

CONTENTS

Preface xi

1 Introduction to Plants and Botany. 1

Concepts 1

Plants 1

Scientific Method 2

Areas Where the Scientific Method Is Inappropriate 5

Using Concepts to Understand Plants 5

Origin and Evolution of Plants 8

Diversity of Plant Adaptations 10

Plants Versus the Study of Plants 10

BOX 1-1 Plants and People: Plants and People, Including Students 7

BOX 1-2 Plants and People: Life, Death, and the Exploration of the Solar System 11

2 Introduction to the Principles of Chemistry 15

Concepts 15

Atoms and Molecules 16

Mechanisms of Chemical Reactions 20

Organic Molecules and Polymeric Construction 22

Carbohydrates 23

Amino Acids and Proteins 25

Nucleic Acids 27

Lipids 28

Cofactors and Carriers 31

Enzymes 33

BOX 2-1 Plants Do Things Differently: Vitamins: Plants and Human Health 21

BOX 2-2 Plants and People: Toxic Compounds 30

PART 1 Plant Structure. 37

3 Cell Structure 38

Concepts 38

Membranes 41

Basic Cell Types 45

Plant Cells 45

Fungal Cells 62

Associations of Cells 62

BOX 3-1 Alternatives: Unusual Cells 42

BOX 3-2 Plants Do Things Differently: Calcium: Strong Bones, Strong Teeth, but Not Strong Plants 48

BOX 3-3 Botany and Beyond: The Metric System and Geometric Aspects of Cells 56

4 Growth and Division of the Cell 66

Concepts 66

Growth Phase of the Cell Cycle 68

Division Phase of the Cell Cycle 71

Less Common Types of Division in Plants 80

Cell Division in Algae 81

Cell Division of Prokaryotes 83

Division of Chloroplasts and Mitochondria 83

BOX 4-1 Plants and People: Controlled Growth Versus Cancerous Growth 73

BOX 4-2 Alternatives: Rates of Growth 76

BOX 4-3 Botany and Beyond: Chloroplast Division During Leaf Growth 84

5 Tissues and the Primary Growth of Stems 87

Concepts 87

Basic Types of Cells and Tissues 91

External Organization of Stems 96

Internal Organization of Stems 100

Stem Growth and Differentiation 113

BOX 5-1 Plants Do Things Differently: Plants and People Grow Differently 90

BOX 5-2 Plants Do Things Differently: Organs: Replace Them or Reuse Them? 101

BOX 5-3 Botany and Beyond: Resin Casting: A Method for Studying Cell Shapes 108

BOX 5-4 Alternatives: Simple Plants 115

6 Leaves 120

Concepts 120

External Structure of Foliage Leaves 121

Internal Structure of Foliage Leaves 127

Initiation and Development of Leaves 132

Morphology and Anatomy of Other Leaf Types 136

BOX 6-1 Plants and People: Leaves, Food, and Death 124

BOX 6-2 Botany and Beyond: Leaf Structure, Layer by Layer 128

BOX 6-3 Alternatives: Photosynthesis Without Leaves 135

7 Roots 143

Concepts 143

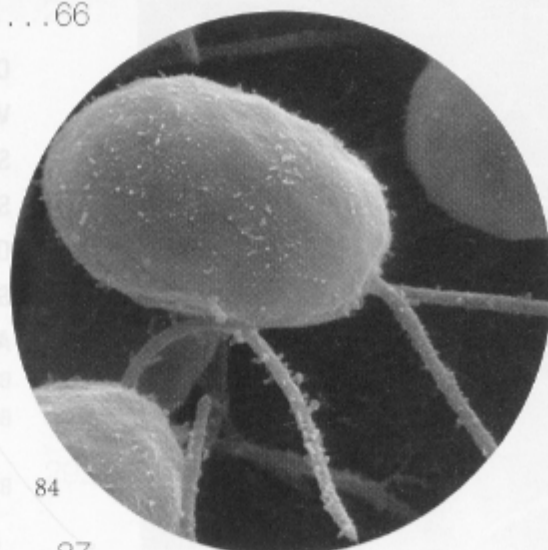

External Structure of Roots 144

Internal Structure of Roots 148

Origin and Development of Lateral Roots 153

Other Types of Roots and Root Modifications 153

BOX 7-1 Plants Do Things Differently: Plants and People and Having a Weight Problem 152

8 Structure of Woody Plants.161

Concepts	161
Vascular Cambium	163
Secondary Xylem	167
Secondary Phloem	176
Outer Bark	177
Secondary Growth in Roots	181
Anomalous Forms of Growth	182
BOX 8-1 Botany and Beyond: Wood in Three Dimensions	168
BOX 8-2 Plants Do Things Differently: Having Multiple Bodies in One Lifetime	174
BOX 8-3 Plants and People: Dendrochronology—Tree Ring Analysis	180

