<i>Acknowledgements</i>	page	vi
1 Optimization models		1
2 Investments, returns and proportionality		19
3 Gain curves: efficiency factors		34
4 Evolutionarily stable strategies: sex allocation strategies as an example		53
5 Size at flowering		77
6 Reproductive effort		96
7 Size and number trade-offs: the evolution of seed size		110
8 Sex allocation theory for partially selfing plants		132
9 Size-dependent sex allocation		156
10 Sex ratios in dioecious plants		175
11 Outcrossing, selfing or no sex at all?		184
12 Heterostyly		199
13 Selective embryo abortion		215
14 Attractiveness to pollinators		229
15 Parent-offspring conflict		247
16 Intragenomic conflict		267
17 Group and kin selection		281
<i>Appendix 1 Mathematical help</i>		299
<i>References</i>		300
<i>Index</i>		328
