<i>Preface</i>	xi

INTRODUCTION TO SECTION I

The Origins of Biological Diversity	1
-------------------------------------	---

Chapter One	5
--------------------	---

Andrew H. Knoll and David T. Johnston

The Big Picture: A Tripartite View of Life and Environments
through Time

Chapter Two	25
--------------------	----

David Jablonski

Macroevolutionary Trends in Time and Space

Chapter Three	44
----------------------	----

Philip J. Currie

Dinosaurs Live!

Chapter Four	65
---------------------	----

*Christopher N. Balakrishnan, June Y. Lee,
and Scott V. Edwards*

Phylogeography and Phylogenetics in the Nuclear Age

INTRODUCTION TO SECTION II

Mechanisms, Molecules, and Evo-Devo	89
-------------------------------------	----

Chapter Five	93
---------------------	----

Paul M. Brakefield and Mathieu Joron

The Flexibility of Butterfly Wing Color Patterns and Evolution
in Morphospace

Chapter Six	115
--------------------	-----

David Kingsley

Genetics, Geology, and Miracles

Chapter Seven	131
<i>Joshua B. Gross and Clifford J. Tabin</i>	
Evolutionary Genetics of Pigmentation Loss in the Blind Mexican Cavefish	
Chapter Eight	149
<i>Douglas J. Emlen</i>	
A Developmental View of Exaggerated Growth and Conditional Expression in the Weapons of Sexual Selection	
INTRODUCTION TO SECTION III	
Morphology and Behavior	173
Chapter Nine	177
<i>Mimi A. R. Koehl</i>	
How Does Morphology Affect Performance in Variable Environments?	
Chapter Ten	192
<i>Hopi E. Hoekstra</i>	
In Search of the Elusive Behavior Gene	
Chapter Eleven	211
<i>May R. Berenbaum</i>	
There Must Be Finches—Charles Darwin, Prickly Pears, and Pollination Biology	
Chapter Twelve	228
<i>John N. Thompson</i>	
The Adaptive Radiation of Coevolving Prodoxid Moths and Their Host Plants: <i>Greya</i> Moths and <i>Yucca</i> Moths	
INTRODUCTION TO SECTION IV	
Ecological Diversity	247
Chapter Thirteen	251
<i>Trevor Price, Albert B. Phillimore, Myra Atwood, and Richard Hudson</i>	
Ecological and Geographical Influences on the Allopatric Phase of Island Speciation	

Chapter Fourteen	282
<i>Ole Seehausen and Isabel Santos Magalhaes</i>	
Geographical Mode and Evolutionary Mechanism of Ecological Speciation in Cichlid Fish	
Chapter Fifteen	309
<i>Jonathan B. Losos</i>	
A Tale of Two Radiations: Similarities and Differences in the Evolutionary Diversification of Darwin's Finches and Greater Antillean <i>Anolis</i> Lizards	
Chapter Sixteen	332
<i>Roxean D. H. Barrett and Dolph Schluter</i>	
Clarifying the Mechanisms of Evolution in Sticklebacks Using Field Studies of Natural Selection on Genes	
Chapter Seventeen	347
<i>Peter R. Grant and B. Rosemary Grant</i>	
The Book and the Future: Perspective and Prospective	
Chapter Eighteen	360
<i>David B. Wake</i>	
A Festival for Rosemary and Peter Grant	
<i>Index</i>	367