9 Flowers and Reproduction188

Concepts	188
Asexual Reproduction	190
Sexual Reproduction	190
Flower Structure and Cross-Pollination	203
Inflorescences and Pollination	207
Fruit Types and Seed Dispersal	208
BOX 9-1 Plants and People: Flowers, Fruits, Seeds, and Civilization	197

PART 2 Plant Physiology and Development215

10 Energy Metabolism: Photosynthesis.217

Concepts	217
Energy and Reducing Power	218
Photosynthesis	221
Environmental and Internal Factors	233
BOX 10-1 Plants and People: Photosynthesis, Global Warming, and Global Climate Change	224
BOX 10-2 Alternatives: Photosynthesis in Bacteria and Cyanobacteria	240

11 Energy Metabolism: Respiration.244

Concepts	244
Types of Respiration	246
Environmental and Internal Factors	260
Total Energy Yield of Respiration	261
Respiratory Quotient	264
BOX 11-1 Plants and People: Fungal Respiration—The Prehistoric Industrial Revolution	248
BOX 11-2 Alternatives: Respiration in Prokaryotes	251
BOX 11-3 Plants Do Things Differently: Plants, Babies, and Heat	257
BOX 11-4 Alternatives: Heterotrophic Plants	262

12 Transport Processes 267

Concepts 267

Diffusion, Osmosis, and Active Transport 269

Water Potential 269

Short-Distance Intercellular Transport 277

Long-Distance Transport: Phloem 280

Long-Distance Transport: Xylem 282

BOX 12-1 Botany and Beyond: Water and Ecology 273

BOX 12-2 Plants and People: Farming "Wastelands" 279

BOX 12-3 Alternatives: Desert Plant Biology 284

13 Soils and Mineral Nutrition 292

Concepts 292

Essential Elements 293

Mineral Deficiency Diseases 295

Soils and Mineral Availability 298

Nitrogen Metabolism 303

Storage of Minerals Plants 308

BOX 13-1 Plants Do Things Differently: Plants Eat Dirt; Animals Eat Protoplasm 297

