<i>Prologue</i>	xi
1 Introduction – multiplication and division	1
A Life cycles and sexual cycles	1
B Gametes and spores	9
C Mitosis and meiosis	14
2 Modes of meiosis	29
A Chiasmate meiosis	29
A.1 Meiosis in diploids	29
A.2 Chiasma characteristics	46
A.2.1 Chiasma frequency and distribution	47
A.2.2 The nature and behaviour of chiasmata	69
A.3 Spontaneous U-type meiotic chromatid exchange	77
A.4 Multivalents and multiples	79
A.5 Membranes in meiosis	85
B Achiasmate meiosis	86
C Inverted meiosis	93
3 Occurrence and timing of meiosis	103
A Differentiation of the germ line	103
B Meiotic arrest	105
C Somatic support systems	109
D The duration of meiosis	112
4 Events and mechanisms of meiosis	113
A The switch to meiosis	113
B Pre-meiotic syntheses	117

C	Synaptic specificity	124
C.1	The synaptonemal complex	124
C.2	Interlocking	135
C.3	Synaptic adjustment	139
C.4	Non-homologous pairing	142
C.5	Polyploids and hybrids	144
C.6	Sex chromosome behaviour	155
C.6.1	Pairing with SC formation	157
C.6.2	Absence of the SC	163
D	Chiasma formation	165
D.1	Recombination nodules	165
D.2	The molecular biology of meiosis	173
D.2.1	Molecular models	173
D.2.2	Meiotic metabolism	179
D.3	Systems of recombination	191
5	Chromosome disjunction	202
A	Movement and orientation	202
A.1	Prophase movements	202
A.2	Pro-metaphase movements	204
A.3	Anaphase movements	220
B	Systems of segregation	221
B.1	Non-chiasmate segregation	221
B.1.1	Autosomal univalents	221
B.1.2	Non-chiasmate sex chromosome systems	223
B.2	Preferential segregation	238
B.2.1	Preferential segregation at male meiosis	238
B.2.2	Preferential segregation at female meiosis	244
6	The genetic control of meiosis	248
A	Meiotic mutations in <i>Drosophila</i>	248
A.1	Male mutations	248
A.2	Female mutations	251
A.2.1	Recombination defective mutations	251
A.2.2	Disjunction defective mutations	255
A.2.3	Inter- and intragenic effects	260
B	Meiotic mutations in fungi	263
C	Specialized forms of meiotic control	266
C.1	Genes with local effect	266
C.2	Chromosome-specific control of chiasma formation	267
C.3	The genetic control of homoeologous pairing in plant hybrids	268
C.4	Disjunction regulator regions	269

7 Sequences and consequences of meiosis	271
A Two-track heredity	271
A.1 Sex differences in recombination	271
A.2 Sex-limited translocations	275
A.3 Haplo-diploidy	280
B One-track heredity – female parthenogenesis	282
8 Evolutionary aspects of meiosis	304
<i>Postlogue</i>	324
<i>References</i>	328
<i>Index</i>	369
