Preface *page xi*

1 Introduction	1
Fitness	3
Ecology of populations	6
Theory and data in ecology	6
Suggested reading	8
2 Population renewal	9
Population growth rate	10
Density dependence or not?	13
Population dynamics: the first step	16
Stochasticity	26
Time series	31
The visibility problem	34
Summary	38
3 Population dynamics in space – the first step	39
Setting the stage	40
Population dynamics in space	48
Asymmetrical dispersal	57
Summary	65
4 Synchronicity	66
Synchronous dynamics	67
Explanations of synchrony	77
Summary	97
5 Order–disorder in space and time	98
Spatial host–parasitoid dynamics	100
Traveling waves	108
Another view on self-organization	119
Summary	129

6	Structured populations	131
	The projection matrix	132
	Cohort and maternal effects	133
	Ontogenetic niche shifts	135
	Doers and viewers	141
	Stage structure and the <i>Tribolium</i> example	145
	Finnish grouse dynamics	148
	Summary	150
7	Biodiversity and community structure	152
	Community assembly	152
	Community closure	164
	Spatial extension	170
	Management implications	176
	Summary	179
8	Habitat loss	181
	What is meant by habitat loss?	181
	Consequences of habitat loss – a primer	183
	Habitat-loss-generated population fluctuations	192
	Life on the edge	200
	Cyclic dynamics – a special feature	204
	Summary	211
9	Population harvesting and management	213
	The problem with small numbers	214
	Declining populations	215
	Harvesting	220
	Harvesting and evolution	233
	Multi-species harvesting	233
	Summary	235
10	Resource matching	237
	Ideal free distribution	237
	Distribution of unequal competitors	239
	Natural ways of achieving undermatching	241
	Resource matching and trophic interactions	247
	Territoriality and despotic behavior	252
	Population structure and resource matching	254
	Resource matching and spatial population dynamics	258
	Summary	266

11 Spatial games	267
Classic games	268
Co-operation: early history	272
Space and strategy co-existence	274
Evolution of co-operation	290
Games and population dynamics	294
Summary	299
12 Evolutionary population dynamics	300
Sexual reproduction	301
Life histories	316
Evolutionary genetics	330
Summary	331
13 Epilogue	333
The feedback environment	334
Generalizations	336
<i>References</i>	338
<i>Index</i>	368
