## part 1

### Principles of Marine Science

#### 1 The Science of Marine Biology

*The Science of Marine Biology*

*The History of Marine Biology*

*The Challenger Expedition • The Growth of Marine Labs*

*Marine Biology Today*

*The Scientific Method*

*Observation: The Currency of Science*

*Two Ways of Thinking*

*Induction • Deduction*

*Testing Ideas*

*Constructing the Hypothesis • The Nature of Scientific*

*Proof • Testing the Hypothesis • The Scientific Theory*

*Limitations of the Scientific Method*

#### **Boxed Reading**

*John Steinbeck and Ed Ricketts*

*Do-It-Yourself Summary*

*Thought Questions*

*For Further Reading*

#### 2 The Sea Floor

*The Water Planet*

*The Geography of the Ocean Basins*

*The Structure of the Earth*

*Internal Structure • Continental and Oceanic Crust*

*The Origin and Structure of the Ocean Basins*

*Early Evidence of Continental Drift*

*The Theory of Plate Tectonics*

*Discovery of the Mid-Ocean Ridge • Significance of the Mid-Ocean Ridge • Creation of the Sea Floor • Sea-Floor Spreading and Plate Tectonics*

*Geological History of the Earth*

*Continental Drift and the Changing Oceans • The Record in the Sediments • Climate and Changes in Sea Level*

*The Geological Provinces of the Ocean*

*Continental Margins*

*The Continental Shelf • The Continental Slope • The Continental Rise • Active and Passive Margins*

*Deep-Ocean Basins*

*The Mid-Ocean Ridge and Hydrothermal Vents*

#### **Boxed Reading**

*Hot Spots and the Creation of the Hawaiian Islands*

*Do-It-Yourself Summary*

*Thought Questions*

*For Further Reading*

### 3 Chemical and Physical Features of the World Ocean

*The Waters of the Ocean*

*The Unique Nature of Pure Water*

*The States of Water • Heat and Water • Water as a Solvent*

*Seawater*

*Salt Composition • Salinity, Temperature, and Density • Dissolved Gases • Transparency • Pressure*

|                                                                                                                    |    |                                                                                         |    |
|--------------------------------------------------------------------------------------------------------------------|----|-----------------------------------------------------------------------------------------|----|
| <i>Motion in the Ocean</i>                                                                                         | 48 | Salinity                                                                                | 73 |
| Surface Circulation                                                                                                | 48 | Diffusion and Osmosis • Regulation of Salt and Water Balance                            |    |
| The Coriolis Effect • Wind Patterns • Surface Currents                                                             |    | Temperature                                                                             | 75 |
| Waves                                                                                                              | 51 | Surface-to-Volume Ratio                                                                 | 76 |
| Tides                                                                                                              | 54 | <i>Perpetuating Life</i>                                                                | 76 |
| Why Are There Tides? • Tides in the Real World                                                                     |    | Modes of Reproduction                                                                   | 77 |
| <i>Vertical Motion and the Three-Layer Ocean</i>                                                                   | 59 | Asexual Reproduction • Sexual Reproduction                                              |    |
| Stability and Overturn                                                                                             | 59 | Reproductive Strategies                                                                 | 79 |
| The Three-Layer Ocean                                                                                              | 60 | <i>The Diversity of Life in the Sea</i>                                                 | 79 |
