440

25.3.3. Spheroids, 440

Protocol 25.2. Spheroids, 441

25.3.4. Rotating Chamber Systems, 443

25.3.5. Immobilization of Living Cells in Alginate, 443

Protocol 25.3. Alginate Encapsulation, 444

25.3.6. Filter Well Inserts, 444

Protocol 25.4. Filter Well Inserts, 445

25.3.7. Cultures of Neuronal Aggregates, 447

Protocol 25.5. Neuronal Aggregates, 447

25.3.8. Tissue Equivalents and Tissue Engineering, 450

25.4. Imaging Cells in 3D Constructs, 450

26. Scale-Up, 451

26.1. Scale-up in Suspension, 451

Protocol 26.1. Stirred 4-Liter Batch

Suspension Culture, 451

26.1.1. Continuous Culture, 453

26.1.2. Scale and Complexity, 454

26.1.3. Mixing and Aeration, 454

26.2. Scale-up in Monolayer, 456

26.2.1. Multisurface Propagators, 456

Protocol 26.2. Nunc Cell Factory, 456

26.2.2. Multiarray Disks, Spirals, and Tubes, 458

26.2.3. Roller Culture, 458

Protocol 26.3. Roller Bottle Culture, 459

26.2.4. Microcarriers, 460

Protocol 26.4. Microcarriers, 461

26.2.5. Macrocarriers, 462

26.2.6. Perfused Monolayer Culture, 462

26.3. Process Control, 465

27. Specialized Techniques, 467

27.1. Lymphocyte Preparation, 467

Protocol 27.1. Preparation of Lymphocytes, 467

27.1.1. Blast Transformation, 468

Protocol 27.2. PHA Stimulation of Lymphocytes, 468

27.2. Autoradiography, 468

Protocol 27.3. Microautoradiography, 469

27.3. Time-Lapse Recording, 473

Protocol 27.4. Time-Lapse Video Recording, 473

27.4. Confocal Microscopy, 475

27.5. Cell Synchrony, 475

27.5.1. Cell Separation, 475

27.5.2. Blockade, 475

27.6. Culture of Amniocytes, 475

Protocol 27.5. Culture of Amniocytes, 476

27.7. Culture of Cells from Poikilotherms, 481

27.7.1. Fish Cells, 481

Protocol 27.6. Cell Cultures from

Zebrafish Embryos, 481

27.7.2. Insect Cells, 484

Protocol 27.7. Propagation of Insect Cells, 484

27.8. In Situ Molecular Hybridization, 485

27.8.1. Analysis of RNA Gene Expression by In Situ Hybridization, 485

Protocol 27.8. Autoradiographic In Situ Hybridization, 485

27.8.2. Fluorescence In Situ Hybridization in the Analysis of Genes and Chromosomes, 488

Protocol 27.9. Fish using Single-Copy Genomic Probes and Chromosome Painting, 489

27.9. Somatic Cell Fusion, 490

Protocol 27.10. Cell Hybridization, 491

27.9.1. Nuclear Transfer, 493

27.10. Production of Monoclonal Antibodies, 493

Protocol 27.11. Production of Monoclonal Antibodies, 493

27.11. DNA Transfer, 496

27.11.1. Coprecipitation with Calcium Phosphate, 496

27.11.2. Lipofection, 496

Protocol 27.12. Transient Transfection by

Lipofection, 497

27.11.3. Electroporation, 498

Protocol 27.13. Stable Transfection by

Electroporation, 498

27.11.4. Other DNA Transfer Methods, 499

27.11.5. Reporter Genes, 500

Protocol 27.14. In Situ Staining for

β -Galactosidase, 500

Protocol 27.15. Chloramphenicol Acetyltransferase

(CAT) Assay, 500

28. Problem Solving, 503

28.1. Slow Cell Growth, 503

28.1.1. Problems Restricted to your Own Stock, 503

28.1.2. Problem is more General and Other People are Having Difficulty, 504
