

CONTENTS

Preface vii

Introduction 1

Endothermy 2 • Food Energy and Teeth 2 • A Very Brief History of the Study of Mammal Teeth 3 • Organization of This Book 4

PART I: KEY TERMS AND CONCEPTS

1 Tooth Structure and Form 9

Basic Tooth Structure 9 • Tooth Types 9 • Deciduous and Permanent Teeth 10 • Dental Formulas, Tooth Notations, and Direction Terms 11
Nomenclature for Features on the Occlusal Surface 11 • Categories of Cheek Teeth 14

2 Dental Histology and Development 16

Fracture Mechanics and Tooth Design 16 • Dental Histology 17 • Dental Development 20 • Genetics of Dental Development and Occlusal Morphology 23

3 Food and Feeding 26

Nutrient Requirements 26 • Energy Flow and Food Selection 30 • Diet Categories 31 • Physical Properties of Foods 34 • Final Thoughts 38

4 Food Acquisition and Processing 39

Food Acquisition 39 • Food Processing 44 • Final Thoughts 56

5 Classification of the Mammals 58

Some Basic Terms and Concepts 58 • A Very Brief History of Classification of the Mammals 60 • Classification Used in This Book 64 • Taxonomy, Systematics, and Teeth 68

PART II: THE EVOLUTION OF MAMMAL TEETH

- 6 Teeth before the Mammals 73**
 The Origin(s) of Teeth 73 • The Early Evolution of Teeth 77 • Final Thoughts 82
- 7 The Origin of Mammalian Mastication 83**
 The Early Evolution of the Synapsids 83 • Key Adaptations for Mammalian Mastication 90 • Final Thoughts 95
- 8 The Fossil Record for Mesozoic Mammals 97**
 The Evolution of Mesozoic Mammals 97 • The Evolution of Molar Form in Mesozoic Mammals 105 • The Cretaceous/Paleogene Extinctions 107
- 9 Cenozoic Mammalian Evolution 110**
 Fossil Monotremes 111 • Fossil Marsupials 111 • Fossil Placentals 113
 Cenozoic Mammalian Radiations 123 • Final Thoughts 126

PART III: THE TEETH OF RECENT MAMMALS

- 10 Monotremata and Marsupialia 129**
 Protheria 129 • MONOTREMATA 129 • Marsupialia 130
 DIDELPHIMORPHIA 131 • PAUCITUBERCULATA 132 • MICROBIOTHERIA 132
 NOTORYCTEMORPHIA 133 • PERAMELEMORPHIA 134 • DASYUROMORPHIA 135
 DIPROTODONTIA 137 • Final Thoughts 143
- 11 Xenarthra and Afrotheria 144**
 Xenarthra 144 • CINGULATA 144 • PILOSA 145 • Afrotheria 146
 AFROSORICIDA 146 • MACROSCELIDEA 148 • TUBULIDENTATA 148
 HYRACOIDEA 148 • PROBOSCIDEA 149 • SIRENIA 150
 Final Thoughts 151
- 12 Laurasiatheria 153**
 CETARTIODACTYLA 153 • PERISSODACTYLA 163 • CHIROPTERA 166
 CARNIVORA 174 • PHOLIDOTA 183 • EULIPOTYPHILA 183
 Final Thoughts 186
- 13 Euarchontoglires 188**
 SCANDENTIA 188 • DERMOPTERA 190 • PRIMATES 190
 LAGOMORPHA 199 • RODENTIA 200 • Final Thoughts 218

Conclusions 221

Adaptive Radiation of the Mammals 221 • How Do Teeth Work? 222
 Where Did Teeth Come From, and How Did They Evolve? 223 • Dental Diversity
 Today and What We Can Learn from It 225 • Final Thoughts 227

Appendix 229

Literature Cited 233
