Introduction

1 Why macaque societies?	3
<i>Bernard Thierry, Mewa Singh, and Werner Kaumanns</i>	

Part I Individual attributes 11

2 Personality factors between and within species	13
<i>John P. Capitanio</i>	

Box 2 Social intelligence	33
<i>Josep Call</i>	

3 The role of emotions in social relationships	38
<i>Filippo Aureli and Gabriele Schino</i>	

Box 3 Power and communication	56
<i>Signe Preuschoft</i>	

4 Reproductive life history	61
<i>Fred Bercovitch and Nancy Harvey</i>	

Box 4 Life-history traits: ecological adaptations or phylogenetic relics?	80
<i>Mewa Singh and Anindya Sinha</i>	

Part II Demography and reproductive systems 85

5 Demography: a window to social evolution	87
<i>Wolfgang Dittus</i>	

Box 5 Patterns of group fission	112
<i>Kyoko Okamoto</i>	

6	Gene flow, dispersal patterns, and social organization <i>Hélène Gachot-Neveu and Nelly Ménard</i>	117
	Box 6 Dominance and paternity <i>Andreas Paul</i>	131
7	Mating systems <i>Joseph Soltis</i>	135
	Box 7 Homosexual behavior <i>Paul L. Vasey</i>	151
Part III	Social relationships and networks	155
8	Dominance style, social power, and conflict management: a conceptual framework <i>Jessica C. Flack and Frans B. M. de Waal</i>	157
	Box 8 Social space and degrees of freedom <i>Marina Butovskaya</i>	182
9	How kinship generates dominance structures: a comparative perspective <i>Bernard Chapais</i>	186
	Box 9 Inter-group relationships <i>Matthew A. Cooper</i>	204
10	Intergenerational transmission of behavior <i>Christophe Chauvin and Carol M. Berman</i>	209
	Box 10 Maternal behavior, infant handling, and socialization <i>Dario Maestriperi</i>	231
Part IV	External and internal constraints	235
11	Do ecological factors explain variation in social organization? <i>Nelly Ménard</i>	237
	Box 11 Intraspecific variation: implications for interspecific comparisons <i>David A. Hill</i>	262
12	Social epigenesis <i>Bernard Thierry</i>	267

Box 12	The role of contingency in evolution	290
	<i>Christophe Abegg</i>	
13	The use of artificial-life models for the study of social organization	295
	<i>Charlotte K. Hemelrijk</i>	
Box 13	Proximate behaviors and natural selection	313
	<i>William A. Mason</i>	
Part V	An outside viewpoint	319
14	An anthropologist among macaques	321
	<i>Maurice Godelier</i>	
Box 14	Do macaque species have a future?	328
	<i>Yasuyuki Muroyama and Ardith A. Eudey</i>	
Conclusion		
15	Toward integrating the multiple dimensions of societies	335
	<i>Bernard Thierry, Mewa Singh, and Werner Kaumanns</i>