BOX 13-2 Botany and Beyond: Acid Rain 302

BOX 13-3 Plants and People: From Fertility Gods to Fertilizers 306

14 Development and Morphogenesis 311

Concepts 311

Environmental Complexity 313

Responding to Environmental Stimuli 316

Communication Within the Plant 318

Activation and Inhibition of Shoots by Auxin 325

Interactions of Hormones in Shoots 327

Hormones as Signals of Environmental Factors 327

Flowering 329

BOX 14-1 Alternatives: Simple Bodies and Simple Development in Algae 324

15 Genes and the Genetic Basis of Metabolism and Development 337

Concepts 337

Storing Genetic Information 339

Protein Synthesis 344

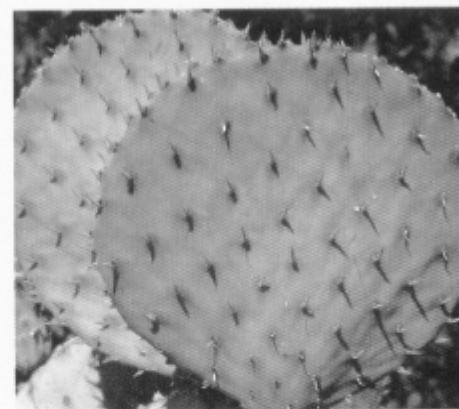

Control of Protein Levels 349

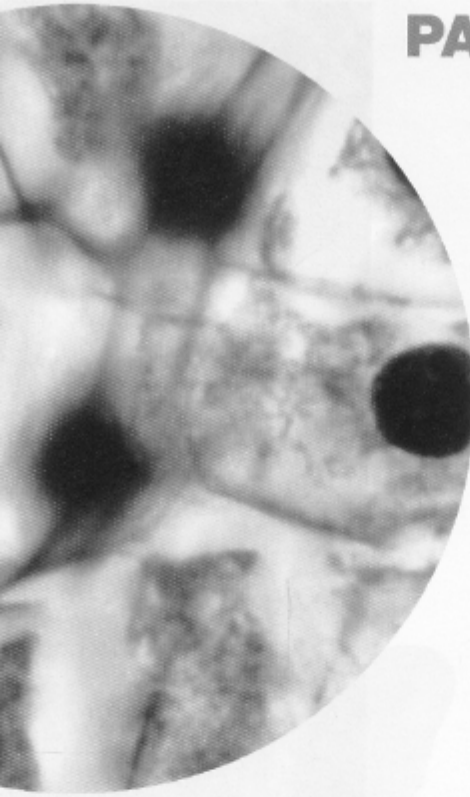

Analysis of Genes and Recombinant DNA Techniques 350

Genetic Engineering of Plants 357

Viruses 359

BOX 15-1 Plants and People: Genetic Engineering and Evolution 348

PART 3	Genetics and Evolution	365
16	Genetics	366
Concepts	366	
Replication of DNA	368	
Mutations	369	
Monohybrid Crosses	373	
Dihybrid Crosses	379	
Multiple Genes for One Character	384	
Other Aspects of Inheritance	384	
BOX 16-1	Botany and Beyond: Botanical Philosophy and Popular Culture	376
BOX 16-2	Alternatives: Genetics of Haploid Plants	381
17	Population Genetics and Evolution	392
Concepts	392	
Population Genetics	394	
Rates of Evolution	399	
Speciation	400	
Evolution and the Origin of Life	404	
BOX 17-1	Plants and People: Zoos, Botanical Gardens, and Genetic Drift	405
18	Classification and Systematics	413
Concepts	413	
Levels of Taxonomic Categories	414	
Cladistics	415	
Other Types of Classification Systems	426	
Taxonomic Studies	427	
The Major Lines of Evolution	431	
BOX 18-1	Plants and People: Development of Concepts of Evolution and Classification	418
BOX 18-2	Botany and Beyond: Cacti as Examples of Evolutionary Diversification	422
BOX 18-3	Plants and People: Identifying Unknown Plants	428
19	Algae and the Origin of Eukaryotic Cells	435
Concepts	435	
Origin of Eukaryotic Cells	437	
Characteristics of Various Groups of Algae	441	
Green Algae	441	
Red Algae	449	
Brown Algae and their Relatives: The Heterokonts	451	
Dinoflagellates	455	
Euglenoids	456	

20	Nonvascular Plants: Mosses, Liverworts, and Hornworts	459
-----------	--	-----

Concepts	459
Characters of Nonvascular Plants	462
Classification of Nonvascular Plants	463
Division Bryophyta: Mosses	463
Division Hepatophyta: Liverworts	469
Division Anthocerotophyta: Hornworts	473

21	Vascular Plants Without Seeds	478
-----------	---	-----

Concepts	478
Early Vascular Plants	480
The Microphyll Line of Evolution: Lycophytes	483
The Megaphyll Line of Evolution: Euphyllophytes	488
The Term "Vascular Cryptogams"	499

BOX 21-1	Botany and Beyond: Molecular Studies of the Evolution of Early Land Plants	488
BOX 21-2	Botany and Beyond: Form Genera	495

22	Seed Plants I: Gymnosperms	502
-----------	--------------------------------------	-----

Concepts	502
Division Progymnospermophyta: Progymnosperms	505
Division Pteridospermophyta: Seed Ferns	507
Division Coniferophyta: Conifers	508
Division Cycadophyta: Cycads	515
Division Cycadeoidophyta: Cycadeoids	515
Division Ginkgophyta: Maidenhair Tree	517
Division Gnetophyta	518

23	Seed Plants II: Angiosperms	522
-----------	---------------------------------------	-----

Concepts	522
Changing Concepts About Early Angiosperms	526
Classification of Flowering Plants	528
Basal Angiosperms	530
Monocots	531
Eudicots	537

BOX 23-1	Plants and People: Maintaining Genetic Diversity	529
-----------------	--	-----

24	Fungi	549
-----------	-----------------	-----

Concepts	549
General Characteristics of Fungi	550
Slime Molds	558

Chytridiomycetes	559
Zygomycetes	559
Ascomycetes	560
Basidiomycetes	563
Imperfect Fungi	564
Associations of Fungi With Other Organisms	565
Fungi as Disease Agents of Plants	566

25 Prokaryotes: Domains Bacteria and Archaea 571

Concepts	571
Structure of the Prokaryotic Cell	572
Cell Division and Reproduction	575
Metabolism	575
Classification of Prokaryotes	576
Domain Archaea	576
Domain Bacteria	579
BOX 25-1 Botany and Beyond: The "Misclassification" of the Blue-Green Algae	578

PART 4 Ecology 583

26 Populations and Ecosystems 584

Concepts	584
Plants in Relationship to Their Habitats	585
The Structure of Populations	595
The Structure of Ecosystems	599
BOX 26-1 Plants and People: Niches in the Jet Age	594

27 Biomes 606

Concepts	606
World Climate	607
Continental Drift	611
The Current World Biomes	613
BOX 27-1 Botany and Beyond: Measuring Ancient Continental Positions and Climates	616

Glossary
