

Brief Contents

PART 1 FOUNDATIONS OF MICROBIOLOGY 1

- Chapter 1 Microbiology: Then and Now 3
- Chapter 2 The Chemical Building Blocks of Life 35
- Chapter 3 Concepts and Tools for Studying Microorganisms 64
- Chapter 4 Cell Structure and Function in the *Bacteria* and *Archaea* 97
- Chapter 5 Microbial Growth and Nutrition 131
- Chapter 6 Metabolism of Microorganisms 158
- Chapter 7 Control of Microorganisms: Physical and Chemical Methods 189

PART 2 THE GENETICS OF MICROORGANISMS 222

- Chapter 8 Microbial Genetics 224
- Chapter 9 Gene Transfer, Genetic Engineering, and Genomics 260

PART 3 BACTERIAL DISEASES OF HUMANS 298

- Chapter 10 Airborne Bacterial Diseases 300
- Chapter 11 Foodborne and Waterborne Bacterial Diseases 334
- Chapter 12 Soilborne and Arthropodborne Bacterial Diseases 371
- Chapter 13 Sexually Transmitted and Contact Transmitted Bacterial Diseases 396

PART 4 VIRUSES AND EUKARYOTIC MICROORGANISMS 438

- Chapter 14 The Viruses and Virus-Like Agents 440
- Chapter 15 Viral Infections of the Respiratory Tract and Skin 474
- Chapter 16 Viral Infections of the Blood, Lymphatic, Gastrointestinal, and Nervous Systems 508
- Chapter 17 Eukaryotic Microorganisms: The Fungi 535
- Chapter 18 Eukaryotic Microorganisms: The Parasites 567

PART 5 DISEASE AND RESISTANCE 607

- Chapter 19 Infection and Disease 609
- Chapter 20 Resistance and the Immune System: Innate Immunity 646
- Chapter 21 Resistance and the Immune System: Acquired Immunity 669
- Chapter 22 Immunity and Serology 698
- Chapter 23 Immune Disorders and AIDS 729
- Chapter 24 Antimicrobial Drugs 767
- Appendix A Metric Measurement A-1
- Appendix B Temperature Conversion Chart A-1
- Glossary G-1
- Index I-1
- Photograph Acknowledgments P-1
