

Brief Contents

Chapter 1	The Genetic Code of Genes and Genomes	1
Chapter 2	Transmission Genetics: Heritage from Mendel	34
Chapter 3	The Chromosomal Basis of Heredity	68
Chapter 4	Gene Linkage and Genetic Mapping	110
Chapter 5	Human Chromosomes and Chromosome Behavior	150
Chapter 6	DNA Structure, Replication, and Manipulation	188
Chapter 7	The Genetics of Bacteria and Their Viruses	222
Chapter 8	The Molecular Genetics of Gene Expression	259
Chapter 9	Molecular Mechanisms of Gene Regulation	293
Chapter 10	Genomics, Proteomics, and Genetic Engineering	331
Chapter 11	The Genetic Control of Development	365
Chapter 12	Molecular Mechanisms of Mutation and DNA Repair	395
Chapter 13	Molecular Genetics of the Cell Cycle and Cancer	431
Chapter 14	Molecular Evolution and Population Genetics	463
Chapter 15	The Genetic Basis of Complex Inheritance	497
