Introduction The uphill climb of sociobiology: towards a new synthesis	1
Tamás Székely, Allen J. Moore and Jan Komdeur	
Profile Undiminished passion	5
Tim Birkhead	
Part I Foundations	
1 Nature-nurture interactions	11
Marla B. Sokolowski and Joel D. Levine	
Profile Social evolution, sexual intrigue and serendipity	26
Andrew Cockburn	
2 The quantitative genetics of social behaviour	29
Bronwyn H. Bleakley, Jason B. Wolf and Allen J. Moore	
Profile Mating systems: integrating sexual conflict and ecology	55
Nicholas B. Davies	
3 Social behaviour and bird song from a neural and endocrine perspective	59
Elizabeth Adkins-Regan, Timothy J. DeVoogd and Jordan M. Moore	
Profile In love with <i>Ropalidia marginata</i> : 34 years, and still going strong	85
Raghavendra Gadagkar	
4 Evolutionary game theory	88
John M. McNamara and Franz J. Weissing	

Profile	The huddler's dilemma: a cold shoulder or a warm inner glow	107	11	Pair bonds and parental behaviour	271
	David Haig			Lisa McGraw, Tamás Székely and Larry J. Young	
5	Recent advances in comparative methods	110	Profile	Mating systems and genetic variation	302
	Robert P. Freckleton and Mark Pagel			Marion Petrie	
Profile	Multi-component signals in ant communication	127	12	Adaptations and constraints in the evolution of delayed dispersal: implications for cooperation	306
	Bert Hölldobler			Jan Komdeur and Jan Ekman	
6	Social evolution theory: a review of methods and approaches	132	Profile	Selections from a life in social selection	328
	Tom Wenseleers, Andy Gardner and Kevin R. Foster			David C. Queller	
Profile	What's wrong with this picture?	159	13	Social behaviour in microorganisms	331
	Sarah B. Hrdy			Kevin R. Foster	
Part II Themes					
7	Aggression: towards an integration of gene, brain and behaviour	165	Profile	The de novo evolution of cooperation: an unlikely event	357
	Robert Huber and Edward A. Kravitz			Paul B. Rainey	
Profile	From behavioural observations, to genes, to evolution	181	14	Social environments, social tactics and their fitness consequences in complex mammalian societies	360
	Laurent Keller			Marion L. East and Heribert Hofer	
8	Social influences on communication signals: from honesty to exploitation	185	Profile	Evolutionary genetics and social behaviour: changed perspectives on sexual coevolution	391
	Mark E. Hauber and Marlene Zuk			Michael G. Ritchie	
Profile	Reputation can make the world go round - or why we are sometimes social	200	15	Social behaviour in humans	395
	Manfred Milinski			Ruth Mace	
9	Important topics in group living	203	Profile	Genes and social behaviour: from gene to genome to 1000 genomes	410
	Jens Krause and Graeme Ruxton			Gene E. Robinson	
Profile	A haphazard career	226	Part III Implications		
	Ronald Noë		16	Personality and individual social specialisation	417
10	Sexual behaviour: conflict, cooperation and coevolution	230		Denis Réale and Niels J. Dingemanse	
	Tommaso Pizzari and Russell Bonduriansky		Profile	Behavioural ecology, why do I love thee? Let me count the reasons	442
Profile	In celebration of questions, past, present and future	267		Paul W. Sherman	
	Geoff A. Parker				

17	Molecular and genetic influences on the neural substrate of social cognition in humans	446	Profile	Look to the ants	516
	Louise Gallagher and David Skuse			Edward O. Wilson	
	Profile Anonymous (and other) social experience and the evolution of cooperation by reciprocity	470	20	Social behaviour in conservation	520
	Michael Taborsky			Daniel T. Blumstein	
	Profile Social theory based on natural selection	489	Profile	The handicap principle and social behaviour	535
	Robert Trivers			Amotz Zahavi	
18	Population density, social behaviour and sex allocation	474	21	Prospects for research in social behaviour: systems biology meets behaviour	538
	Suzanne H. Alonzo and Ben C. Sheldon			Allen J. Moore, Tamás Székely and Jan Komdeur	
	Profile Social theory based on natural selection	489			
	Robert Trivers				
19	Social behaviour and speciation	491		<i>Species index</i>	551
	Gerald S. Wilkinson and Leanna M. Birge			<i>Subject index</i>	555
