List of contributors	page vii
Preface	xi
1 Macroevolution for plant reproductive biologists	1
PAUL WILSON	
2 Pollination crisis, plant sex systems, and predicting evolutionary trends in attractiveness	28
TOM J. DE JONG	
3 Evolution and ecological implications of "specialized" pollinator rewards	44
W. SCOTT ARMBRUSTER	
4 Fig-fig wasp mutualism: the fall of the strict cospeciation paradigm?	68
ASTRID CRUAUD, JAMES COOK, YANG DA-RONG, GWENAËLLE GENSON, ROULA JABBOUR-ZAHAB, FINN KJELLBERG, RODRIGO AUGUSTO SANTINELLO PEREIRA, NINA RØNSTED, OTILENE SANTOS-MATTOS, VINCENT SAVOLAINEN, ROSICHON UBaidILLAH, SIMON VAN NOORT, PENG YAN-QIONG AND JEAN-YVES RASPLUS	
5 Fossil bees and their plant associates	103
DENIS MICHEZ, MARYSE VANDERPLANCK AND MICHAEL S. ENGEL	
6 Pollen evidence for the pollination biology of early flowering plants	165
SHUSHENG HU, DAVID L. DILCHER AND DAVID WINSHIP TAYLOR	
7 Pollinator mediated floral divergence in the absence of pollinator shifts	237
ALLAN G. ELLIS AND BRUCE ANDERSON	
8 Animal pollination and speciation in plants: general mechanisms and examples from the orchids	263
FLORIAN P. SCHIESTL	
9 Why are floral signals complex? An outline of functional hypotheses	279
ANNE S. LEONARD, ANNA DORNHAUS AND DANIEL R. PAPAJ	
10 A survey on pollination modes in cacti and a potential key innovation	301
BORIS O. SCHLUMBERGER	
11 Zygomorphy, area, and the latitudinal biodiversity gradient in angiosperms	320
JANA C. VAMOSI AND STEVEN M. VAMOSI	

12 Ambophily and “super generalism” in <i>Ceratonia siliqua</i> (Fabaceae) pollination	344
AMOTS DAFNI, TALYA MAROM-LEVY, ANDREAS JÜRGENS, STEFAN DÖTTERL, YUVAL SHIMRAT, ACHIK DORCHIN, H. ELIZABETH KIRKPATRICK AND TAINA WITT	
13 Structure and dynamics of pollination networks: the past, present, and future	374
JENS M. OLESEN, YOKO L. DUPONT, MELANIE HAGEN, CLAUS RASMUSSEN AND KRISTIAN TRØJELSGAARD	
14 Pollinators as drivers of plant distribution and assemblage into communities	392
LOÏC PELLISSIER, NADIR ALVAREZ AND ANTOINE GUISAN	
15 Effects of alien species on plant–pollinator interactions: how can native plants adapt to changing pollination regimes?	414
GIDEON PISANTY AND Yael MANDELIK	
16 Pollen resources of non-<i>Apis</i> bees in southern Africa	439
MICHAEL KUHLMANN AND CONNAL D. EARDLEY	
17 Advances in the study of the evolution of plant–pollinator relationships	458
SÉBASTIEN PATINY	
Index	469

Color plate section appears between pages 248 and 249
