

CONTENTS

Preface	vii
1 A brief history of Australia's mammals	1
Oolacunta	1
The extinction problem	2
Origins and evolution	3
<i>Part I MAMMALS AND PEOPLE IN ICE-AGE AUSTRALIA</i>	
2 The Pleistocene megafauna	16
Australia's Pleistocene bestiary	16
Some problems and controversies	30
Size and destiny	33
3 What caused the megafauna extinctions?	36
Early ideas 1860–1968	36
The modern debate	38
Overview	50
Complex hypotheses	51
Explaining extinction	53
4 Two dating problems: human arrival and megafauna extinction	55
Fixing dates on the past	55
The beginning of Australian prehistory	57
The end of the megafauna	62
5 The changing environment of the Pleistocene	76
Ice age climates	76
Vegetation and climate change	81
People, fire and vegetation	90
The last glacial cycle in perspective	94
6 Testing hypotheses on megafauna extinction	96
Timing of extinctions	96
The living and the dead	98
The power of late Pleistocene hunters	106

7 The ecological aftermath	115
Photographs of ghosts	116
Plant responses to megafauna extinction	121
Conclusions	129
 <i>Part II THE LATE PREHISTORIC PERIOD</i>	
8 Environmental change and Aboriginal history	132
The glacial maximum and the great flood	132
Population growth	136
A Holocene revolution: intensification	137
'Fire is for kangaroos'	142
Conclusions	146
9 Dingoes, people and other mammals	148
History of the dingo	148
Dingoes and people	150
Mainland extinction of the thylacine and devil	153
A role for people?	159
Other mammal declines	162
The transition to <i>Terra Australis</i>	165
 <i>Part III EUROPEANS AND THEIR NEW MAMMALS</i>	
10 Mammal extinction in European Australia	168
The extinction pattern	168
The extinct species	175
Mammal decline and ecosystem decay	181
11 What caused the recent extinctions?	187
Some good ideas that don't work	188
The power of introduced predators	197
12 Interactions: rabbits, sheep and dingoes	207
The grey blanket	207
The sheep plague	209
Introduced herbivores versus introduced predators	210
Hyperpredation	212
Why Australia needs more dingoes	216
A complete model and its implications	222
13 Conclusions	228
Extraordinary predators?	229
A fragile fauna?	230
Accidents of history	233
References	237
Glossary	264
List of Illustrations	267
Index	270
